**Labor Category On-site (Government) Rates applicable to SIN 54151S..... 225**

**Labor Category Off-site (Contractor) Rates applicable to SIN 54151S..... 229**

**Labor Category On-site (Government) Rates applicable to SIN 54151HEAL..... 233**

**Labor Category Off-site (Contractor) Rates applicable to SIN 54151HEAL..... 237**

**Information for Ordering Agencies**

**1a. AWARDED SPECIAL ITEM NUMBERS (SINs):**

SIN	Title
54151HACS	Highly Adaptive Cybersecurity Services (HACS)
611420	Information Technology Training
54151S	Information Technology Professional Services
518210C	Cloud and Cloud-Related IT Professional Services
54151HEAL	Health Information Technology Services
OLM	Order Level Materials (OLMs)

All awarded SINs are approved for Cooperative Purchasing and Recovery Purchasing.

**1b. APPROVED PRODUCTS:** Not applicable

**1c. APPROVED LABOR CATEGORY RATES AND DESCRIPTIONS:** See Pages 36 -240

**2. MAXIMUM ORDER:** \$250,000 per order for SIN 611420, \$500,000 per order for SINs 54151HACS, 54151S, 518210C, and 54151HEAL, and \$100,000 per order for SIN OLM. Notwithstanding this limit, agencies may place and ManTech may honor orders exceeding this limit in accordance with FAR 8.404. This maximum order value is a dollar amount at which it is suggested that the ordering agency request greater discounts from the contractor before issuing the order. The contractor may 1) offer a new lower price, 2) offer the lowest price available under the contract, or 3) decline the order within five (5) days. In accordance with the Maximum Order provisions contained in the Schedule, a delivery order may be placed against the schedule even though it exceeds the maximum order threshold. There is no maximum ceiling for any task order.

**3. MINIMUM ORDER:** \$100.00 unless ManTech agrees to accept a smaller order amount. When the Government requires supplies or services covered by this contract in an amount less than \$100, the Government is not obligated to purchase, nor is ManTech obligated to furnish those supplies or services under the contract. However, if the Government places such orders, they shall be deemed to be accepted by ManTech, unless returned to the ordering office within 5 workdays after receipt by ManTech.

**4. GEOGRAPHIC COVERAGE:** Services offered Locally, Nationally and/or Worldwide. The geographic scope of this contract is the 48 contiguous states and the District of Columbia, Alaska, Hawaii, and the Commonwealth of Puerto Rico, and, on a worldwide basis, all U.S. Government installations and/or agencies abroad and any foreign country in which the U.S. Government does not prohibit trade.

**5. POINT OF PRODUCTION:** Not Applicable

**6. DISCOUNTS FROM LIST PRICES:** Reference Net Pricing included herein. Discounts may be offered on specific orders depending upon the Statement of Work, staffing, geographic location, and other factors.

**7. QUANTITY DISCOUNTS:** None

8. **PROMPT PAYMENT TERMS:** None
- 9a. **GOVERNMENT PURCHASE CARD ACCEPTED AT OR BELOW THE MICROPURCHASE THRESHOLD (\$3,000).** Government Commercial Credit Cards will be acceptable for payment. Contractors are required to accept the Government purchase card for payments equal to or less than the micro-purchase threshold for oral or written delivery orders
- 9b. **GOVERNMENT PURCHASE CARD ACCEPTED ABOVE THE MICROPURCHASE THRESHOLD.** Government purchase cards will be acceptable for payment above the micro-purchase threshold. In addition, bank account information for wire transfer payment will be shown on the invoice.
10. **FOREIGN ITEMS:** None
- 11a. **TIME OF DELIVERY:** As negotiated between Contractor and Ordering Office
- 11b. **EXPEDITED DELIVERY:** Contact ManTech Advanced Systems International, Inc.
- 11c. **OVERNIGHT AND 2-DAY-DELIVERY:** Contact ManTech Advanced Systems International, Inc.
- 11d. **URGENT REQUIREMENTS:** Contact ManTech Advanced Systems International, Inc.
12. **FOB POINT:** Destination
- 13a. **ORDERING ADDRESS:** ManTech Advanced Systems International, Inc.  
2251 Corporate Park Drive  
Herndon, VA 20171-4839
- 13b. **ORDERING PROCEDURES:** For supplies and services, the ordering procedures, information on Blanket Purchase Agreements (BPAs) and a sample BPA can be found at the GSA/FSS Schedule homepage ([fss.gsa.gov/schedules](http://fss.gsa.gov/schedules)).
14. **PAYMENT ADDRESS:** ManTech Advanced Systems International, Inc.  
c/o ManTech International Corporation  
P.O. Box 822895  
Philadelphia PA 19182-2895
15. **WARRANTY PROVISIONS:** Reference Ordering Procedures for Services; Standard Commercial Warranty for Products
16. **EXPORT PACKING CHARGES:** Actual costs plus applicable G&A
17. **TERMS AND CONDITIONS OF GOVERNMENT PURCHASE CARD ACCEPTANCE:** Government Commercial Credit Cards will be acceptable for payment. Contractors are required to accept the Government purchase card for payments equal to or less than the micro-purchase threshold for oral or written delivery orders. Government purchase cards will be acceptable for

payment above the micro-purchase threshold. In addition, bank account information for wire transfer payments will be shown on the invoice.

**18. TERMS AND CONDITIONS OF RENTAL, MAINTENANCE, AND REPAIR:** Not Applicable

**19. TERMS AND CONDITIONS OF INSTALLATION:** Not Applicable

**20. TERMS AND CONDITIONS OF REPAIR PARTS:** Not Applicable

**20a. TERMS AND CONDITIONS FOR ANY OTHER SERVICES:** Not Applicable

**21. LIST OF SERVICE AND DISTRIBUTION POINTS:** Not Applicable

**22. LIST OF PARTICIPATING DEALERS:**

ManTech Advanced Systems International, Inc.  
c/o ManTech SRS Technologies, Inc.  
2251 Corporate Park Drive  
Herndon, VA 20171-4839

DUNS: 066183039  
CAGE: 4L958

**23. PREVENTATIVE MAINTENANCE:** Not Applicable

**24a. SPECIAL ATTRIBUTES:** Not Applicable

**24b. SECTION 508:** Not Applicable

**25. DATA UNIVERSAL NUMBER SYSTEM (DUNS) NUMBER:** 13-962-7525

**26. REGISTERED IN THE SYSTEM FOR AWARD MANAGEMENT (SAM) DATABASE:**  
Yes

**27. TYPES OF ORDERS:** Both firm fixed-price and time and materials task orders are acceptable under this contract.

**28. SECURITY REQUIREMENTS:** In the event security requirements are necessary, the ordering activities may incorporate in their delivery order(s), a security clause in accordance with current laws, regulations, and individual agency policy; however, the burden of administering the security requirements shall be with the ordering agency. If any costs are incurred as a result of the inclusion of security requirements, such costs will not exceed ten percent (10%) or \$100,000, of the total dollar value of the order, whichever is less.

**29. CONTRACT ADMINISTRATION FOR ORDERING OFFICES:** Any ordering office, with respect to any one or more delivery orders placed by it under this contract, may exercise the same rights of termination as might the GSA Contracting Officer under provisions of FAR 52.212-4,

paragraphs (1) Termination for the Government's convenience, and (m) Termination for Cause (See C.1.).

30. **PURCHASE OF INCIDENTAL, NON-SCHEDULE ITEMS:** For administrative convenience, open market (non-contract) items may be added to a Federal Supply Schedule Blanket Purchase Agreement (BPA) or an individual order, provided that the items are clearly labeled as such on the order, all applicable regulations have been followed, and the price reasonableness has been determined by the ordering activity for the open market (non-contract) items.
31. **SUBCONTRACTORS:** Subcontractors are to be included on task orders under the schedule price list labor categories and rates when possible. Upon the approval of the ordering agency, subcontractors may be included as off-schedule costs if their services are not suitable under the contract labor categories as listed herein (per the Schedule 70 solicitation).
32. **TRAVEL & OTHER DIRECT COSTS (ODCS):** For travel and ODCs costs, ManTech will follow the Federal Travel Regulations or Joint Travel Regulations, as applicable. As documented within ManTech's disclosure statement for each Business Unit, ManTech will apply applicable indirect rates to travel and/or ODC costs per our disclosure statements.
33. **DIFFERENTIALS/ALLOWANCES:** The rates included herein do not include Cost of Living Allowances or Site Differentials, nor do they include Housing or Relocation Costs. These costs, to include overtime pay and shift differentials shall be negotiated separately on a case-by-case basis with the ordering agencies. Additionally, the rates do not include Hazardous Duty Pay or Sea Duty/Isolated Duty. These costs shall also be negotiated separately on a case-by case- basis with the ordering agencies.
34. **OVERTIME:** ManTech observes all overtime pay requirements of the Fair Labor Standards Act of 1938, as amended. Thus all employees who are subject to the law's wage and hour provisions (that is "non-exempt" employees, such as administrative personnel and certain technicians) will receive compensation for approved overtime in accordance with those provisions. In states that have established other overtime standards, applicable legal requirements will be observed.
35. **DEFENSE PRIORITIES AND ALLOCATIONS SYSTEM REQUIREMENTS:** For task orders issued under this schedule, ManTech recognizes the Defense Priorities and Allocations System Requirements regulation, reference DFAR 252.211-15.
36. **LIABILITY FOR INJURY OR DAMAGE:** The Contractor shall not be liable for any injury to Government personnel or damage to Government property arising from the use of equipment maintained by the Contractor, unless such injury or damage is due to the fault or negligence of the Contractor.
37. **INDUSTRIAL FUNDING FEE:** The Industrial Funding Fee is included in the labor rates and the products awarded under this Schedule. The IFF does not apply to off-schedule items such as travel, materials, and other direct costs.

**Terms and Conditions Applicable to Highly Adaptive Cybersecurity Services (HACS)  
(Special Item Number 54151HACS)**

**\*\*\*\*NOTE: Non-professional labor categories must be incidental to, and used solely to support Highly Adaptive Cybersecurity Services, and cannot be purchased separately. Further, non-professional labor categories shall be offered under SIN ANCILLARY only.**

**\*\*\*\*NOTE: Labor categories under the Special Item Number 54151S Information Technology Professional Services may remain under SIN 54151S unless the labor categories are specific to the Highly Adaptive Cybersecurity Services SINs.**

**Vendor suitability for offering services through the Highly Adaptive Cybersecurity Services (HACS) SINs must be in accordance with the following laws and standards when applicable to the specific task orders, including but not limited to:**

- Federal Acquisition Regulation (FAR) Part 52.204-21
- OMB Memorandum M-06-19 - Reporting Incidents Involving Personally Identifiable Information and Incorporating the Cost for Security in Agency Information Technology Investments
- OMB Memorandum M -07-16 - Safeguarding Against and Responding to the Breach of Personally Identifiable Information
- OMB Memorandum M-16-03 - Fiscal Year 2015-2016 Guidance on Federal Information Security and Privacy Management Requirements
- OMB Memorandum M-16-04 – Cybersecurity Implementation Plan (CSIP) for Federal Civilian Government
- The Cybersecurity National Action Plan (CNAP)
- NIST SP 800-14 - Generally Accepted Principles and Practices for Securing Information Technology Systems
- NIST SP 800-27A - Engineering Principles for Information Technology Security (A Baseline for Achieving Security)
- NIST SP 800-30 - Guide for Conducting Risk Assessments
- NIST SP 800-35 - Guide to Information Technology Security Services
- NIST SP 800-37 - Guide for Applying the Risk Management Framework to Federal Information Systems: A Security Life Cycle Approach
- NIST SP 800-39 - Managing Information Security Risk: Organization, Mission, and Information System View
- NIST SP 800-44 - Guidelines on Securing Public Web Servers
- NIST SP 800-48 - Guide to Securing Legacy IEEE 802.11 Wireless Networks

- NIST SP 800-137 - Information Security Continuous Monitoring (ISCM) for Federal Information Systems and Organizations
- NIST SP 800-153 - Guidelines for Securing Wireless Local Area Networks (WLANs)

- NIST SP 800-171 - Protecting Controlled Unclassified Information in non-federal Information Systems and Organizations

## 1. SCOPE

- a. The labor categories, prices, terms and conditions stated under Special Item Number 54151HACS High Adaptive Cybersecurity Services apply exclusively to High Adaptive Cybersecurity Services within the scope of this Information Technology Schedule.
- b. Services under these SINs are limited to Highly Adaptive Cybersecurity Services only. Software and hardware products are under different Special Item Numbers on the MAS (e.g. 511210, 511210, 33411), and may be quoted along with services to provide a total solution.
- c. These SINs provide ordering activities with access to Highly Adaptive Cybersecurity services only.
- d. Highly Adaptive Cybersecurity Services provided under these SINs shall comply with all Cybersecurity certifications and industry standards as applicable pertaining to the type of services as specified by ordering agency.
- e. The Contractor shall provide services at the Contractor's facility and/or at the ordering activity location, as agreed to by the Contractor and the ordering activity.

## 2. ORDER

- a. Agencies may use written orders, Electronic Data Interchange (EDI) orders, Blanket Purchase Agreements, individual purchase orders, or task orders for ordering services under this contract. Blanket Purchase Agreements shall not extend beyond the end of the contract period; all services and delivery shall be made and the contract terms and conditions shall continue in effect until the completion of the order. Orders for tasks which extend beyond the fiscal year for which funds are available shall include FAR 52.232-19 (Deviation – May 2003) Availability of Funds for the Next Fiscal Year. The purchase order shall specify the availability of funds and the period for which funds are available.
- b. All task orders are subject to the terms and conditions of the contract. In the event of conflict between a task order and the contract, the contract will take precedence.

## 3. PERFORMANCE OF SERVICES

- a. The Contractor shall commence performance of services on the date agreed to by the Contractor and the ordering activity. All Contracts will be fully funded.
- b. The Contractor agrees to render services during normal working hours, unless otherwise agreed to by the Contractor and the ordering activity.
- c. The ordering activity should include the criteria for satisfactory completion for each task in the Statement of Work or Delivery Order. Services shall be completed in a good and workmanlike manner.
- d. Any Contractor travel required in the performance of Highly Adaptive Cybersecurity Services must comply with the Federal Travel Regulation or Joint Travel Regulations, as applicable, in effect on the date(s) the travel is performed. Established Federal Government per diem rates will apply to all Contractor travel. Contractors cannot use GSA city pair contracts. All travel will be agreed upon with the client prior to the Contractor's travel.

**4. INSPECTION OF SERVICES**

Inspection of services is in accordance with 552.212-4 - CONTRACT TERMS AND CONDITIONS – COMMERCIAL ITEMS (MAY 2015) (ALTERNATE II – JUL 2009) (FAR DEVIATION – JUL 2015) (TAILORED) for Firm-Fixed Price and Time-and-Materials and Labor-Hour Contracts orders placed under this contract.

**5. RESPONSIBILITIES OF THE CONTRACTOR**

The Contractor shall comply with all laws, ordinances, and regulations (Federal, State, City, or otherwise) covering work of this character. If the end product of a task order is software, then FAR 52.227-14 (MAY 2014) Rights in Data – General, may apply.

The Contractor shall comply with contract clause (52.204-21) to the Federal Acquisition Regulation (FAR) for the basic safeguarding of contractor information systems that process, store, or transmit Federal data received by the contract in performance of the contract. This includes contract documents and all information generated in the performance of the contract.

**6. RESPONSIBILITIES OF THE ORDERING ACTIVITY**

Subject to the ordering activity's security regulations, the ordering activity shall permit Contractor access to all facilities necessary to perform the requisite Highly Adaptive Cybersecurity Services.

**7. INDEPENDENT CONTRACTOR**

All Highly Adaptive Cybersecurity Services performed by the Contractor under the terms of this contract shall be as an independent Contractor, and not as an agent or employee of the ordering activity.

**8. ORGANIZATIONAL CONFLICTS OF INTEREST****a. Definitions.**

“Contractor” means the person, firm, unincorporated association, joint venture, partnership, or corporation that is a party to this contract.

“Contractor and its affiliates” and “Contractor or its affiliates” refers to the Contractor, its chief executives, directors, officers, subsidiaries, affiliates, subcontractors at any tier, and consultants and any joint venture involving the Contractor, any entity into or with which the Contractor subsequently merges or affiliates, or any other successor or assignee of the Contractor.

An “Organizational conflict of interest” exists when the nature of the work to be performed under a proposed ordering activity contract, without some restriction on ordering activities by the Contractor and its affiliates, may either (i) result in an unfair competitive advantage to the Contractor or its affiliates or (ii) impair the Contractor's or its affiliates' objectivity in performing contract work.

**b. To avoid an organizational or financial conflict of interest and to avoid prejudicing the best interests of the ordering activity, ordering activities may place restrictions on the Contractors, its affiliates, chief executives, directors, subsidiaries and subcontractors at any tier when placing orders against schedule contracts. Such restrictions shall be consistent with FAR 9.505 and shall be designed to avoid, neutralize, or mitigate organizational conflicts of interest that might otherwise exist in situations related to individual orders placed against the schedule contract. Examples of situations, which may require restrictions, are provided at FAR 9.508.**

**9. INVOICES**

The Contractor, upon completion of the work ordered, shall submit invoices for Highly Adaptive Cybersecurity Services. Progress payments may be authorized by the ordering activity on individual orders if appropriate. Progress payments shall be based upon completion of defined milestones or interim products. Invoices shall be submitted monthly for recurring services performed during the preceding month.

**10. RESUMES**

Resumes shall be provided to the GSA Contracting Officer or the user ordering activity upon request.

**11. APPROVAL OF SUBCONTRACTS**

The ordering activity may require that the Contractor receive, from the ordering activity's Contracting Officer, written consent before placing any subcontract for furnishing any of the work called for in a task order.

**12. DESCRIPTION OF HIGHLY ADAPTIVE CYBERSECURITY SERVICES AND PRICING**

The labor category descriptions start on page 77 and the approved GSA rates are on page 217.

**Terms and Conditions Applicable to Purchase of Information Technology Training for  
General Purpose Commercial Information Technology Equipment and Software  
(Special Item Number 611420)**

**1. SCOPE**

- a. The Contractor shall provide Information Technology Training normally available to commercial customers, which will permit ordering activity users to make full, efficient use of general purpose commercial IT products. Training is restricted to Information Technology Training for those products within the scope of this solicitation.
- b. The Contractor shall provide training at the Contractor's facility and/or at the ordering activity's location, as agreed to by the Contractor and the ordering activity.

**2. ORDER**

Written orders, EDI orders (GSA Advantage! and FACNET), credit card orders, and orders placed under blanket purchase agreements (BPAs) shall be the basis for the purchase of Information Technology Training in accordance with the terms of this contract. Orders shall include the student's name, course title, course date and time, and contracted dollar amount of the course.

**3. TIME OF DELIVERY**

The Contractor shall conduct training on the date (time, day, month, and year) agreed to by the Contractor and the ordering activity.

**4. CANCELLATION AND RESCHEDULING**

- a. The ordering activity will notify the Contractor at least seventy-two (72) hours before the scheduled training date, if a student will be unable to attend. The Contractor will then permit the ordering activity to either cancel the order or reschedule the training at no additional charge. In the event the training class is rescheduled, the ordering activity will modify its original training order to specify the time and date of the rescheduled training class.
- b. In the event the ordering activity fails to cancel or reschedule a training course within the time frame specified in paragraph a, above, the ordering activity will be liable for the contracted dollar amount of the training course. The Contractor agrees to permit the ordering activity to reschedule a student who fails to attend a training class within ninety (90) days from the original course date, at no additional charge.
- c. The ordering activity reserves the right to substitute one student for another up to the first day of class.
- d. In the event the Contractor is unable to conduct training on the date agreed to by the Contractor and the ordering activity, the Contractor must notify the ordering activity at least seventy-two (72) hours before the scheduled training date.

**5. FOLLOW-UP SUPPORT**

The Contractor agrees to provide each student with unlimited telephone support or online support for a period of one (1) year from the completion of the training course. During this period, the student may contact the Contractor's instructors for refresher assistance and answers to related course curriculum questions.

**6. PRICE FOR TRAINING**

The price that the ordering activity will be charged will be the ordering activity training price in effect at the time of order placement, or the ordering activity price in effect at the time the training course is conducted, whichever is less.

**7. INVOICES AND PAYMENT**

Invoices for training shall be submitted by the Contractor after ordering activity completion of the training course. Charges for training must be paid in arrears (31 U.S.C. 3324). PROMPT PAYMENT DISCOUNT, IF APPLICABLE, SHALL BE SHOWN ON THE INVOICE.

**8. FORMAT AND CONTENT OF TRAINING**

- a. The Contractor shall provide written materials (i.e., manuals, handbooks, texts, etc.) normally provided with course offerings, printed and copied two-sided on paper containing 30% postconsumer materials (fiber). Such documentation will become the property of the student upon completion of the training class.
- b. **\*\*If applicable\*\*** For hands-on Information Technology Training, there must be a one-to-one assignment of IT equipment to students.
- c. The Contractor shall provide each student with a Certificate of Training at the completion of each training course.
- d. The Contractor shall provide the following information for each training course offered:
  - (1) The course title and a brief description of the course content, to include the course format (e.g., lecture, discussion, hands-on training);
  - (2) The length of the course;
  - (3) Mandatory and desirable prerequisites for student enrollment;
  - (4) The minimum and maximum number of students per class;
  - (5) The locations where the course is offered;
  - (6) Class schedules; and
  - (7) Price (per student, per class (if applicable)).
- e. For those courses conducted at the ordering activity's location, instructor travel charges (if applicable), including mileage and daily living expenses (e.g., per diem charges) are governed by Pub. L. 99-234 and FAR Part 31.205-46, and are reimbursable by the ordering activity on orders placed under the Multiple Award Schedule, as applicable, in effect on the date(s) the travel is performed. Contractors cannot use GSA city pair contracts. The Industrial Funding Fee does NOT apply to travel and per diem charges.
- f. For Online Information Technology Training, the Contractor shall make every effort to provide a copy of the training material for electronic download, however, due to the fact that the training material contains Contractor proprietary data, not all training material will be available for electronic download. The Contractor will provide access to the course materials electronically for all online training.

**9. TRAINING MATERIALS**

- a. The training materials constitute Contractor Proprietary Information and content. The materials are copyright © 2008 Windows CNO training; copyright © 2019 Linux CNO training; copyright © 2015 ARM Assembly; copyright © 2018 Android Programming; and copyright © 2019 Android Internals. ManTech International Corporation. All Rights Reserved. Copyright law prohibits unauthorized copying of copyrighted materials. The ordering agency acknowledges that students that take the training shall not make or use any unauthorized copies of software or copyrighted material or other materials (whether electronic or hard copy) in violation of license and copyright restrictions.

- b. Title to all documents and materials furnished to the ordering agency students for use in connection with the training shall remain with the Contractor. Ordering agency students shall not disclose such documents or materials to any person, firm, or corporation.
- c. The training material constitute Contractor trade secrets which shall not be disclosed to anyone outside the Contractor without Contractor's prior written consent. Nor will any students make use of any Contractor trade secrets for their own purposes or the benefit of anyone other than the Contractor without the Contractor's prior written consent.
- d. The training materials are Contractor Proprietary Information and ordering agency students shall:
  - (a) protect the confidentiality of the Proprietary Information from disclosure;
  - (b) not use or disclose the Proprietary Information, or any part thereof; and
  - (c) not distribute or disclose the Proprietary Information to any third party, including but not limited to colleagues, employers, family, and friends, without obtaining Contractor's prior written consent. Ordering agency students agrees not to copy, reproduce, and/or reduce to writing any part of the Proprietary Information, except only as necessary for the training course, and all such copies, reproductions and/or reductions to writing shall be and remain the property of Contractor. Ordering agency students shall not reverse engineer or decompile any prototypes, software or other intangible objects that embody or reflect the Proprietary Information.

## 10. TRAINING COURSE DESCRIPTION AND PRICING

## WINDOWS CNO PROGRAMMER SYLLABUS

The *Windows Computer Network Operations Programmer* course is an intensive, hands-on course focused on providing a programmer with the skills and knowledge needed to become an advanced CNO programmer, with emphasis in the Windows environment. The class format combines both lecture and labs for practical application of knowledge, including two labs that function as culminating exercises.

### LEARNING OUTCOME

After the completion of the three modules, the student will be capable of assisting in the CNO tool development lifecycle. The student will understand the tool objectives, environments, obstacles and pitfalls associated with development, as well as strategies to meet objectives effectively and efficiently.

### COURSE OUTLINE

The course contains the following modules:

#### Core Module

- Python (3 Days)
- Networks (5 Days)
- Assembly (3 Days)
- Software Reverse Engineering (5 Days)
- Core Crucible (1 Day)

#### User Mode Development Module

- Windows System Programming (4 Days)
- Windows Internals (4 Days)
- CNO User Mode Development (5 Days)
- Vulnerability Research and Exploitation (5 Days)
- User Mode Crucible (2 Days)

#### Kernel Mode Development Module

- Kernel Internals (5 Days)
- CNO Kernel Mode Development (3 Days)

### PREREQUISITE(S)

Students should have a Bachelor's degree in Computer Science or Computer Engineering, or equivalent experience. Students should also possess high academic achievement or operational/technical experience and an intense desire to learn. This course requires previous programming experience in C. Student should possess experience in Windows Programming and IA-32 assembly.

### ENROLLMENT

Submit student enrollment requests to [ACTP@ManTech.com](mailto:ACTP@ManTech.com). The training administrator will expedite your request and payment requirements. Please contact [ACTP@ManTech.com](mailto:ACTP@ManTech.com) with any questions.

### TUITION

Modular and weekly enrollments are offered based on seat availability. Online and remote enrollments are also available upon request.

GSA Tuition Price for the course, which includes all course material is:

- 1-4 Students: \$25,390.43/per student

- 5-8 Students: \$25,125.94/per student
- 9-11 Students: \$24,861.46/per student
- More than 12 Students: \$24,596.98/per student

**COURSE LENGTH**

The entire course is approximately 45 days in length.

We also offer modular enrollment, based on seat availability (please see pricing below).

<b>WINDOWS CNO CORE (17 DAYS)</b>		
Python	3 Days	The Python class is an introduction to the Python programming language with an emphasis on tools and techniques that are useful for CNO tasks such as test development and vulnerability research.
Networks	5 Days	The Networks class is a practical exploration of IPv4 and IPv6 networks and sockets programming.
Assembly	3 Days	The Assembly class covers the x86 (IA-32) and x86-64 (AMD64) assembly languages.
Software Reverse Engineering	5 Days	The Software Reverse Engineering class introduces tools and techniques for analyzing x86 and x86-64 executable files.
Core Crucible	1 Day	In the Core Crucible, students work in teams to analyze and exploit a botnet.
<ul style="list-style-type: none"> <li>• 1-4 Students: \$10,852.59/per student</li> <li>• 5-8 Students: \$10,739.55/per student</li> <li>• 9-11 Students: \$10,626.50/per student</li> <li>• More than 12 Students: \$10,513.45/per student</li> </ul>		

<b>WINDOWS USER MODE DEVELOPMENT (20 DAYS)</b>		
Windows Systems Programming	4 Days	The Windows Systems Programming class introduces Windows development tools and the Win32 API.
Windows Internals	4 Days	Windows Internals moves beyond the Win32 API introduced in the previous class to describe the advanced

		Windows operating system concepts used to implement it.
Windows CNO User Mode Development	5 Days	Building on the material from the preceding classes, the CNO User Mode Development class provides instruction on fundamental techniques and best practices for CNO tool development.
Windows Vulnerability Research and Exploitation	5 Days	Students in the Vulnerability Research and Exploitation class learn how to analyze and exploit vulnerabilities in software.
Windows User Mode Crucible	2 Days	In the User Mode Crucible, students work in teams to analyze and exploit a vulnerable network service.
<ul style="list-style-type: none"> <li>• 1-4 Students: \$12,767.76/per student</li> <li>• 5-8 Students: \$12,634.76/per student</li> <li>• 9-11 Students: \$12,501.76/per student</li> <li>• More than 12 Students: \$12,368.77/per student</li> </ul>		

<b>WINDOWS KERNEL MODE DEVELOPMENT (8 DAYS)</b>		
Windows Kernel Internals	5 Days	The Kernel Internals class expands on the user mode content to introduce students to the Windows Kernel architecture and fundamentals of driver development.
Windows CNO Kernel Mode Development	3 Days	The CNO Kernel Mode Development class builds on the previous class to introduce techniques useful for Windows Kernel CNO.
<ul style="list-style-type: none"> <li>• 1-4 Students: \$6,383.88/per student</li> <li>• 5-8 Students: \$6,317.38/per student</li> <li>• 9-11 Students: \$6,250.88/per student</li> <li>• More than 12 Students: \$6,184.38/per student</li> </ul>		

**INSTRUCTORS**

Our instructors are members of an elite group of cyber professionals and have been chosen for their technical knowledge, industry experience, and facilitation skills. Instructors are rotated between the classroom and contract positions to ensure their skills are current and operationally relevant.

### **TRAINING FACILITIES**

We have training facilities in Hanover, Maryland, Jessup, Maryland and San Antonio, Texas. Our VTC and Virtual Instructor-Led Training are available as well as on-site training.

### **CLASS SIZE**

Minimum class size is six (6). Two instructors will be provided for class sizes exceeding ten students.

### **GRADING**

Each class features one or more quizzes and a final exam. An average exam score of 80% is a passing grade. Students who complete all 10 graded classes, with an 80% average or better, are recognized as ManTech Certified Advanced Cyber Programmers (CACPs), and receive certification. Students who achieve a 95% or higher receive honors. Students that do not receive a certifying grade will receive certificates of attendance, or graduation.

## INTRODUCTION TO ANDROID PROGRAMMING

### Course Description

The Android Programming course is a unique course offering students the ability to explore the Android operating system. This lab-driven class exposes students to the entire OS API, covering everything from development of Android applications using the SDK and Android Studio to how these APIs map to native libraries, the Linux kernel, and Android specific kernel components. There is also a heavy emphasis on security at each level covered, including features and developments from the latest releases of Android.

### PREREQUISITE(S)

Students should have a Bachelor's degree in Computer Science or Computer Engineering, or equivalent experience. Students should also possess high academic achievement or operational/technical experience and an intense desire to learn. This course assumes basic knowledge of Java and C programming.

### COURSE DETAILS

- 5 days
- 19 Labs
- 3 quizzes, 1 practical exam
- Android devices and development environment is provided

### ENROLLMENT

Submit student enrollment requests to [ACTP@ManTech.com](mailto:ACTP@ManTech.com). The training administrator will expedite your request and payment requirements. At this time, enrollment is limited to ManTech employees and government employees. Please contact [ACTP@ManTech.com](mailto:ACTP@ManTech.com) with any questions.

### TUITION

GSA Tuition Price for the course, which includes all course material is:

- 1-4 Students: \$3,191.94/per student
- 5-8 Students: \$3,158.69/per student
- 9-11 Students: \$3,125.44/per student
- More than 12 Students: \$3,092.19/per student

### INSTRUCTORS

Our instructors are members of an elite group of cyber professionals and have been chosen for their technical knowledge, industry experience, and facilitation skills. Instructors who understand the real challenges facing programmers because they perform the work professionally every day.

### CLASS SIZE

Maximum class size is sixteen students. Minimum class size is eight students. An assistant instructor will be provided for class sizes exceeding eight students.

### TRAINING FACILITY

We have training facilities in Hanover, Maryland, Jessup, Maryland and San Antonio, Texas. Our VTC and Virtual Instructor Led Training are available as well as on-site training.

**GRADING**

This class features one or more quizzes and a final exam. An exam score of 80% is a passing grade. Students who complete the course with an 80% or better are awarded a certificate acknowledging successful completion of the course. Students that do not receive a certifying grade will receive certificates of attendance.

**Agenda and Course Content****Day 1:**

- Understand the overall Android architecture
- Explore the Android Open Source Project (AOSP) and learn about it's structure
- Learn to use the Android Debugging Bridge (ADB) to install APKs, push and pull files from a device, view logs, and gain shell access
- Learn about the various Android device modes and what they are used for
- Use Android Studio to build applications
- Understand the structure and lifecycle Android applications
- Explore the use of Application Manifests and how they relate to intents and permissions
- Understand the various states of a process (foreground, visible, cached, etc.)
- Understand what rooting is and why you might want to root a device
- Discuss bootloaders (locked and unlocked) and how they relate to the security of a device
- Understand the Android file system by finding where applications, shared libraries, media content and other core files are stored on the device
- Learn about the steps an Android device takes to boot
- Root and flash your phone

**Day 2:**

- Learn about the activity lifecycle
- Gain hands on experience using explicit and implicit intents as well as intent filters
- Use the application manager utility to send various kinds of intents
- Implement Foreground and Background services
- Explore the service lifecycle
- Send and receive broadcast intents
- Learn about the various Android permissions and how they are granted
- Android Services: development, types, AIDL interface language
- Implement applications that use explicit and implicit intents

**Day 3:**

- Understand the nature of Android Content Providers and their role in application development
- Understand what Framework Services are and their role
- Learn about the Binder driver – functionality, implementation
- Interact with various sensors on the device
- Understand how to access sensor services on the device
- Write an application using Android JNI
- Native Code and Native Development Kit (NDK) introduction

**Day 4:**

- Android Native Sensors
- Android Native Service development

- Cross-compilation process
- Android Native to Java Communication Models
- Understand how a call from an application flows down to the hardware
- Learn about the various types of hardware abstraction layers (HAL) throughout the versions
- Understand how the init initializes the Android operating system

**Day 5:**

- In-depth Practical. This includes completing various tasks that cover concepts taught throughout the course. Some tasks are standalone, and others require you to complete a previous task before being able to complete the next one.

## INTRODUCTION TO THE ANDROID INTERNALS COURSE

### COURSE DESCRIPTION

The Android Internals course builds on the foundation established in the Android Programming course. This course dives deeper into the Android operating system to explore concepts such as the internals of APKs, Package Manager, Activity Manager, Zygote, Android Services and other core components of Android. Students will have a strong understanding of the Android Radio Interface layer. They will know how to hide phone calls, send hidden text messages, alter text messages, etc. Students will be able to describe how Wi-Fi works on Android, and how network technology preference works (Wi-Fi over Cellular). Students will also learn about security on Android and be able to determine which security mechanism is stopping a particular action from occurring.

### PREREQUISITE(S)

Students should have a Bachelor's degree in Computer Science or Computer Engineering, or equivalent experience. Students should also possess high academic achievement or operational/technical experience and an intense desire to learn. This course assumes basic knowledge of Java and C programming.

### WHO SHOULD ATTEND

- Developers and researchers looking to learn how to write code for mobile platforms.
- Android developers looking to write more secure code
- Security researchers looking to gain insight into the Android OS architecture.

### COURSE DETAILS

- 5 days
- 19 Labs
- 3 quizzes, 1 practical exam
- Android devices and development environment is provided

### ENROLLMENT

Submit student enrollment requests to [ACTP@ManTech.com](mailto:ACTP@ManTech.com). The training administrator will expedite your request and payment requirements. At this time, enrollment is limited to ManTech employees and government employees. Please contact [ACTP@ManTech.com](mailto:ACTP@ManTech.com) with any questions.

### TUITION

GSA Tuition Price for the course, which includes all course material is:

- 1-4 Students: \$3,191.94/per student
- 5-8 Students: \$3,158.69/per student
- 9-11 Students: \$3,125.44/per student
- More than 12 Students: \$3,092.19/per student

### INSTRUCTORS

Our instructors are members of an elite group of cyber professionals and have been chosen for their technical knowledge, industry experience, and facilitation skills. Instructors who understand the real challenges facing programmers because they perform the work professionally every day.

### TRAINING FACILITIES

We have training facilities in Hanover, Maryland, Jessup, Maryland and San Antonio, Texas. Our VTC and Virtual Instructor Led Training are available as well as on-site training.

**CLASS SIZE**

Minimum class size is six (6). Two instructors will be provided for class sizes exceeding ten students.

**GRADING**

Quizzes and Labs are administered as knowledge checks during the course regularly. Class culminates a final exam.

**COURSE CONTENT**

## Day 1:

- Explore the various partitions of an Android device
- Understand each phase of the boot process for Android
- Learn about the role that Verified boot plays in protecting Android devices
- Learn about A/B slots
- Understand the changes that came from project Treble in Android 8.0
- Analyze the init script in Android to understand how it initializes the OS
- Learn about the various daemons that init starts and what their roles are
- Learn about the various stages of init (i.e. first, second, early-init, init, late-init etc)
- Understand the role that Properties plays in configuring and initializing Android
- Students will be able to freely navigate, build, and deploy Android builds from source
- Students will be able to dump the device's bootloaders and understand the different stages of verified boot in Android
- Students will learn how to redirect files that are mounted on a read only filesystem

## Day 2:

- Understand the crucial role Zygote plays in initializing apps
- Explore the differences between the Dalvik VM and ART
- Write a program to communicate directly with Zygote to spawn a new process
- Understand the relationship between System Server and Service Manager
- Understand and describe how the core services are laid out, and what functionality is provided by which service
- Understand how services are managed and located
- Learn about the internals of the APK structure
- Learn about .dex, .odex, .art files
- Understand the various ways to sign an APK and the security implications of each one

## Day 3:

- Decompile APKs
- Reverse engineering APKs
- Learn about smali and baksmali
- Understand each step of installing an APK to an Android device
- Be able to manually create Java applications outside of the Android Framework
- Understand the Package Manager and its role
- Know how to interact with the Activity Manager via native code
- Understand the internals of Binder
- Use Binder using native code
- Understand exploit vulnerabilities from cross-app permission use

## Day 4:

- Learn the Android Bluetooth Stack
- Covertly communicate over Bluetooth with other devices

- Learn how Android communicates with the baseband on the device
- Understand how vendors provide proprietary libraries to implement the radio interface layer
- Students will have a strong understanding of the Android Radio Interface layer. They will know how to hide phone calls, send hidden text messages, fake text messages, alter text messages etc
- Learn about the various Wi-Fi protocols and what a Wi-Fi looks like
- Learn about the various Wi-Fi technologies supported by Android (Wi-fi direct, Wi-Fi aware etc)

## Day 5:

- Learn about the many security mechanisms added to Android from 1.5 up to current
- Learn about DAC vs MAC
- Understand how Android leverages users and groups in Linux to enforce access control and sandboxing
- Understand the role SELinux plays in securing Android devices
- Understand the role capabilities plays in securing Android devices
- Understand how permissions at the application manifest level are enforced in the kernel
- Explore the role of seccomp

**LINUX CNO PROGRAMMER COURSE**

The *Linux Computer Network Operations Programmer* course is an intensive, hands-on course focused on providing a programmer with the skills and knowledge needed to become an advanced CNO programmer, with emphasis in the Linux environment. The class format combines both lecture and labs for practical application of knowledge, including two labs that function as culminating exercises.

**LEARNING OUTCOME**

After the completion of the three modules, the student will be capable of assisting in the CNO tool development lifecycle. The student will understand the tool objectives, environments, obstacles and pitfalls associated with development, as well as strategies to meet objectives effectively and efficiently.

**COURSE OUTLINE**

The course contains the following modules:

We also offer modular enrollment, based on seat availability (please see pricing below).

CNO CORE (17 DAYS)		
Python	3 Days	The Python class is an introduction to the Python programming language with an emphasis on tools and techniques that are useful for CNO tasks such as test development and vulnerability research.
Networks	5 Days	The Networks class is a practical exploration of IPv4 and IPv6 networks and sockets programming.
Assembly	3 Days	The Assembly class covers the x86 (IA-32) and x86-64 (AMD64) assembly languages.
Software Reverse Engineering	5 Days	The Software Reverse Engineering class introduces tools and techniques for analyzing x86 and x86-64 executable files.
Core Crucible	1 Day	In the Core Crucible, students work in teams to analyze and exploit a botnet.
<ul style="list-style-type: none"> <li>• 1-4 Students: \$10,852.59/per student</li> <li>• 5-8 Students: \$10,739.55/per student</li> <li>• 9-11 Students: \$10,626.50/per student</li> <li>• More than 12 Students: \$10,513.45/per student</li> </ul>		

LINUX USER MODE DEVELOPMENT (20 DAYS)		
Linux Systems Programming	4 Days	The Linux Systems Programming class introduces Linux development tools and the POSIX and Linux APIs.
Linux Internals	4 Days	Linux Internals delves further into Linux with advanced uses of the POSIX API, C library internals, parsing and manipulation of ELF files, and Linux-specific system calls.

Linux CNO User Mode Development	5 Days	Building on the material from the preceding classes, the CNO User Mode Development class provides instruction on fundamental techniques and best practices for CNO tool development
Linux Vulnerability Research and Exploitation	5 Days	Students in the Vulnerability Research and Exploitation class learn how to analyze and exploit vulnerabilities in software.
Linux User Mode Crucible	2 Days	In the User Mode Crucible, students work in teams to analyze and exploit a vulnerable network service.
<ul style="list-style-type: none"> <li>• 1-4 Students: \$13,541.56/per student</li> <li>• 5-8 Students: \$13,400.50/per student</li> <li>• 9-11 Students: \$13,259.45/per student</li> <li>• More than 12 Students: \$13,118.39/per student</li> </ul>		

LINUX KERNEL MODE DEVELOPMENT (8 DAYS)		
Linux Kernel Internals	5 Days	The Kernel Internals class introduces students to the major subsystems, configuration and compilation, and module/driver development for the Linux kernel.
Linux CNO Kernel Mode Development	3 Days	The CNO Kernel Mode Development class builds on the previous class to introduce techniques useful for Linux Kernel CNO
<ul style="list-style-type: none"> <li>• 1-4 Students: \$6,770.78/per student</li> <li>• 5-8 Students: \$6,700.25/per student</li> <li>• 9-11 Students: \$6,629.72/per student</li> <li>• More than 12 Students: \$6,559.19/per student</li> </ul>		

**PREREQUISITE(S)**

Students should have a Bachelor’s degree in Computer Science or Computer Engineering, or equivalent experience. Students should also possess high academic achievement or operational/technical experience and an intense desire to learn. This course requires previous programming experience in C. Student should possess experience in Linux Programming and x84\_64 assembly.

**ENROLLMENT**

Submit student enrollment requests to [ACTP@ManTech.com](mailto:ACTP@ManTech.com). The training administrator will expedite your request and payment requirements. Please contact [ACTP@ManTech.com](mailto:ACTP@ManTech.com) with any questions.

**TUITION**

Modular and weekly enrollments are offered based on seat availability. Online and remote enrollments are also available upon request.

GSA Tuition Price for the course, which includes all course material is:

- 1-4 Students: \$31,164.94/per student

- 5-8 Students: \$30,840.30/per student
- 9-11 Students: \$30,515.67/per student
- More than 12 Students: \$30,191.03/per student

**COURSE LENGTH**

The entire course is approximately 45 days in length.

**INSTRUCTORS**

Our instructors are members of an elite group of cyber professionals and have been chosen for their technical knowledge, industry experience, and facilitation skills. Instructors are rotated between the classroom and contract positions to ensure their skills are current and operationally relevant.

**TRAINING FACILITIES**

We have training facilities in Hanover, Maryland, Jessup, Maryland and San Antonio, Texas. Our VTC and Virtual Instructor-Led Training are available as well as on-site training.

**CLASS SIZE**

Minimum class size is six (6). Two instructors will be provided for class sizes exceeding ten students.

**GRADING**

Each class features one or more quizzes and a final exam. An average exam score of 80% is a passing grade. Students who complete all 10 graded classes, with an 80% average or better, are recognized as ManTech Certified Advanced Cyber Programmers (CACPs), and receive certification. Students who achieve a 95% or higher receive honors. Students that do not receive a certifying grade will receive certificates of attendance, or graduation.

**Terms and Conditions Applicable to Information Technology (IT) Professional Services  
(Special Item Number 54151S)**

*NOTE: All non-professional labor categories must be incidental to, and used solely to support professional services, and cannot be purchased separately.*

**1. SCOPE**

- a. The prices, terms and conditions stated under Special Item Number 54151S Information Technology Professional Services apply exclusively to IT Professional Services within the scope of this Information Technology Schedule.
- b. The Contractor shall provide services at the Contractor's facility and/or at the ordering activity location, as agreed to by the Contractor and the ordering activity.

**2. PERFORMANCE INCENTIVES I-FSS-60 Performance Incentives (April 2000)**

- a. Performance incentives may be agreed upon between the Contractor and the ordering activity on individual fixed price orders or Blanket Purchase Agreements under this contract.
- b. The ordering activity must establish a maximum performance incentive price for these services and/or total solutions on individual orders or Blanket Purchase Agreements.
- c. Incentives should be designed to relate results achieved by the contractor to specified targets. To the maximum extent practicable, ordering activities shall consider establishing incentives where performance is critical to the ordering activity's mission and incentives are likely to motivate the contractor. Incentives shall be based on objectively measurable tasks.

**3. ORDER**

- a. Agencies may use written orders, EDI orders, blanket purchase agreements, individual purchase orders, or task orders for ordering services under this contract. Blanket Purchase Agreements shall not extend beyond the end of the contract period; all services and delivery shall be made and the contract terms and conditions shall continue in effect until the completion of the order. Orders for tasks which extend beyond the fiscal year for which funds are available shall include FAR 52.232-19 (Deviation – May 2003) Availability of Funds for the Next Fiscal Year. The purchase order shall specify the availability of funds and the period for which funds are available.
- b. All task orders are subject to the terms and conditions of the contract. In the event of conflict between a task order and the contract, the contract will take precedence.

**4. PERFORMANCE OF SERVICES**

- a. The Contractor shall commence performance of services on the date agreed to by the Contractor and the ordering activity.
- b. The Contractor agrees to render services only during normal working hours, unless otherwise agreed to by the Contractor and the ordering activity.
- c. The ordering activity should include the criteria for satisfactory completion for each task in the Statement of Work or Delivery Order. Services shall be completed in a good and workmanlike manner.
- d. Any Contractor travel required in the performance of IT Services must comply with the Federal Travel Regulation or Joint Travel Regulations, as applicable, in effect on the

date(s) the travel is performed. Established Federal Government per diem rates will apply to all Contractor travel. Contractors cannot use GSA city pair contracts.

#### **5. STOP-WORK ORDER (FAR 52.242-15) (AUG 1989)**

- (a) The Contracting Officer may, at any time, by written order to the Contractor, require the Contractor to stop all, or any part, of the work called for by this contract for a period of 90 days after the order is delivered to the Contractor, and for any further period to which the parties may agree. The order shall be specifically identified as a stop-work order issued under this clause. Upon receipt of the order, the Contractor shall immediately comply with its terms and take all reasonable steps to minimize the incurrence of costs allocable to the work covered by the order during the period of work stoppage. Within a period of 90 days after a stop-work is delivered to the Contractor, or within any extension of that period to which the parties shall have agreed, the Contracting Officer shall either:
  - (1) Cancel the stop-work order; or
  - (2) Terminate the work covered by the order as provided in the Default, or the Termination for Convenience of the Government, clause of this contract.
- (b) If a stop-work order issued under this clause is canceled or the period of the order or any extension thereof expires, the Contractor shall resume work. The Contracting Officer shall make an equitable adjustment in the delivery schedule or contract price, or both, and the contract shall be modified, in writing, accordingly, if:
  - (1) The stop-work order results in an increase in the time required for, or in the Contractor's cost properly allocable to, the performance of any part of this contract; and
  - (2) The Contractor asserts its right to the adjustment within 30 days after the end of the period of work stoppage; provided, that, if the Contracting Officer decides the facts justify the action, the Contracting Officer may receive and act upon the claim submitted at any time before final payment under this contract.
- (c) If a stop-work order is not canceled and the work covered by the order is terminated for the convenience of the Government, the Contracting Officer shall allow reasonable costs resulting from the stop-work order in arriving at the termination settlement.
- (d) If a stop-work order is not canceled and the work covered by the order is terminated for default, the Contracting Officer shall allow, by equitable adjustment or otherwise, reasonable costs resulting from the stop-work order.

#### **6. INSPECTION OF SERVICES**

In accordance with FAR 52.212-4 CONTRACT TERMS AND CONDITIONS--COMMERCIAL ITEMS (MAR 2009) (DEVIATION I - FEB 2007) for Firm-Fixed Price orders and FAR 52.212-4 CONTRACT TERMS AND CONDITIONS --COMMERCIAL ITEMS (MAR 2009) (ALTERNATE I – OCT 2008) (DEVIATION I – FEB 2007) applies to Time-and-Materials and Labor-Hour Contracts orders placed under this contract.

#### **7. RESPONSIBILITIES OF THE CONTRACTOR**

The Contractor shall comply with all laws, ordinances, and regulations (Federal, State, City, or otherwise) covering work of this character. If the end product of a task order is software, then FAR 52.227-14 (Dec 2007) Rights in Data – General, may apply.

#### **8. RESPONSIBILITIES OF THE ORDERING ACTIVITY**

Subject to security regulations, the ordering activity shall permit Contractor access to all facilities necessary to perform the requisite IT Professional Services.

**9. INDEPENDENT CONTRACTOR**

All IT Professional Services performed by the Contractor under the terms of this contract shall be as an independent Contractor, and not as an agent or employee of the ordering activity.

**10. ORGANIZATIONAL CONFLICTS OF INTEREST****a. Definitions.**

“Contractor” means the person, firm, unincorporated association, joint venture, partnership, or corporation that is a party to this contract.

“Contractor and its affiliates” and “Contractor or its affiliates” refers to the Contractor, its chief executives, directors, officers, subsidiaries, affiliates, subcontractors at any tier, and consultants and any joint venture involving the Contractor, any entity into or with which the Contractor subsequently merges or affiliates, or any other successor or assignee of the Contractor.

An “Organizational conflict of interest” exists when the nature of the work to be performed under a proposed ordering activity contract, without some restriction on ordering activities by the Contractor and its affiliates, may either (i) result in an unfair competitive advantage to the Contractor or its affiliates or (ii) impair the Contractor’s or its affiliates’ objectivity in performing contract work.

**b. To avoid an organizational or financial conflict of interest and to avoid prejudicing the best interests of the ordering activity, ordering activities may place restrictions on the Contractors, its affiliates, chief executives, directors, subsidiaries and subcontractors at any tier when placing orders against schedule contracts. Such restrictions shall be consistent with FAR 9.505 and shall be designed to avoid, neutralize, or mitigate organizational conflicts of interest that might otherwise exist in situations related to individual orders placed against the schedule contract. Examples of situations, which may require restrictions, are provided at FAR 9.508.****11. INVOICES**

The Contractor, upon completion of the work ordered, shall submit invoices for IT Professional services. Progress payments may be authorized by the ordering activity on individual orders if appropriate. Progress payments shall be based upon completion of defined milestones or interim products. Invoices shall be submitted monthly for recurring services performed during the preceding month.

**12. PAYMENTS**

For firm-fixed price orders the ordering activity shall pay the Contractor, upon submission of proper invoices or vouchers, the prices stipulated in this contract for service rendered and accepted. Progress payments shall be made only when authorized by the order. For time-and-materials orders, the Payments under Time-and-Materials and Labor-Hour Contracts at FAR 52.212-4 (MAR 2009) (ALTERNATE I – OCT 2008) (DEVIATION I – FEB 2007) applies to time-and-materials orders placed under this contract. For labor-hour orders, the Payment under Time-and-Materials and Labor-Hour Contracts at FAR 52.212-4 (MAR 2009) (ALTERNATE I – OCT 2008) (DEVIATION I – FEB 2007) applies to labor-hour orders placed under this contract. 52.216-31(Feb 2007) Time-and-Materials/Labor-Hour Proposal Requirements—Commercial Item Acquisition As prescribed in 16.601(e)(3), insert the following provision:

(a) The Government contemplates award of a Time-and-Materials or Labor-Hour type of contract resulting from this solicitation.

(b) The offeror must specify fixed hourly rates in its offer that include wages, overhead, general and administrative expenses, and profit. The offeror must specify whether the fixed hourly rate for each labor category applies to labor performed by—

- (1) The offeror;
- (2) Subcontractors; and/or
- (3) Divisions, subsidiaries, or affiliates of the offeror under a common control.

**13. RESUMES**

Resumes shall be provided to the GSA Contracting Officer or the user ordering activity upon request.

**14. INCIDENTAL SUPPORT COSTS**

Incidental support costs are available outside the scope of this contract. The costs will be negotiated separately with the ordering activity in accordance with the guidelines set forth in the FAR.

**15. APPROVAL OF SUBCONTRACTS**

The ordering activity may require that the Contractor receive, from the ordering activity's Contracting Officer, written consent before placing any subcontract for furnishing any of the work called for in a task order.

**16. DESCRIPTION OF IT PROFESSIONAL SERVICES AND PRICING**

The labor category descriptions start on page 124 and the approved GSA rates are on page 225.

**Terms and Conditions Applicable to Cloud-Related IT Professional Services (Special Item Number 518210C)**

**NOTE: \*\*\*\*Labor categories under Special Item Number 54151S “Information Technology Professional Services may remain under SIN 54151S, unless they are specific to the Cloud Computing Products and IT Professional Services 518210C. Labor specific to Cloud Computing should be positioned by Contractors under SIN 518210C in order for Contractors to have the opportunity to bid on requests for quotes that are generated exclusively under the Cloud SIN. Offerors may offer Cloud IT Professional Services exclusively; it is not a requirement to also offer Cloud Services (i.e Iaas).**

**1. SCOPE OF 518210C CLOUD RELATED IT PROFESSIONAL SERVICES**

- a) The labor categories, prices, terms and conditions stated under Special Item Numbers 518210C Cloud Services and Related IT Professional Services apply exclusively to this SIN within the scope of this Information Technology Schedule. It is anticipated that the relevant IT Professional Services for this SIN (518210C) are related to the following: assessing cloud solutions, preparing for cloud solutions, refactoring legacy solutions for cloud migration, migrating legacy or other systems to cloud solutions, DevOps, developing new cloud based applications and providing management/governance for cloud solutions. Contractors may propose other types of relevant professional services as long as they are specifically designed to work within and/or support the types of cloud product services described in SIN 518210C.
- b) Cloud Related IT Professional Services provided under this SIN shall comply with all certifications and industry standards as applicable pertaining to the type of services as specified by ordering agency.
- c) The Contractor shall provide Cloud Related IT Professional Services at the Contractor’s facility and/or at the ordering activity location, as agreed to by the Contractor and the ordering activity.

**1. ORDER**

- a) Agencies may use written orders, Electronic Data Interchange (EDI) orders, Blanket Purchase Agreements, individual purchase orders, or task orders for ordering services under this contract. Blanket Purchase Agreements shall not extend beyond the end of the contract period; all services and delivery shall be made and the contract terms and conditions shall continue in effect until the completion of the order. Orders for tasks which extend beyond the fiscal year for which funds are available shall include FAR 52.232-19 (Deviation – May 2003) Availability of Funds for the Next Fiscal Year. The order shall specify the availability of funds and the period for which funds are available.
- b) All task orders are subject to the terms and conditions of the contract. In the event of conflict between a task order and the contract, the contract will take precedence.

**2. PERFORMANCE OF SERVICES**

- a) The Contractor shall commence performance of Cloud Related IT Professional Services on the date agreed to by the Contractor and the ordering activity.
- b) The Contractor agrees to render Cloud Related IT Professional Services during normal working hours, unless otherwise agreed to by the Contractor and the ordering activity.
- c) The ordering activity should include the criteria for satisfactory completion for each task in the Statement of Work or Delivery Order. Cloud Related IT Professional Services shall be completed in a good and workmanlike manner.
- d) Any Contractor travel required in the performance of Cloud Related IT Professional Services must comply with the Federal Travel Regulation or Joint Travel Regulations, as applicable, in

effect on the date(s) the travel is performed. Established Federal Government per diem rates will apply to all Contractor travel. Contractors cannot use GSA city pair contracts. All travel will be agreed upon with the client prior to the Contractor's travel.

### **3. INSPECTION OF SERVICES**

Inspection of services is in accordance with 552.212-4 CONTRACT TERMS AND CONDITIONS—COMMERCIAL ITEMS (JAN 2017) (DEVIATION – FEB 2007) (DEVIATION - FEB 2018) for Firm-Fixed Price orders; or GSAR 552.212-4 CONTRACT TERMS AND CONDITIONS-COMMERCIAL ITEMS (JAN 2017) (DEVIATION - FEB 2018) (ALTERNATE I - JAN 2017) (DEVIATION - FEB 2007) for Time-and-Materials and Labor-Hour Contracts orders placed under this contract.

### **4. RESPONSIBILITIES OF THE CONTRACTOR**

The Contractor shall comply with all laws, ordinances, and regulations (Federal, State, City, or otherwise) covering work of this character. If the end product of a task order is software, then FAR 52.227-14 (MAY 2014) Rights in Data – General, may apply.

The Contractor shall comply with contract clause (52.204-21) to the Federal Acquisition Regulation (FAR) for the basic safeguarding of contractor information systems that process, store, or transmit Federal data received by the contract in performance of the contract. This includes contract documents and all information generated in the performance of the contract.

### **5. RESPONSIBILITIES OF THE ORDERING ACTIVITY**

Subject to the ordering activity's security regulations, the ordering activity shall permit Contractor access to all facilities necessary to perform the requisite Cloud Computing IT Professional Services.

### **6. INDEPENDENT CONTRACTOR**

All Cloud Computing IT Professional Services performed by the Contractor under the terms of this contract shall be as an independent Contractor, and not as an agent or employee of the ordering activity.

### **7. ORGANIZATIONAL CONFLICTS OF INTEREST**

#### **a. Definitions.**

“Contractor” means the person, firm, unincorporated association, joint venture, partnership, or corporation that is a party to this contract.

“Contractor and its affiliates” and “Contractor or its affiliates” refers to the Contractor, its chief executives, directors, officers, subsidiaries, affiliates, subcontractors at any tier, and consultants and any joint venture involving the Contractor, any entity into or with which the Contractor subsequently merges or affiliates, or any other successor or assignee of the Contractor.

An “Organizational conflict of interest” exists when the nature of the work to be performed under a proposed ordering activity contract, without some restriction on ordering activities by the Contractor and its affiliates, may either (i) result in an unfair competitive advantage to the Contractor or its affiliates or (ii) impair the Contractor's or its affiliates' objectivity in performing contract work.

To avoid an organizational or financial conflict of interest and to avoid prejudicing the best interests of the ordering activity, ordering activities may place restrictions on the Contractors, its affiliates, chief executives, directors, subsidiaries and subcontractors at any tier when placing orders against schedule contracts. Such restrictions shall be consistent with FAR 9.505 and shall be designed to avoid, neutralize, or mitigate organizational conflicts of interest that might otherwise exist in situations related to individual orders placed against the schedule contract. Examples of situations, which may require restrictions, are provided at FAR 9.508.

## 8. INVOICES

The Contractor, upon completion of the work ordered, shall submit invoices for Cloud Computing IT Professional Services. Progress payments may be authorized by the ordering activity on individual orders if appropriate. Progress payments shall be based upon completion of defined milestones or interim products. Invoices shall be submitted monthly for recurring IT professional services performed during the preceding month.

## 9. PAYMENTS

The ordering activity shall pay the Contractor upon submission of proper invoices or vouchers, the prices stipulated in this contract for service rendered and accepted. Progress payments shall be made only when authorized by the order. Payments shall be made in accordance with:

For orders that are NOT time-and-materials/labor hours (fixed price applicable).

- GSAR 552.212-4 CONTRACT TERMS AND CONDITIONS—COMMERCIAL ITEMS (JAN 2017) (DEVIATION – FEB 2007) (DEVIATION - FEB 2018) For orders that are time-and-materials/labor hours.
- GSAR 552.212-4 CONTRACT TERMS AND CONDITIONS-COMMERCIAL ITEMS (JAN 2017) (DEVIATION - FEB 2018) (ALTERNATE I - JAN 2017) (DEVIATION - FEB 2007)
- FAR 52.216-31 (Feb 2007) Time-and Materials/Labor-Hour Proposal Requirements—Commercial Item Acquisition. As prescribed in 16.601(f)(3), insert the following provision:

- (1) The Government contemplates award of a Time-and-Materials or Labor-Hour type of contract resulting from this solicitation.
- (2) The offeror must specify fixed hourly rates in its offer that include wages, overhead, general and administrative expenses, and profit. The offeror must specify whether the fixed hourly rate for each labor category applies to labor performed by
  - i The offeror;
  - ii Subcontractors; and/or
  - iii Divisions, subsidiaries, or affiliates of the offeror under a common control.

## 10. RESUMES

Resumes shall be provided to the GSA Contracting Officer or the user ordering activity upon request.

**11. APPROVAL OF SUBCONTRACTS**

The ordering activity may require that the Contractor receive, from the ordering activity's Contracting Officer, written consent before placing any subcontract for furnishing any of the work called for in a task order.

**12. DESCRIPTION OF CLOUD COMPUTING LABOR HOURS AND PRICING**

The labor category descriptions start on page 36 and the approved GSA rates are on page 213.

**Terms and Conditions Applicable to Health Information Technology (IT) Services  
(Special Item Number 54151HEAL)****1. SCOPE**

- a. The labor categories, prices, terms and conditions stated under Special Item Number 54151HEAL Health Information Technology Services apply exclusively to Health IT Services within the scope of this Information Technology Schedule.
- b. This SIN is limited to Health IT Services only. Software and hardware products are out of scope. Hardware and software can be acquired through different Special Item Numbers on the MAS (e.g. 511210, 511210, 33411).
- c. This SIN provides ordering activities with access to Health IT services.
- d. Health IT Services provided under this SIN shall comply with all Healthcare certifications and industry standards as applicable at the task order level.
- e. The Contractor shall provide services at the Contractor's facility and/or at the ordering activity location, as agreed to by the Contractor and the ordering activity.

**2. ORDER**

- a. Agencies may use written orders, Electronic Data Interchange (EDI) orders, Blanket Purchase Agreements, individual purchase orders, or task orders for ordering services under this contract. Blanket Purchase Agreements shall not extend beyond the end of the contract period; all services and delivery shall be made and the contract terms and conditions shall continue in effect until the completion of the order. Orders for tasks which extend beyond the fiscal year for which funds are available shall include FAR 52.232-19 (Deviation – May 2003) Availability of Funds for the Next Fiscal Year. The purchase order shall specify the availability of funds and the period for which funds are available.
- b. All task orders are subject to the terms and conditions of the contract. In the event of conflict between a task order and the contract, the contract will take precedence.

**3. PERFORMANCE OF SERVICES**

- a. The Contractor shall commence performance of services on the date agreed to by the Contractor and the ordering activity. All Contracts will be fully funded.
- b. The Contractor agrees to render services only during normal working hours, unless otherwise agreed to by the Contractor and the ordering activity.
- c. The ordering activity should include the criteria for satisfactory completion for each task in the Statement of Work or Delivery Order. Services shall be completed in a good and workmanlike manner.
- d. Any Contractor travel required in the performance of Health IT Services must comply with the Federal Travel Regulation or Joint Travel Regulations, as applicable, in effect on the date(s) the travel is performed. Established Federal Government per diem rates will apply to all Contractor travel. Contractors cannot use GSA city pair contracts. All travel will be agreed upon with the client prior to the Contractor's travel.

**4. INSPECTION OF SERVICES**

In accordance with FAR 52.212-4 CONTRACT TERMS AND CONDITIONS--COMMERCIAL ITEMS (MAR 2009) (DEVIATION I - FEB 2007) for Firm-Fixed Price orders and FAR 52.212-4 CONTRACT TERMS AND CONDITIONS –COMMERCIAL ITEMS (MAR 2009) (ALTERNATE I – OCT 2008) (DEVIATION I – FEB 2007) applies to Time-and-Materials and Labor-Hour Contracts orders placed under this contract.

**5. RESPONSIBILITIES OF THE CONTRACTOR**

The Contractor shall comply with all laws, ordinances, and regulations (Federal, State, City, or otherwise) covering work of this character. If the end product of a task order is software, then FAR 52.227-14 (Dec 2007) Rights in Data – General, may apply.

**6. RESPONSIBILITIES OF THE ORDERING ACTIVITY**

Subject to security regulations, the ordering activity shall permit Contractor access to all facilities necessary to perform the requisite Health IT Services.

**7. INDEPENDENT CONTRACTOR**

All Health IT Services performed by the Contractor under the terms of this contract shall be as an independent Contractor, and not as an agent or employee of the ordering activity.

**8. ORGANIZATIONAL CONFLICTS OF INTEREST****a. Definitions.**

“Contractor” means the person, firm, unincorporated association, joint venture, partnership, or corporation that is a party to this contract.

“Contractor and its affiliates” and “Contractor or its affiliates” refers to the Contractor, its chief executives, directors, officers, subsidiaries, affiliates, subcontractors at any tier, and consultants and any joint venture involving the Contractor, any entity into or with which the Contractor subsequently merges or affiliates, or any other successor or assignee of the Contractor.

An “Organizational conflict of interest” exists when the nature of the work to be performed under a proposed ordering activity contract, without some restriction on ordering activities by the Contractor and its affiliates, may either (i) result in an unfair competitive advantage to the Contractor or its affiliates or (ii) impair the Contractor’s or its affiliates’ objectivity in performing contract work.

- b. To avoid an organizational or financial conflict of interest and to avoid prejudicing the best interests of the ordering activity, ordering activities may place restrictions on the Contractors, its affiliates, chief executives, directors, subsidiaries and subcontractors at any tier when placing orders against schedule contracts. Such restrictions shall be consistent with FAR 9.505 and shall be designed to avoid, neutralize, or mitigate organizational conflicts of interest that might otherwise exist in situations related to individual orders placed against the schedule contract. Examples of situations, which may require restrictions, are provided at FAR 9.508.

**9. INVOICES**

The Contractor, upon completion of the work ordered, shall submit invoices for Health IT Professional services. Progress payments may be authorized by the ordering activity on individual orders if appropriate. Progress payments shall be based upon completion of defined milestones or interim products. Invoices shall be submitted monthly for recurring services performed during the preceding month.

**10. RESUMES**

Resumes shall be provided to the GSA Contracting Officer or the user ordering activity upon request.

**11. INCIDENTAL SUPPORT COSTS**

Incidental support costs are not considered part of the scope of this contract. The costs will be negotiated separately with the ordering activity in accordance with the guidelines set forth in the FAR.

**12. APPROVAL OF SUBCONTRACTS**

The ordering activity may require that the Contractor receive, from the ordering activity's Contracting Officer, written consent before placing any subcontract for furnishing any of the work called for in a task order.

**13. DESCRIPTION OF HEALTH IT SERVICES AND PRICING**

The labor category descriptions start on page 171 and the approved GSA rates are on page 233.

**Labor Category Descriptions applicable to SIN 518210C**

Labor Category	Description
<p><b>Cloud Solutions Architect</b></p>	<p><b>Summary Duties and Responsibilities:</b></p> <ul style="list-style-type: none"> <li>• Serves in a variety of technical roles throughout the development lifecycle or operational support with specialty in the area of developing and maintaining the enterprise architecture, ensuring the EA model is kept current.</li> <li>• Serves as technical lead for large-scale migrations to AWS, Azure or GCP cloud platforms.</li> <li>• Work with technical team to implement microservices, containers and container orchestration using tools such as Docker, Kubernetes, OpenShift</li> <li>• Work with technical team to provide guidance on implementing Continuous Integration and Continuous Deployment pipelines on Amazon Web Services (AWS) Azure and Google Cloud Platform (GCP)</li> <li>• Work with technical team to provide guidance on implementing infrastructure automation using tools such as CloudFormation, Ansible, Chef, Puppet, ARM Templates, Terraform</li> <li>• Work with technical team to implement cloud security scanning and monitoring tools</li> <li>• Assists with IT strategic planning</li> <li>• Provides high-level architectural expertise to managers and technical staff</li> <li>• Develops architectural products and deliverables for the enterprise and operational business lines</li> <li>• Develops strategy of system and the design infrastructure necessary to support that strategy</li> <li>• Advises on selection of technological purchases with regard to processing, data storage, data access, and applications development. Sets standards for the client/server relational database structure for the organization (SQL, Oracle, Sybase, etc.)</li> <li>• Advises on feasibility of potential future projects to management</li> </ul> <p><b>Minimum Qualifications:</b></p> <ul style="list-style-type: none"> <li>• Demonstrated Experience as technical lead of large-scale migrations to AWS, Azure or GCP cloud platforms.</li> <li>• Demonstrated experience with Agile, Continuous Development, Continuous Delivery and Continuous deployment tools, Automated Testing Tools, and DevSecOps.</li> <li>• Demonstrated experience with implementing microservices, containers and container orchestration.</li> <li>• In-depth knowledge of Government/business operations</li> <li>• Experienced in various computing technologies</li> <li>• Thorough understanding of technology to influence technical thought leadership</li> </ul>

Labor Category	Description
	<ul style="list-style-type: none"> <li>• Excellent communications skills</li> <li>• Experience with EA tools and techniques</li> </ul> <p><b>Education/Certification Requirement:</b></p> <ul style="list-style-type: none"> <li>• BA/BS degree; minimum of 10 years' experience</li> </ul> <p><b>Required:</b> One of the following certifications:</p> <ul style="list-style-type: none"> <li>• AWS Certified Solutions Architect – Associate or Professional</li> <li>• AZ-300/301: Microsoft Certified: Azure Solutions Architect Expert</li> <li>• Google – Professional Cloud Architect</li> </ul>
<p><b>Cloud Subject Matter Expert</b></p>	<p><b>Summary Duties and Responsibilities:</b></p> <ul style="list-style-type: none"> <li>• Serves as an expert in specific disciplines to provide technical expertise as needed. Analyzes program and operational data to assist in strategic and tactical decisions. Can be called upon to assist with the development of complex products or deliverables requiring specialized expert knowledge</li> <li>• Provides in-depth technical and/or management knowledge and analysis of specialized IT subject areas including systems and software, hardware, protocols, processes, networks—voice, video, and data—applications, security, testing, and customer support</li> <li>• Duties may include, but are not limited to: high-level functional systems analysis, design, integration, documentation, and implementation</li> <li>• Advises on exceptionally complex problems that need extensive knowledge of the subject matter for effective implementation</li> <li>• Participates as needed in all phases of the systems lifecycle, with emphasis on one or more of the following activities: planning, analysis, design, development, testing, integration, support, and documentation, as well as quality control and risk management</li> <li>• Provides technical guidance for large-scale migrations to AWS, Azure or GCP cloud platforms.</li> <li>• Provides technical guidance on implementing microservices, containers and container orchestration using tools such as Docker, Kubernetes, OpenShift</li> <li>• Provides technical guidance on implementing Continuous Integration and Continuous Deployment pipelines on Amazon Web Services (AWS) Azure and Google Cloud Platform (GCP)</li> <li>• Provides technical guidance on implementing infrastructure automation using tools such as CloudFormation, Ansible, Chef, Puppet, ARM Templates, Terraform</li> <li>• Provides technical guidance on implementing cloud security scanning and monitoring tools</li> </ul>

Labor Category	Description
	<p><b>Minimum Qualifications and Skills</b></p> <ul style="list-style-type: none"> <li>• Significant experience in related functional and technical areas such as web development and support, cloud management and operation, systems architecture, networking, data analytics, content management, collaboration, program and project management, or risk management</li> <li>• Demonstrated Experience as technical lead of large-scale migrations to AWS, Azure or GCP cloud platforms.</li> <li>• Demonstrated experience with Agile, Continuous Development, Continuous Delivery and Continuous deployment tools, Automated Testing Tools, and DevSecOps.</li> <li>• Demonstrated experience with implementing microservices, containers and container orchestration.</li> </ul> <p><b>Education/Other Requirements:</b> BA/BS degree and a minimum of 15 years’ experience with 12 years’ cloud experience, or Master’s degree and 10 years’ cloud experience</p> <ul style="list-style-type: none"> <li>• <b>Required:</b> One of the following certifications:           <ul style="list-style-type: none"> <li>• AWS Certified Solutions Architect – Associate or Professional</li> <li>• AZ-300/301: Microsoft Certified: Azure Solutions Architect Expert</li> <li>• Google – Professional Cloud Architect</li> </ul> </li> </ul>

**Labor Category Descriptions applicable to SIN 54151HACS**

<b>Labor Category Equivalency Language</b>
<p>ManTech is proposing the following labor categories and associated qualifications for services under this contract. All categories may be subject to the requirement of a government security investigation and may need to meet eligibility requirements for access to classified information. Where the job description requires a certain level of educational qualification or “equivalent experience”, one year of education equates to 1.5 years of experience. The following guidelines are provided:</p>
<p>High School Diploma 2 years directly related experience                      Associate Degree 3 – 5 years directly related experience                      Bachelors Degree 6 – 8 years directly related experience                      Masters Degree 9 years directly related experience</p>
<p>Subcontractors are to be included on task orders under the contract labor categories and rates, when possible. Upon the approval of the ordering agency, subcontractors may be included as off-schedule costs if their services are not suitable under the contract labor categories as listed herein.</p>

<b>Labor Category</b>	<b>Description</b>
<p>Cyber Task Supervisor, Associate</p>	<p>Responsible for the coordination and supervision of a specific technical task or function. Ensures all activities are carried out in accordance with project commitments or specific objectives. Typically supervises between 2 and 10 employees. Responsible for day-to-day coordination and administration of tasks by ensuring quality and productivity standards are maintained while meeting client schedules. Coordinates with other contract and subcontract personnel to ensure work moves smoothly from one functional area to another. Works with project manager and/or client to prepare work schedules and man-hour estimates. Ensures proper training of subordinates. Maintains record of changes in instructions and ensures all team members are informed of changes. Assigns and reviews subordinates’ performance. Prepares performance evaluations. Ensures completion of administrative reporting, e.g., timecards, daily statistics, logs, and task narratives. Responds to client requests and questions. Assists with writing manuals and other documentation. Responsible for status and task management reports for area of responsibility. Requires Bachelor's degree in related field or equivalent, and zero to two years of related experience.</p>

Labor Category	Description
Cyber Task Supervisor, Staff	<p>Responsible for the coordination and supervision of a specific technical task or function. Ensures all activities are carried out in accordance with project commitments or specific objectives. Typically supervises between 10 and 30 employees. Responsible for day-to-day coordination and administration of tasks by ensuring quality and productivity standards are maintained while meeting client schedules. Coordinates with other contract and subcontract personnel to ensure work moves smoothly from one functional area to another. Works with project manager and/or client to prepare work schedules and man-hour estimates. Ensures proper training of subordinates. Maintains record of changes in instructions and ensures all team members are informed of changes. Assigns and reviews subordinates' performance. Prepares performance evaluations. Ensures completion of administrative reporting, e.g., timecards, daily statistics, logs, and task narratives. Responds to client requests and questions. Assists with writing manuals and other documentation. Responsible for status and task management reports for area of responsibility. Sets up and manages project facilities as dictated by workload requirements. Requires Bachelor's degree in related field or equivalent, and two to four years of related experience.</p>
Cyber Task Supervisor, Senior	<p>Responsible for the coordination and supervision of a specific technical task or function. Ensures all activities are carried out in accordance with project commitments or specific objectives. Typically supervises more than 30 employees. Responsible for day-to-day coordination and administration of tasks by ensuring quality and productivity standards are maintained while meeting client schedules. Coordinates with other contract and subcontract personnel to ensure work moves smoothly from one functional area to another. Works with project manager and/or client to prepare work schedules and man-hour estimates. Ensures proper training of subordinates. Maintains record of changes in instructions and ensures all team members are informed of changes. Assigns, reviews subordinates' performance and may prepares performance evaluations. Ensures completion of administrative reporting (timecards, daily statistics, logs, and task narratives.) Responds to client requests and questions. Assists with writing manuals and other documentation. Responsible for status and task management reports for area of responsibility. Sets up and manages project facilities as dictated by workload requirements. Requires Bachelor's degree in related field or equivalent, and five to seven years of related experience.</p>

Labor Category	Description
Cyber Project Manager, Deputy	Assists higher level program/project manager in directing the project life cycle by assisting in development of comprehensive project plans to include both long and short-range goals and milestones. Identifies, acquires, and utilizes company resources to achieve project technical objectives. Directs a project team usually within a matrix organization, monitoring and encouraging functional organizations to complete milestones within specific budgets and schedules. May occasion interface with external customers and top management to communicate status of project throughout life cycle. Requires Bachelor's degree or equivalent, and seven to nine years of related experience.
Cyber Project Manager	Responsible for the performance of relatively small technical projects or a definable portion of a larger technical program in accordance with contract requirements and company policies, procedures and guidelines. Directs and supervises all support resources for the performance of project assignments and activities. Manages the technical direction of a project through the design, implementation, and testing in accordance with project objectives. Responsible for acquiring follow-on business associated with assigned projects and for supporting new business development by leading relatively small proposals or assisting with major proposals. Requires Bachelor's degree or equivalent, and ten to twelve years of related (technical environment) experience.
Cyber Program Manager	Responsible for the performance of a relatively significant program or multiple smaller programs in accordance with contract requirements and company policies, procedures and guidelines. Oversees the technology development and/or application, marketing, and resource allocation within program client base. Program area typically represents more than three functional areas such as engineering, systems analysis, quality control and administration. Responsible for acquiring follow-on business associated with assigned programs and for supporting new business development by leading proposals. Requires Bachelor's degree or equivalent, and twelve to fifteen years of related (technical environment) experience including management experience.
Cyber Program Director	Responsible for the successful technical, schedule, and cost performance of a major program, or multiple programs, through subordinate program/project managers, in accordance with contract requirements and company policies, procedures and guidelines. Responsible for acquiring follow-on business associated with assigned programs and for supporting new business development by leading proposals or through program/project managers. Requires Bachelor's degree or equivalent, and sixteen plus years experience in a related technical environment, including five years related management experience.

Labor Category	Description
Cyber Database Analyst, Associate	Assists in administering database organizations, standards, controls, procedures, and documentation. Provides entry level technical consulting in the definition, design, and creation of a database environment. Develops applications to help formulate database solutions to business problems, data architectures, database management system facilities and capabilities, and the operation and tuning of databases. Maintains databases with respect to access methods, access time, batch processes, device allocation, validation checks, organization, protection and security, documentation, and statistical methods. Includes maintenance of database dictionaries, and integration of systems through database design. Maintains database dictionaries. Maintains and documents JCL, shell scripts and batch processes. Ensures that documentation is complete and up-to-date. Applies procedures for periodic database backup. Requires Bachelor's degree or equivalent, and zero to two years of related experience.
Cyber Database Analyst, Staff	Administers database organizations, standards, controls, procedures, and documentation. Provides technical consulting in the definition, design, and creation of a database environment. Assists applications development staff and users on database solutions to business problems, data architectures, database management system facilities and capabilities, and the operation and tuning of databases. Implements and maintains databases with respect to access methods, access time, batch processes, device allocation, validation checks, organization, protection and security, documentation, and statistical methods. Includes maintenance of database dictionaries, and integration of systems through database design and implementation. Maintains database dictionaries and documents JCL, shell scripts and batch processes. Ensures that documentation is complete and up-to-date. Develops and applies procedures for periodic database backup. Requires Bachelor's degree (in Computer Science, Management Information Systems or related field) or equivalent, and two to four years of related experience.
Cyber Database Analyst, Senior	Defines and administers database organizations, standards, controls, procedures, and documentation. Provides experienced technical consulting in the definition, design, and creation of a database environment. Advises applications development staff and users on database solutions to business problems, data architectures, database management system facilities and capabilities, and the operation and tuning of databases. Ensures economic and efficient availability of data within adequate safeguards. Designs, implements, and maintains databases with respect to access methods, access time, batch processes, device allocation, validation checks, organization, protection and security, documentation, and statistical methods. Includes maintenance of database dictionaries, and integration of systems through database design. Develops and maintains expertise in use of automated tools for database design and implementation. Requires Bachelor's degree (in Computer

Labor Category	Description
	Science, Management Information Systems) or equivalent, and five to seven years of related (data center environment) experience.
Cyber Database Analyst, Principal	<p>Defines and oversees database organizations, standards, controls, procedures, and documentation. Provides experienced technical consulting in the definition, design, and creation of a database environment. Advises applications development staff and users on database solutions to business problems, data architectures, database management system facilities and capabilities, and the operation and tuning of databases. Ensures economic and efficient availability of data within adequate safeguards. Designs and implements databases with respect to access methods, access time, batch processes, device allocation, validation checks, organization, protection and security, documentation, and statistical methods.</p> <p>Develops and maintains expertise in use of automated tools for database design and implementation. Develops, maintains and documents JCL, shell scripts and batch processes. Participates as a leader and as a team member, and works to maintain a positive environment. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and seven to nine years of related experience.</p>
Cyber Database Analyst, Senior Principal	<p>Defines database organizations, standards, controls, procedures, and documentation. Provides experienced technical consulting in the definition, design, and creation of a database environment. Advises applications development staff and users on database solutions to business problems, data architectures, database management system facilities and capabilities, and the operation and tuning of databases. Ensures economic and efficient availability of data within adequate safeguards. Develops expertise in use of automated tools for database design and implementation. Develops procedures to address needs of JCL, shell scripts and batch processes. Ensures that documentation is complete and up-to-date. Develops procedures relating to database and application security including procedures by which access is authorized, enabled, changed and withdrawn. Develops procedures for periodic database backup. Participates as a leader and as the senior team member. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and ten to twelve years of related experience.</p>
Cyber Database Manager	<p>Responsible for all activities related to the design, implementation and administration of computerized databases. Assigns personnel to various projects and directs their activities; reviews and evaluates their work and prepares performance reports. Confers with and advises subordinates on administrative policies and procedures, technical problems, priorities and methods. Consults with and advises users of the various databases. Projects long-range requirements for database administration and design in conjunction with other managers in the information systems function. Prepares activity and progress reports regarding the database design process.</p>

Labor Category	Description
	A Bachelor degree or equivalent in a related field and ten to twelve years of relevant work experience are required.
Cyber Database Engineer, Assoc	Operates at the system level and has learned skills that will apply across the full system life cycle from requirements through database design and implementation. Is trained in system design and development skill as well as database-related skills. The Database Engineer's focus is database-centric, based on the understanding that the heart of every information system is the database, but with a solid view of how the database integrates and operates with other system components. Requirements and design activities will include one of the following: security, backup and recovery, and availability considerations. Will set up and test different design scenarios (or to direct these activities) early in the system development life cycle as part of the process of validating the suitability of proposed design alternatives. Test scenarios must generate sufficient performance data to support database design decisions. Requires Bachelor's degree or equivalent, and zero to two years of related experience.

<p>Cyber Analyst/Computer Forensic Intrusion, Associate</p>	<p>Assists in providing computer forensic and intrusion support to high technology investigations in the form of computer evidence seizure, computer forensic analysis, data recovery, and network assessments. Assists in conduct vulnerability assessments/penetration tests of information systems. Researches and maintains proficiency in tools, techniques, countermeasures, and trends in computer network vulnerabilities, data hiding and network security and encryption. Assists in deterring, identifying, monitoring, investigating and analyzing computer network intrusions. Requires Bachelor's degree or equivalent and zero to two years of related experience with a minimum of six months experience in one or more of the following: computer network penetration testing/techniques; computer evidence seizure, computer forensic analysis, data recovery; computer intrusion analysis/incident response, intrusion detection; computer network surveillance/monitoring; network protocols, network devices, multiple operating systems, and secure architectures. Ability to obtain a security clearance.</p>

Labor Category	Description
<p>Cyber Analyst/Computer Forensic Intrusion, Staff</p>	<p>Assists in providing computer forensic and intrusion support to high technology investigations in the form of computer evidence seizure, computer forensic analysis, data recovery, and network assessments. Assists in conduct vulnerability assessments/penetration tests of information systems. Researches and maintains proficiency in tools, techniques, countermeasures, and trends in computer network vulnerabilities, data hiding and network security and encryption. Assists in deterring, identifying, monitoring, investigating and analyzing computer network intrusions. Requires Bachelor’s degree or equivalent and two to four years of related experience with a minimum of six months experience in one or more of the following: computer network penetration testing/techniques; computer evidence seizure, computer forensic analysis, data recovery; computer intrusion analysis/incident response, intrusion detection; computer network surveillance/monitoring; network protocols, network devices, multiple operating systems, and secure architectures. Ability to obtain a security clearance.</p>
<p>Cyber Analyst/Computer Forensic Intrusion, Senior</p>	<p>Provides computer forensic and intrusion support to high technology investigations in the form of computer evidence seizure, computer forensic analysis, data recovery, and network assessments. Conducts vulnerability assessments/penetration tests of information systems. Researches and maintains proficiency in tools, techniques, countermeasures, and trends in computer network vulnerabilities, data hiding and network security and encryption. Assists in deterring, identifying, monitoring, investigating and analyzing computer network intrusions. Requires Bachelor’s degree or equivalent and five to seven years of related experience with a minimum of six months experience in one or more of the following: computer network penetration testing and techniques; computer evidence seizure, computer forensic analysis, and data recovery; computer intrusion analysis and incident response, intrusion detection; computer network surveillance/monitoring; network protocols, network devices, multiple operating systems, and secure architectures. Ability to obtain a security clearance.</p>

Labor Category	Description
<p>Cyber Analyst/Computer Forensic Intrusion, Lead</p>	<p>Provides computer forensic and intrusion analyst support to high technology investigations in the form of computer evidence seizure, computer forensic analysis, data recovery, and network assessments. Conduct vulnerability assessments/penetration tests of information systems. Researches and maintains proficiency in tools, techniques, countermeasures, and trends in computer network vulnerabilities, data hiding and network security and encryption. Assists in deterring, identifying, monitoring, investigating and analyzing computer network intrusions. Requires Bachelor's degree and seven to nine years of related experience with a minimum of four years experience in one or more of the following: computer network penetration testing and techniques; computer evidence seizure, computer forensic analysis, and data recovery; computer intrusion analysis and incident response, intrusion detection; computer network surveillance/monitoring; network protocols, network devices, multiple operating systems, and secure architectures. Ability to obtain a security clearance.</p>
<p>Cyber Analyst/Computer Forensic Intrusion, Principal</p>	<p>Provides knowledge in Computer and network vulnerability testing/penetration techniques; Tool development for computer and network forensics and vulnerability testing. Provides computer forensic support to high technology investigations in the form of evidence seizure, computer forensic analysis, and data recovery. Conducts vulnerability assessments/penetration tests of information systems. Researches and maintains proficiency in tools, techniques, countermeasures, and trends in computer and network vulnerabilities, data hiding and encryption. Develop tools, techniques, training and countermeasures for computer and network vulnerabilities, data hiding and encryption. Deter, identify, monitor and investigate computer and network intrusions. Provides expert knowledge in computer and network forensics. Conducts vulnerability assessments. Researches and maintains proficiency in tools, techniques, countermeasures, and trends in computer and network vulnerabilities. Identify, deter, monitor and investigate computer and network intrusions. Requires Bachelor's degree or equivalent and ten to twelve years of related experience with a minimum of four years experience in one or more of the following: computer network penetration testing and techniques; computer evidence seizure, computer forensic analysis, and data recovery; computer intrusion analysis and incident response, intrusion detection; computer network surveillance and monitoring; network protocols, network devices, multiple operating systems, and secure architectures or Master's degree and seven to nine years of related experience. Ability to obtain a security clearance.</p>

Labor Category	Description
Cyber Applications Engineer, Associate	Assists in the selling process to identify, develops, and supports product/service applications. Requires blend of sales, marketing, and technical skills. Interacts with management at customer sites to assess business processes and address product/service needs. Basic involvement in the overall sales process, pre-sales through post-sales support. May participate in sales presentation activities for key prospects and develops and delivers presentations to customer. Requires Bachelor's degree (in technology, engineering or business discipline) or equivalent, and zero to two years related (engineering and/or sales) experience.
Cyber Applications Engineer, Staff	Identifies, develops, and supports product/service applications in the selling process. Requires blend of sales, marketing, and technical skills. Interacts with management at customer site to assess business processes and address product/service needs. Strong involvement in the overall sales process, pre-sales through post-sales support. Assists with sales presentation activities for key prospects and develops and delivers presentations to customer. Requires Bachelor's degree (in technology, engineering or business discipline) or equivalent, and two to four years of related (engineering and/or sales) experience.
Cyber Applications Engineer, Senior	Identifies, assesses, and evaluates moderately complex product/service solutions requiring a blend of strong sales, marketing, and technical skills. Coordinates resolution of product/service issues, upgrades, and problems. Interacts with management at customer site to assess major business processes and address product/service needs. Strong involvement in the overall sales process, pre-sales through post-sales support. Participates in sales presentation activities and develops and delivers presentations to customer's management. Requires Bachelor's degree (in technology or business discipline) or equivalent, and five to seven years of related (engineering and/or sales) experience.
Cyber Applications Engineer, Principal	Strong involvement in the selling process to identify, develop, and support complex product/service solutions requiring a blend of sales and technical expertise. Coordinates resolution of product/service issues, upgrades, and problems. Interacts with top-level management at customer sites to assess major business processes and address product/service needs. Heavily involved in the overall sales process, pre-sales, the closing of sales, and post-sales support. Participates in sales presentation activities for key prospects and develops and delivers presentations to customer's top management. Requires Bachelor's degree (in technology, engineering or business discipline) or equivalent, and seven to nine years of related (engineering and/or sales) experience.

Labor Category	Description
Cyber Applications Systems Analyst/Programmer, Associate	<p>Assists in the research to develop or enhance information systems. Assists in the preparation of specifications from which programs will be written. Designs codes, tests, debugs, documents, and maintain programs. Diagrams information flow, showing source and distribution of all segments, processing elements, channels, and methods of entering corrections, and data retention requirements.</p> <p>Attends on-going training sessions to achieve a higher level of technical skill. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and zero to two years of related work experience.</p>
Cyber Applications Systems Analyst/Programmer, Staff	<p>Formulates and defines system scope and objectives to develop or modify moderately complex problems to develop or enhance information systems. Prepares detailed specifications from which programs will be written. Designs, codes, tests, debugs, documents, and maintains programs. Diagrams information flow, shows source and distribution of all segments, processes elements, channels, and methods of entering corrections, and data retention requirements. Requires Bachelor's degree or equivalent, and two to four years of related work experience.</p>
Cyber Applications Systems Analyst/Programmer, Senior	<p>Formulates and defines system scope and objectives. Establish procedures to solve complex problems regarding system equipment capacity and limitations, operating time and output. Prepare detailed specifications from which programs will be written and design, code, test, debug, and document newly written programs. Diagrams information flow, showing source and distribution of all segments, processing elements, channels, and methods of entering corrections, and data retention requirements. Perform at an advanced technical level on all phases of applications systems analysis and programming activities. May be responsible for the completion of a phase of a project. Provide guidance to less experienced analyst/programmers. Requires Bachelor's degree or equivalent, and five to seven years of related experience.</p>
Cyber Applications Systems Analyst/Programmer, Principal	<p>Formulates and defines system scope and objectives for assigned projects. Establishes procedures to solve complex problems regarding system equipment capacity and limitations, operating time and output. Prepares detailed specifications from which programs will be written and designs, codes, tests, debugs, and documents newly written programs. Diagrams information flow, showing source and distribution of all segments, processing elements, channels, and methods of entering corrections, and data retention requirements. Performs at an advanced technical level and has complete understanding of all phases of applications systems analysis and programming activities. Directs, provides guidance, and monitors the performance of less experienced analyst/programmers. Responsible for quality assurance review of assigned project. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and seven to nine years of related experience.</p>

Labor Category	Description
<p>Cyber Applications Systems Analyst/Programmer, Sr Principal</p>	<p>Formulates and defines system scope and objectives for assigned projects. Establishes procedures to solve complex problems regarding system equipment capacity and limitations, operating time and output. Prepares detailed specifications from which programs will be written. Designs, codes, tests, debugs, and documents newly written programs. Create detailed specifications from which programs will be written. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and ten to twelve years of related experience.</p>
Cyber Configuration Management Specialist, Associate	<p>Responsible for routine configuration control during the product development phase. May reviews design release documents for completeness, proper approvals and system updates, to ensure correct configuration modifications. Reviews contracts and drafts configuration plans to encompass all specification requirements. Assists in the maintenance of the database. Requires Bachelor's degree or equivalent, and zero to two years of related experience.</p>
Cyber Configuration Management Specialist, Staff	<p>Responsible for advanced configuration control during product development phase. Reviews design release documents for completeness, proper approvals and system updates, to ensure correct configuration modifications. Reviews contracts and drafts configuration plans to encompass all specification requirements. Assists in the maintenance of the database. May also be responsible for contract data submittal and status on smaller projects. Requires Bachelor's degree or equivalent, and two to four years of related experience.</p>
Cyber Configuration Management Specialist, Senior	<p>Designs and establishes management documentation. Authorizes the release of drawings, and software configuration changes specified by management and other functional groups. Provides advice and guidance on methods, procedures, and requirements to individuals responsible for the creation of documentation. Plans and implements methods to improve response. Participates in special studies. May provide work leadership for lower level employees.</p> <p>Under the guidance of a senior level analyst, performs data</p>

Labor Category	Description
	management tasks as required by contract. Requires Bachelor's degree or equivalent, and five to seven years of related experience.
Cyber Configuration Management Specialist, Principal	Designs and establishes management documentation. Authorizes the release of drawings, and software configuration changes specified by management and other functional groups. Provides advice and guidance on methods, procedures, and requirements to individuals responsible for the creation of documentation. Plans and implements methods to improve response. Participates in special studies. Provides work leadership for lower level employees. Performs data management tasks as required by contract. Requires Bachelor's degree or equivalent, and seven to nine years of related experience.
Cyber Configurations/Data Management Analyst Mgr	Establishes and maintains configuration and data management policies and procedures to be utilized by departmental personnel and other participating functions to ensure a standard and cost effective approach to the application of configuration and data management requirements. Organizes and implements the process of evaluating performance against established policies and procedures to ensure hardware and documentation integrity is being maintained at the least cost to the company and programs. Develops departmental operating budgets, productivity goals, and staffing levels. Provides the resources necessary to maintain the integrity of the Bills of Material Subsystem of the Manufacturing database. Requires Bachelor degree or equivalent experience, and ten to twelve years of experience in the application of MIL and DoD requirements and management experience.
Cyber Document Specialist, Associate	Oversees the Document Control (DC) policy system, working closely with technical writing, DC implementation and configuration management staff. Researches and makes recommendations for appropriate hardware and software required for the DC system. Develops and present DC training sessions. Requires Bachelor's degree (Engineering or Technical discipline) or equivalent; zero to two years of related experience.
Cyber Document Specialist, Staff	Oversees the Document Control (DC) policy system, working closely with technical writing, DC implementation and configuration management staff. Research and make recommendations for appropriate hardware and software required for the DC system. Develop and present DC training sessions. Requires Bachelor's degree (in Engineering or related field) and two to four years of related experience.
Cyber Document Specialist, Senior	Oversees the Document Control (DC) policy system, working closely with technical writing, DC implementation and configuration management staff. Researches and makes recommendations for appropriate hardware and software required for the DC system. Develops and presents DC training sessions. Requires Bachelor's degree (in Engineering or Technical field) or equivalent, and five to seven years of related experience.

Labor Category	Description
Cyber Document Specialist, Principal	Oversees the Document Control (DC) policy system, working closely with technical writing, DC implementation and configuration management staff. Researches and makes recommendations for appropriate hardware and software required for the DC system. Develops and presents DC training sessions. Requires Bachelor's degree (in engineering or technical field) or equivalent, and seven to nine years of related experience.
Cyber Functional Analyst, Associate	Analyzes factors and components of systems to recommend and institute changes to increase efficiency. Plan studies of work problems and procedures, such as organizational changes, communication, information flow, integrated production methods, or cost analysis. Performs systematic review of selected functions to determine application and design of systems or models. Prepares models of problem areas in the form of one of several equations. Utilizes mathematical models and management plans. Specifies manipulative and computational methods of formulation and uses data processing for solving equations, programming and processing. Prepares charts and diagrams to assist in problem analysis and submits recommendations for solutions. Writes specification manuals and user documentation for client or user personnel. Assists more senior level Functional Analysts in program design and analysis. Requires Bachelor's Degree in related field or equivalent experience and zero to two years of related experience.
Cyber Functional Analyst, Staff	Analyzes factors and components of systems to recommend and institute changes to increase efficiency. Plan studies of work problems and procedures, such as organizational changes, communication, information flow, integrated production methods, or cost analysis. Translates user requirements into system specifications, configuration management plans, life cycle management, documentation, and integrated logistics support plans and related operational summaries. Recommends improvements of modifications in sequence of operations, equipment utilization and related matters. Examines and analyzes current and contemplated operations for developing, defining, and coordinating user requirements which will satisfy the total program need. Gathers information from users, defines work problems, and designs a system and procedures to resolve problems. Interfaces with the user and participates in and conducts structured walk through. Writes specifications manuals and user documentation for client or user personnel. Assist more senior level Functional Analysts in the design, development, and analysis of logical and physical database design and maintenance. Requires Bachelor's Degree in related field or equivalent experience and two to four years of related experience.

Labor Category	Description
Cyber Functional Analyst, Senior	<p>Analyzes factors and components of systems to recommend and institute changes to increase efficiency. Plan studies of work problems and procedures, such as organizational changes, communication, information flow, integrated production methods, or cost analysis. Recommends improvements of modifications in sequence of operations, equipment utilization and related matters. Examines and analyzes current and contemplated operations for developing, defining, and coordinating user requirements which will satisfy the total program need. Translates user requirements into system specifications, configuration management plans, life cycle management documentation, and integrated logistics support plans and related operational summaries. Writes specifications manuals and user documentation for client or user personnel. Gathers information from users, defines work problems, and designs a system and procedures to resolve problems. May supervise and provide technical direction to lower level staff. Requires Bachelor's Degree in related field or equivalent and five to seven years of related experience.</p>
Cyber Functional Analyst, Principal	<p>Oversees the analysis of problems in terms of management information and conceptualizes proposals that afford maximum probability of profit or effectiveness in relation to cost or risk. Performs advanced and complex systematic reviews of selected functions to determine application and design of systems or models. Participates in various testing functions (i.e. string and acceptance tests) to verify that results are correct. Develops and updates functional or operating manuals outlining established methods of performing work in accordance with organizational policy. Trains clients or user personnel in the operation and capabilities of proposed models. Provides functional guidance on more complex projects. Requires Bachelor's Degree in related field or equivalent experience and seven to nine years of related experience.</p>
Cyber Functional Analyst, Senior Principal	<p>Serves as a company expert and oversees the analysis of the most complex problems in terms of management information and conceptualizes proposals that afford maximum probability of profit or effectiveness in relation to cost or risk. Performs very advanced and complex systematic reviews of selected functions to determine application and design of systems or models. Participates in various testing functions (i.e. string and acceptance tests) to verify that results are correct. Develops and updates functional or operating manuals outlining established methods of performing work in accordance with organizational policy. Trains clients or user personnel in the operation and capabilities of proposed models. Provides functional guidance on more complex projects. Requires Bachelor's Degree in related field or equivalent experience and ten to twelve years of related experience or Master's degree and seven to nine years of related experience.</p>

Labor Category	Description
Cyber Hardware Engineer, Associate	<p>Evaluates reliability of materials, properties and techniques used in production; plans, designs and develops electronic parts, components, integrated circuitry, mechanical systems, equipment and packaging, optical systems and/or DSP systems. Under direct supervision, designs and develops simple equipment, processes and systems that involve data networks, communications, and display. Analyzes equipment specifications and process requirements to conceive a practical design. Based on limited technical knowledge of assigned product line, few technical decisions are made. May prepare related installation guides and instructions. Requires Bachelor's degree in engineering or applied science, or equivalent and zero to two years of experience.</p>
Cyber Hardware Engineer, Staff	<p>Evaluates reliability of materials, properties and techniques used in production; plans, designs and develops electronic parts, components, integrated circuitry, mechanical systems, equipment and packaging, optical systems and/or DSP systems. Under general supervision, designs and develops equipment, processes and systems that involve data networks, communications, and display. Analyzes equipment specifications and process requirements to conceive a practical design. Meets with research engineers or scientists and customer representatives to resolve design problems. Based on extensive technical knowledge of assigned product line, develops solutions for design problems. Prepares related installation guides and instructions. Requires Bachelor's degree in engineering or applied science, or equivalent and two to four years of experience.</p>
Cyber Hardware Engineer, Senior	<p>Evaluates reliability of materials, properties and techniques used in production; plans, designs and develops electronic parts, components, integrated circuitry, mechanical systems, equipment and packaging, optical systems and/or DSP systems. Under general direction, designs and develops equipment, processes and systems that involve data networks, communications, and display. Analyzes equipment specifications and process requirements to conceive a practical design. Determines feasibility from technical and economic perspectives. Coordinates and consults with research engineers or scientists and customer representatives to resolve design problems. Develops and maintains technical procedures, documentation and manuals. Compiles and analyzes operational data and directs tests to establish standard for new designs or modifications to existing equipment, systems, or processes. May supervise the work of technicians and technologists who provide technical support. Requires Bachelor's degree in engineering or applied science, or equivalent and five to seven years of experience.</p>

Labor Category	Description
Cyber Hardware Engineer, Principal	Evaluates reliability of materials, properties and techniques used in production; plans, designs and develops electronic parts, components, integrated circuitry, mechanical systems, equipment and packaging, optical systems and/or DSP systems. Under general direction, designs and develops equipment, processes and systems that involve data networks, communications, and display. Analyzes equipment specifications and process requirements to conceive a practical design. Determines feasibility from technical and economic perspectives. Coordinates and consults with research engineers or scientists and customer representatives to resolve design problems. Develops and maintains technical procedures, documentation and manuals. Compiles and analyzes operational data and directs tests to establish standard for new designs or modifications to existing equipment, systems, or processes. May supervise technical support staff. Requires Bachelor's degree in engineering or applied science, or equivalent and seven to nine years of related experience.
Cyber Hardware Engineer, Senior Principal	Evaluates reliability of materials, properties and techniques used in production; plans, designs and develops electronic parts, components, integrated circuitry, mechanical systems, equipment and packaging, optical systems and/or DSP systems. Serves as lead engineer, designs and develops equipment, processes and systems that involve data networks, communications, and display. Analyzes equipment specifications and process requirements to conceive a practical design. Determines feasibility from technical and economic perspectives. Coordinates and consults with research engineers or scientists and customer representatives to resolve design problems. Develops and maintains technical procedures, documentation and manuals. Compiles and analyzes operational data and directs tests to establish standard for new designs or modifications to existing equipment, systems, or processes. May supervise the work of technicians and technologists who provide technical support. Requires Bachelor's degree in engineering or applied science, or equivalent and ten to twelve years of experience.
Cyber Hardware Engineering Manager	Manages a work group composed of eight to ten design engineers engaged in a variety of hardware engineering activities. Has responsibility for all phases of project planning and control including schedules, budgets, resource allocation, and results. Decisions are not usually subject to review. Performance is evaluated based on adherence to time schedules, budgets, soundness of approach, and general effectiveness. Requires Bachelor's degree (in a related field) or equivalent, and ten to twelve years of related (engineering and management) experience or Master's degree (in Technology or Math) and seven to nine years of related experience.

Labor Category	Description
<p>Cyber Information Security Engineer, Associate</p>	<p>Defines, plans, designs, and evaluates information security systems. Assesses architecture and current hardware limitations, defines and designs system specifications, input/output processes and working parameters for hardware/software compatibility. Experience with information networks design, operation, equipment.</p> <p>Interest/aptitude for information security work. Works under of direction of more experienced information security engineer.</p> <p>Requires Bachelor's degree in related discipline (engineering, computer science or related discipline) and zero to two of related experience.</p>
<p>Cyber Information Security Engineer, Staff</p>	<p>Defines, plans, designs, and evaluates information security systems. Assesses architecture and current hardware limitations, defines and designs system specifications, input/output processes and working parameters for hardware/software compatibility. Basic familiarity with information network elements – routers, firewalls, etc. Ability to apply technical knowledge to information security designs.</p> <p>Designs and conducts tests of designs and architectures. Requires Bachelor's degree in (field mathematics, telecommunications, electrical engineering, computer engineering, computer science) or related discipline, and two to four years' related experience.</p>
<p>Cyber Information Security Engineer, Senior</p>	<p>Defines, plans, designs, and evaluates information security system. Assesses architecture and current hardware limitations, defines and designs system specifications, input/output processes and working parameters for hardware/software compatibility. Designs and conducts tests of designs and architectures. Leads and guides less experienced engineers. Capable of independent management of projects. Requires Bachelor's degree (in field mathematics, telecommunications, electrical engineering, computer engineering, computer science) or equivalent and five to seven years experience with information networks and the security aspects.</p>
<p>Cyber Information Security Engineer, Principal</p>	<p>Defines, plans, designs, and evaluates information security systems. Assesses architecture and current hardware limitations, defines and designs system specifications, input/output processes and working parameters for hardware/software compatibility. Performs a variety of complex tasks associated with information security ranging from the design of security components to complex architectures.</p> <p>Supervises the work of other engineers performing a variety of information security tasks. Capable of independent program supervision. Requires Bachelor's degree (in field mathematics, telecommunications, electrical engineering, computer engineering, computer science) or equivalent and seven to nine years related experience.</p>

Labor Category	Description
Cyber Information Security Engineer, Sr Principal	<p>Defines, plans, designs, and evaluates information security systems. Assesses architecture and current hardware limitations, defines and designs system specifications, input/output processes and working parameters for hardware/software compatibility. Provides expert level consultation and technical services on all aspects of Information Security. Manages large-scale programs of national or international scope. Maintains senior affiliations with national and international organizations associated with information security. Requires Bachelor's degree or equivalent and ten to twelve years related experience or Master's degree with seven to nine years of experience field mathematics, telecommunications, electrical engineering, computer engineering, computer science.</p>
Cyber Information Security Specialist, Associate	<p>Knowledge of information system administration and information network software/hardware including firewalls and intrusion detection systems. Basic familiarity with information security procedures. Safeguards network against unauthorized infiltration, modification, destruction or disclosure. May research, evaluate, test, recommends communicate and implement new security software or devices. Implements, enforces, communicates and develops security policies or plans for data, software applications, hardware, and telecommunications. Provides information to management regarding the negative impact caused by theft, destruction, alteration or denial of access to information. Requires Bachelor's degree in related discipline (engineering, computer science or related discipline) and zero to two of related experience.</p>
Cyber Information Security Specialist, Staff	<p>Knowledge and experience with information network security equipment. Understanding of information network threats such as computer viruses. Tests and operates firewalls, intrusion detection systems, enterprise anti-virus systems and software deployment tools. Safeguards the network against unauthorized infiltration, modification, destruction or disclosure. May research, evaluate, test, recommends communicate and implement new security software or devices. Implements, enforces, communicates and develops security policies or plans for data, software applications, hardware, and telecommunications. Provides information to management regarding the negative impact caused by theft, destruction, alteration or denial of access to information. Provides recommendations on information assurance engineering standards, implementation dependencies, and changing information assurance related technologies. Requires Bachelor's degree in (field mathematics, telecommunications, electrical engineering, computer engineering, computer science) or related discipline, and two to four years' related experience or Certification in systems administrator, network certification, etc. six to eight years of experience.</p>

Labor Category	Description
<p>Cyber Information Security Specialist, Senior</p>	<p>Manages the company's firewalls and intrusion detection systems. Develops, tests, and operates firewalls, intrusion detection systems, enterprise anti-virus systems and software deployment tools. Safeguards the network against unauthorized infiltration, modification, destruction or disclosure. May research, evaluate, test, recommends communicate and implement new security software or devices. Implements, enforces, communicates and develops security policies or plans for data, software applications, hardware, and telecommunications. Provides information to management regarding the negative impact caused by theft, destruction, alteration or denial of access to information. Provides recommendations on information assurance engineering standards, implementation dependencies, and changing information assurance related technologies. Manages the company's firewalls and intrusion detection systems. Develops, tests, and operates firewalls, intrusion detection systems, enterprise anti-virus systems and software deployment tools. Safeguards the network against unauthorized infiltration, modification, destruction or disclosure. Researches, evaluates, tests, recommends communicate and implement new security software or devices. Implements, enforces, communicates and develops security policies or plans for data, software applications, hardware, and telecommunications. Provides information to management on the negative impact caused by theft, destruction, alteration or denial of access to information. Provides recommendations on information assurance engineering standards, implementation dependencies, and changing information assurance related technologies. May supervise lower level staff. Requires Bachelor's degree or equivalent and five to seven years related experience.</p>
<p>Cyber Information Security Specialist, Principal</p>	<p>Manages extensive evaluations of major information security networks, prepares evaluation reports, presents recommendations. Conducts trade off analyses of products for clients to determine optimal informant security solutions. Provides consulting services on a wide variety of information assurance topics. Prepares remedial options and supervise correction of information security shortfalls. Works independently in expert role at customer site. Requires Bachelor's degree or equivalent and seven to nine years of directly related experience.</p>
<p>Cyber Information Security Specialist, Sr Principal</p>	<p>Functions as expert consultant in all aspects of information security. Prepares in-depth studies and analyses. Manages major information security efforts. Maintains affiliation with national/international organizations. Functions on broad scope programs of national/international basis. Capable of fully independent work in support of a customer either on site or of-site. Requires Bachelor's degree or equivalent and ten to twelve years related experience or Master's degree with seven to nine years of experience field mathematics, telecommunications, electrical engineering, computer engineering, computer science.</p>

Labor Category	Description
Cyber Information Technology Manager	Analyzes complex local and wide area network systems, including planning, designing, evaluating, selecting operating systems and protocol suites and configuring communication media with concentrators, bridges, and other devices. Resolves difficult inter-operability problems to obtain operation across all platforms, including e-mail, files transfer, multimedia, teleconferencing and the like. Configures systems to user environments. Supports acquisition of hardware and software as well as subcontractor services. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and ten to twelve years of related (progressively responsible network systems engineering) experience and management experience. Master's degree in Computer Science preferred.
Cyber Information Technology Scientist	Analyzes complex local and wide area network systems, including planning, designing, evaluating, selecting operating systems and protocol suites and configuring communication media with concentrators, bridges, and other devices. Resolves difficult inter-operability problems to obtain operation across all platforms, including e-mail, files transfer, multimedia, teleconferencing and the like. Configures systems to user environments. Supports acquisition of hardware and software as well as subcontractor services. Serves as manager or industry-recognized expert. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and twelve to fifteen years of related (progressively responsible network systems engineering) experience and management experience or Master's degree in Computer Science with nine to eleven years of related experience.
Cyber Information Technology Senior Scientist	Directs all aspects of the local and wide area network systems, including planning, designing, evaluating, selecting operating systems and protocol suites and configuring communication media with concentrators, bridges, and other devices. Resolves difficult and complex inter-operability problems to obtain operation across all platforms, including e-mail, files transfer, multimedia, teleconferencing and the like. Analyzes and configures systems to user environments. Supports acquisition of hardware and software as well as subcontractor services. Serves as in-house and industry recognized expert. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and sixteen plus years of related network systems engineering experience. Master's degree in Computer Science preferred.
Cyber Information Technology Supervisor	Responsible for the supervision and direction of a group of Information Systems professionals. Coordinates the activities of the group to meet objectives, deadlines, budgets, and coordinate/resolve customer requests. Serves as the technical specialist for the area of assigned responsibility, provides training and guidance of assigned staff. Requires Bachelor's degree (in a technical discipline) or equivalent, and seven to nine years of related experience.

Labor Category	Description
<p>Cyber LAN/WAN Engineer, Associate</p>	<p>Performs as entry level engineer in some of the following area: local and wide area networking, communications, and related software/hardware within a multi-platform operating environment. Works in integration of a total network including the planning, design, installation, maintenance, management, and coordination of the corporate LAN/WAN. Learns in areas of technological developments and applications. Recommend network security and policies. May work with Voice and/or Data Communications Analyst. Requires Bachelor degree or equivalent in Computer Science or a related field, and zero to two years of relevant experience.</p>
<p>Cyber LAN/WAN Engineer, Staff</p>	<p>Perform as mid-level contributor with knowledge and experience in local and wide area networking, communications, and related software/hardware within a multi-platform operating environment. Responsible for the integration of a network including assisting in the planning, design, installation, maintenance, management, and coordination of the corporate LAN/WAN. Current on most technological developments and applications, and helps to evaluate vendor products to make recommendations for purchase. May work with Voice and/or Data. Requires Bachelor degree or equivalent (Computer Science or a related field), and two to four years of relevant experience.</p>
<p>Cyber LAN/WAN Engineer, Senior</p>	<p>Perform as a senior technical participant with knowledge and experience in local and wide area networking, communications, and related software/hardware within a multi-platform operating environment. Responsible for the integration of a total network including the planning, design, installation, maintenance, management, and coordination of the corporate LAN/WAN. Current on technological developments and applications, and evaluate vendor products to make recommendations for purchase. Recommend network security and policies. May work with Voice and/or Data Communications Analyst. Requires Bachelor's degree or equivalent in Computer Science or a related field, and five to seven years of relevant experience are required.</p>
<p>Cyber LAN/WAN Engineer, Principal</p>	<p>Perform as a technical expert with advanced knowledge and experience in local and wide area networking, communications, and related software/hardware within a multi-platform operating environment. Responsible for the overall integration of a total network including the planning, design, installation, maintenance, management, and coordination of the corporate LAN/WAN. Current on technological developments and applications, and evaluate vendor products to make recommendations for purchase. Recommend network security and policies. May work with Voice and/or Data Communications Analyst. Requires Bachelor's degree or equivalent in Computer Science or a related field, and seven to nine years of relevant experience are required.</p>

Labor Category	Description
Cyber LAN/WAN Engineer, Senior Principal	Perform as the most senior technical expert with advanced knowledge and experience in local and wide area networking, communications, and related software/hardware within a multi-platform operating environment. Responsible for the overall integration of a total network including the planning, design, installation, maintenance, management, and coordination of the corporate LAN/WAN. Current on technological developments and applications, and evaluate vendor products to make recommendations for purchase. Recommend network security and policies. May work with Voice and/or Data Communications Analyst. Requires Bachelor's degree or equivalent in Computer Science or a related field, and ten to twelve years of related experience.
Cyber Network Administrator, Associate	Designs, installs, maintain and coordinate the use of the network system. Evaluates hardware, software and peripheral equipment. Manages network performance to maintain high quality transmission service on the network. Maintains, create/deletes user accounts, maintains and updates system security plans on all platforms. Implements and coordinates network policies, procedures and standards. Enforces security procedures. Supervises and schedules the network technician staff and trains users. Performs other duties as assigned which may require specific physical abilities. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and zero to two years of related experience.
Cyber Network Administrator, Staff	Designs, installs, maintain and coordinate the use of the network system. Evaluates hardware and software and peripheral equipment for simple networks. Manages network performance. Troubleshoots and resolves problems to ensure quality transmission service on the network. Maintains, creates/deletes user accounts, maintains and updates system security plans on most platforms. Administers network policies, procedures and standards. Enforces security procedures. Performs other duties as assigned which may require specific physical abilities. Requires Bachelor's degree (in Computer Science or Management Information Systems) or equivalent, and two to four years of related (data center environment) experience.
Cyber Network Administrator, Senior	Designs, installs, maintains and coordinates the use of the network system. Evaluates hardware and software and peripheral equipment for large, complex networks. Manages network performance. Troubleshoots and resolves complex problems to ensure quality transmission service on the network. Maintains user accounts, maintains and updates system security plans on all platforms. Implements and coordinates network policies, procedures and standards. Enforces security procedures. May supervise and schedule the Network Technician staff and trains users. Performs other duties as assigned which may require specific physical abilities. Requires Bachelor's degree (in Computer Science or

Labor Category	Description
	Management Information Systems) or equivalent, and five to seven years of related (data center environment) experience.
Cyber Network Administrator, Principal	<p>Serves as in-house expert to design, install, maintain and coordinate the use of the network system. Evaluates complex hardware and software and peripheral equipment for large, complex networks. Manages network performance. Troubleshoots and resolves complex problems to ensure quality transmission service on the network. Manages and maintains, create/deletes user accounts, maintains and updates system security plans on all platforms. Implements and manages network policies, procedures and standards. Enforces security procedures. Supervises and schedules the Network Technician staff and trains users. Performs other duties as assigned which may require specific physical abilities. Requires Bachelor's degree (in Computer Science or Management Information Systems) or equivalent, and seven to nine years of related (data center environment) experience.</p>
Cyber Network Administrator, Senior Principal	<p>As a recognized industry expert manages the company's designs, installation, and maintains and coordinates the use of the network system. Evaluates complex hardware and software and peripheral equipment for large, complex networks. Manages network performance. Troubleshoots and resolves complex problems to ensure quality transmission service on the network. Manages and maintains, create/deletes user accounts, maintains and updates system security plans on all platforms. Implements and manages network policies, procedures and standards. Enforces security procedures. Manages and schedules the Network Technician staff and develops the training for users. Requires Bachelor's degree (in Computer Science or Management Information Systems) or equivalent, and ten to twelve years of related (data center environment) experience.</p>
Cyber Network Engineer, Associate	<p>Evaluates, designs, documents, installs, implements, tests, and performs problem isolation and resolution. Monitors, tunes, sets standards and maintain a range of computer network components and systems. Performs these functions across a limited range of network facilities including some, but not all, physical media, protocol stacks, hubs, routers, bridges, gateways, digital servers, line drivers, telecommunications transport facilities, mainframe VTAM, NCP and related software and hardware, and network management components. Utilizes monitoring, performance analysis, network management, software and hardware equipment to troubleshoot and isolate problems, gauge network performance, and trace data and protocol activity. Requires Bachelor's degree (in Computer Science, Math or Engineering) or equivalent, and zero to two years of related experience.</p>

Labor Category	Description
Cyber Network Engineer, Staff	<p>Evaluates, designs, documents, installs, implements, tests, performs problem isolation and resolution. Monitors, tunes, sets standards and maintain a range of computer network components and systems. Performs these functions across most of the network facilities including physical media, protocol stacks, hubs, routers, bridges, gateways, digital servers, line drivers, telecommunications transport facilities, mainframe VTAM, NCP and related software and hardware, and network management components. Provides client consulting and training on the interfacing and use of the network facilities. Begins to plan research, evaluate, and recommend new computer network equipment and technologies. Utilizes monitoring, performance analysis, network management, software and hardware equipment to troubleshoot and isolate problems, gauge network performance, and trace data and protocol activity. Devises solutions to moderately complex operational problems within the capacity and operational limitations of installed equipment. Requires Bachelor's degree (in Computer Science, Math or Engineering) or equivalent, and two to four years of related experience.</p>
Cyber Network Engineer, Senior	<p>Evaluates, designs, documents, installs, implements, tests, performs problem isolation and resolution, monitors, tunes, and sets standards. Maintains a complex range of computer network components and systems. Performs these functions across a wide range of network facilities including physical media, protocol stacks, hubs, routers, bridges, gateways, digital servers, line drivers, telecommunications transport facilities, mainframe VTAM, NCP and related software and hardware, and network management components. Provides client consulting and training on the interfacing and use of the network facilities. Plans and coordinates computer network initiatives. Researches, evaluates, and recommends new computer network equipment and technologies. Utilizes monitoring, performance analysis, network management, software and hardware equipment to trouble shoot and isolate problems, gauge network performance, and trace data and protocol activity. Devises solutions to operational problems within the capacity and operational limitations of installed equipment. Develops and executes contingency plans for network software and hardware failures including isolated and major outages. Provides internal consulting, technical guidance, information and support to application developers, computer operations, workstation support, company management and departmental clients. Requires Bachelor's degree in (Computer Science, Math or Engineering) or equivalent, and five to seven years of related experience.</p>

Labor Category	Description
	Science, Engineering, Economics or Math) or equivalent, and ten to twelve years of related telecommunication analysis experience.
Cyber Network Engineering Senior Manager	Oversees the Network Engineering activities. Reviews and prioritizes network needs and analyzes project costs and feasibility. Develops network analysis standards and methodology consistent with technical requirements. Schedules staff to obtain proper response in a timely manner. Reviews recommendations for network improvement. Requires Bachelor's degree or equivalent and twelve to fifteen years of experience or Master's degree in related field and nine to eleven years of experience, including seven to nine years of management experience.
Cyber Program Control Analyst, Associate	Assists in providing on-site project management/administrative support and coordination to a complex contract, project task(s) or business unit. Duties may include contract accounting and reporting, project schedule focus to management, tracking annual fiscal plans and monthly updates, payroll/personnel processing, maintenance and reporting, contract administration, purchasing, facility leasing and service administration. Maintains contract budgets, prepares contract billing, estimates materials, equipment, production costs and delivery schedules. Oversees personnel records, facility administration and purchases equipment and supplies. Requires Bachelor's degree (in Business Administration) or equivalent, and zero to two years of related (project support or management) experience.
Cyber Program Control Analyst, Staff	Provides on-site project management/administrative support and coordination to a complex contract, project, task(s) or business unit. Duties may include contract accounting and reporting, project schedule focus to management, tracking annual fiscal plans and monthly updates, payroll/personnel processing, maintenance and reporting, contract administration, purchasing, facility leasing and service administration. Maintains contract budgets, prepares contract-billing, estimates materials, equipment, production costs and delivery schedules. Oversees personnel records, facility administration and purchases equipment and supplies. Requires Bachelor's degree (in Business Administration) or equivalent, and two to four years of related (project support or management) experience.
Cyber Program Control Analyst, Senior	Provides senior level on-site project management/administrative support and coordination to a complex contract, project, task(s) or business unit. Duties may include contract accounting and reporting, project schedule focus to management, tracking annual fiscal plans and monthly updates, payroll/personnel processing, maintenance and reporting, contract administration, purchasing, facility leasing and service administration. Maintains contract budgets, prepares contract-billing, estimates materials, equipment, production costs and delivery schedules. Oversees personnel records, facility administration and purchases equipment and supplies. Requires Bachelor's degree (in Business Administration)

Labor Category	Description
	or equivalent, and five to seven years of related (project support or management) experience.
Cyber Program Control Analyst, Lead	Provides senior level on-site project management/administrative support and coordination to a complex contract, project, task(s) or business unit. Duties may include contract accounting and reporting, payroll/personnel processing, project schedule focus to management, tracking annual fiscal plans and monthly updates, maintenance and reporting, contract administration, purchasing, facility leasing and service administration. Maintains contract budgets, prepares contract-billing, estimates materials, equipment, production costs and delivery schedules. Oversees personnel records, facility administration and purchases equipment and supplies. Requires Bachelor's degree (in Business Administration) or equivalent, and seven to nine years of related (project management) experience.
Cyber Program Control Manager	Manages assigned group of Program Control Analysts who provide on-site administrative support and coordination to various contract(s), project(s), task(s) or business unit (s). Duties may include the management of contract accounting and reporting, payroll/personnel processing, maintenance and reporting, contract administration, purchasing, facility leasing and service administration. Maintains contract budgets, prepares contract billing, estimates materials, equipment, production costs and delivery schedules. Oversees personnel records, facility administration and purchases equipment and supplies. Participates in introducing the Company operating standards, Plans objectives and goals for staff and selects and trains new employees. Requires Bachelor's degree (in Business Administration) or equivalent, and ten to twelve years of related (project support and supervisory/management) experience.
Cyber Security Engineer, Associate	Monitors, evaluates, and maintains systems and procedures to protect the data systems and databases from unauthorized users. Identifies potential threats and responds to reported security violations. Determines causes of security breaches. Researches, recommends, and implements changes to procedures to protect data from future violations. Assist in educating users on security procedures. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and zero to two years of related experience.
Cyber Security Engineer, Staff	Monitors, evaluates, and maintains systems and procedures to protect the data systems and databases from unauthorized users. Identifies potential threats and responds to reported security violations. Determines causes of security breaches. Researches, recommends, and implements changes to procedures to protect data from future violations. Assists in educating users on security procedures. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and two to four years of related experience.

Labor Category	Description
Cyber Security Engineer, Senior	<p>Monitors, evaluates, and maintains systems and procedures to protect the data systems and databases from unauthorized users. Identifies potential threats and responds to reported security violations. Determines causes of security breaches. Researches, recommends, and implements changes to procedures to protect data from future violations. Assists in educating users on security procedures. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and five to seven years of related work experience.</p>
Cyber Security Engineer, Principal	<p>Monitors, evaluates, and maintains systems and procedures to protect the data systems and databases from unauthorized users. Identifies potential threats and respond to reported security violations. Determines causes of security breaches. Researches, recommends, and implements changes to procedures to protect data from future violations. May train and develop subordinates through varied project assignments. Assists in educating users on security procedures. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and seven to nine years of related experience.</p>
Cyber Security Engineer, Sr Principal	<p>Serves as a company expert in monitoring, evaluating, and maintaining systems and procedures to protect the data systems and databases from unauthorized users. Identifies potential threats and responds to reported security violations. Determines causes of security breaches. Researches, recommends, and implements changes to procedures to protect data from future violations. Educates users on security procedures. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and ten to twelve years of related experience.</p>
Cyber Software Developer, Associate	<p>Performs maintenance on existing software products. Assists in coding, testing, and debugging new software or making enhancements to existing software. Writes programs according to specifications from higher-level personnel. Suggests solutions for problems or software enhancements. May assist in the development of user manuals and work with technical staff to learn and understand problems with software. Attends on-going training sessions to achieve a higher level of technical skill. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and zero to two years of related work experience.</p>
Cyber Software Developer, Staff	<p>Develops, codes, tests, and debugs new software or enhancements to existing software. Possesses a good understanding of business applications. Works with technical staff to understand and resolve software problems, resolves customer complaints with software and responds to suggestions for software modifications or enhancements. May be involved in the development of software user manuals and demonstrate software. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and two to four years of related experience.</p>

Labor Category	Description
Cyber Software Developer, Senior	Performs as a technical expert in the design development, coding, testing, and debugging new software or complex enhancements to existing software. Works with technical staff to understand and to develop resolution of software problems. Resolves customer complaints with software and respond to suggestions for software modifications or enhancements. Participates in the development of software user manuals. Assists in the training of less experienced software development staff and may act as a team leader on less complex projects. Requires Bachelor's degree (in Computer Science or related field) or equivalent and five to seven years of related experience.
Cyber Software Developer, Principal	Performs as the technical expert with thorough understanding of the business application of an assigned project. Performs as a project lead with the responsibility for the instruction, assigning, direction, and monitoring of the performance of assigned software developers working on a specific project. Assists in the scheduling and coordinating of projects and may be involved in the design phase of a project. Works with customers and technical staff in the resolution of software problems and respond to suggestions for software modifications or enhancements. Participates in the development of software user manuals. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and seven to nine years of related experience.
Cyber Software Developer, Senior Principal	As a senior staff member, performs as the technical expert with thorough understanding of the business application of an assigned project. Perform as a project lead with the responsibility for the instruction, assigning, direction, and monitoring of the performance of assigned software developers working on a specific project. Assist in the scheduling and coordinating of projects and may be involved in the design phase of a project. Work with customers and technical staff in the resolution of software problems and respond to suggestions for software modifications or enhancements. Participate in the development of software user manuals. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and ten to twelve years of related experience.
Cyber Software Engineer, Associate	Assists in designing, developing, troubleshooting, and analyzing software programs for computer-based systems. Assists in evaluating/determining user needs with the maintenance of single-product models and subsystems. Performs routine systems modeling, simulation, and analysis. Designs and develops compilers, assemblers, utility programs, and operating systems. As required, provides inputs for documentation of new or existing programs. Primarily interfaces with intra-organizational staff with infrequent contact with inter-organizational staff and outside customers and vendors on routine matters. Requires Bachelor's degree (in Engineering, Computer Science or related field) or equivalent, and zero to two years of related experience.

Labor Category	Description
Cyber Software Engineer, Staff	<p>Designs, develops, troubleshoots, and analyzes software programs for computer based systems. Performs systems modeling, simulation, and analysis. Designs and develops compilers, assemblers, utility programs, and operating systems. As required, provides inputs for documentation of new or existing programs. Primarily interfaces with intra-organizational staff with infrequent contact with inter-organizational staff and outside customers and vendors on routine matters. Requires Bachelor's degree (in Engineering, Computer Science or related field) or equivalent, and two to four years of related experience.</p>
Cyber Software Engineer, Senior	<p>Performs subsystem definition, preliminary and detailed design, design implementation, subsystem and system integration, and tests for a subsystem. Participates in software requirements review, preliminary and critical design reviews, integration readiness review, and software acceptance reviews. Researches problems discovered by quality assurance or product support and develops solutions to the problems. Supports proposal efforts. Frequent inter-organizational and outside customer contacts. Represents the organization in providing solutions to difficult technical problems associated with specific projects. Requires Bachelor's degree (in Engineering, Computer Science or related field) or equivalent, and five to seven years of related work experience.</p>
Cyber Software Engineer, Principal	<p>Performs system and subsystem definition, preliminary and detailed design, design implementation, and subsystem and system integration and tests for a system. Participates in software requirement review, preliminary and critical design, integration readiness review, and software acceptance review. Acts as technical lead for pre-proposal, proposal, and existing program efforts. Involvement in business development includes briefing customers on company capabilities. Supports program management office in technical role. Represents the organization as the prime customer contact on contracts or projects. May research the marketing requirements for a product, including target environment, performance criteria, and competitive issues. Interacts with senior customer personnel on significant technical matters, often requiring coordinated activity across organizational lines. May provide technical guidance to lower level software engineers. Requires Bachelor's degree (in Engineering, Computer Science or related field) or equivalent, and seven to nine years of related experience.</p>

Labor Category	Description
<p>Cyber Software Engineer, Sr Principal</p>	<p>Serves as a company expert in performing system and subsystem definition, preliminary and detailed design, design implementation, and subsystem and system integration and tests for a system. Participates in software requirement review, preliminary and critical design, integration readiness review, and software acceptance review. Acts as technical lead for pre-proposal, proposal, and existing program efforts. Involvement in business development includes briefing customers on company capabilities. <p>Cyber Software QA Specialist, Associate</p>	<p>Executes test scripts to ensure that quality software is provided for release to production. May also write, create, and modify test scripts to certify system changes, under close supervision. Reviews requirements, specifications and documentation to gain a thorough understanding of the programs and processes to be certified. Provides or validates estimates for assigned tasks. Develops test control databases. Maintains test databases and ensures their integrity and currency. Distributes test data from control database to development staff to satisfy adequate unit testing. Assists with configuration management tasks on a project (test scripts, source code control, coordination of requirement changes) as required. May write trace-ability matrices and test reports. May perform minor program changes or develop software programs as required. Requires Bachelor's degree or equivalent, and zero to two years of related experience.</p>
<p>Cyber Software QA Specialist, Staff</p>	<p>Executes test scripts to ensure that quality software is provided for release to production. May write test scripts. Reviews requirements, specifications and documentation to gain a thorough understanding of the programs and processes to be certified. Provides or validates estimates for assigned tasks. Under moderate supervision, creates and modifies test scripts to certify system changes. Develops test control databases. Maintains test databases and ensures their integrity and currency. Distributes test data from control database to development staff to satisfy adequate unit testing. Assists with configuration management tasks on a project (test scripts, source code control, coordination of requirement changes) as required. Releases completed projects into production. May write trace-ability matrices and test reports. May perform minor program changes or develop software programs as required. Requires Bachelor's degree or equivalent, and two to four years of related experience.</p>

Labor Category	Description
Cyber Software QA Specialist, Senior	<p>Ensures that quality software is provided for release to production by independently executing test scripts. Writes test scripts. Reviews requirements, specifications and documentation to gain a thorough understanding of the programs and processes to be certified.</p> <p>Provides or validates estimates for assigned tasks. Creates and modifies test scripts to certify system changes. Develops test control databases. Maintains test databases and ensures their integrity and currency. Distributes test data from control database to development staff to satisfy adequate unit testing. Assists with configuration management tasks on a project (test scripts, source code control, coordination of requirement changes) as required. Releases completed projects into production. May write trace-ability matrices and test reports. May perform program changes or develop software programs as required. Requires Bachelor's degree or equivalent, and five to seven years of related experience.</p>
Cyber Software QA Specialist, Principal	<p>Executes test scripts to ensure that quality software is provided for release to production. Develops test scripts. Reviews requirements, specifications and documentation to gain a thorough understanding of the programs and processes to be certified. Provides or validates estimates for assigned tasks. Creates and modifies test scripts to certify system changes. Develops test control databases. Maintains test databases and ensures their integrity and currency. Distributes test data from control database to development staff to satisfy adequate unit testing. Assists in developing the configuration management tasks on a project (test scripts, source code control, coordination of requirement changes) as required. Releases completed projects into production. Writes trace-ability matrices and test reports. Performs major program changes or develops software programs. Requires Bachelor's degree or equivalent, and seven to nine years of related experience.</p>
Cyber Software QA Specialist, Sr Principal	<p>Ensures that quality software is provided for release to production by independently executing test scripts. May supervise more junior staff in writing test scripts. Develops and reviews requirements, specifications and documentation to provide staff and users with a thorough understanding of the programs and processes to be certified. Provides estimates for assigned tasks. As lead QA specialist, creates and modifies test scripts to certify system changes. Develops test control databases. Maintains test databases and ensures their integrity and currency. Distributes test data from control database to development staff to satisfy adequate unit testing. Defines configuration management tasks on a project (test scripts, source code control, coordination of requirement changes) as required. Releases completed projects into production. Helps develop trace-ability matrices and test reports. Performs all major program changes or oversees the development software programs as required. Requires Bachelor's degree or equivalent, and ten to twelve years of related experience.</p>

Labor Category	Description
Cyber Subject Matter Expert	<p>Serves as experienced consultant with experience in supporting large projects related to the individual subject matter expertise. Beginning expertise in functional domains such as finance, personnel, acquisition, etc. Performs research, collection, collation and compilation of data, and preparation of inputs into larger reports. Evaluates and interprets findings. Prepares finished products for review by team leader or higher level analysts. Interfaces with external entities to collect data. Uses and/or develops computer tools to facilitate analysis tasks. Prepares monthly status reports. May be assigned to customer site. May prepare and present briefings. Requires Bachelor's degree in Business, Engineering, Management Sciences, Computer Science, Information Systems, Social Science, Education, Human Resources Development, and Psychology or other related disciplines and eight to ten years of experience or Master's degree and six to eight years of related experience or PhD and four to six years of related experience.</p>
Cyber Subject Matter Expert, Senior	<p>Serves as experienced consultant with experience in supporting large projects related to the individual subject matter expertise. Prepares and delivers presentations to colleagues, subordinates, and government representatives. Assures the proper use of current or requested programming, testing and documentation techniques. Produces, reviews and documents reflecting knowledge of areas as identified in the statement of work. Requires Bachelor's degree in Business, Engineering, Management Sciences, Computer Science, Information Systems, Social Science, Education, Human Resources Development, and Psychology or other related disciplines and ten to twelve years of experience or Master's degree and eight to ten years of related experience or PhD and five to seven years of related experience.</p>
Cyber Subject Matter Expert, Principal	<p>Relevant experience includes supporting large projects related to the individuals subject matter expertise. Advanced expertise in functional domains such as finance, personnel, acquisition, etc. Experience as a Project Manager. Prepares and delivers presentations to colleagues, subordinates, and government representatives. Assures the proper use of current or requested programming, testing and documentation techniques. Produces and/or reviews substantive and/or complex documentation reflecting detailed knowledge of areas as identified in the statement of work. Requires Bachelor's degree in Business, Engineering, Management Sciences, Computer Science, Information Systems, Social Science, Education, Human Resources Development, and Psychology or other related disciplines and twelve to fifteen years of experience or Master's degree and ten to twelve years of related experience or PhD and eight to nine years of related experience. Requires Bachelor's degree in Business, Engineering, Management Sciences, Computer Science, Information Systems, Social Science, Education, Human Resources development, and</p>

Labor Category	Description
	Psychology or other related disciplines and twelve to fifteen years of experience or Master's degree and ten to twelve years of related experience or PhD and eight to nine years of related experience.
Cyber Subject Matter Expert, Senior Principal	Renowned expertise in functional domains such as finance, personnel, acquisition, etc. or technical disciplines such as computer security, network engineering, etc. Extensive experience as technical leaders and senior Project Managers. Prepares and delivers presentations to colleagues, subordinates, and government representatives. Assures the proper use of current or requested testing and documentation techniques. Produces, reviews substantive and complex documentation reflecting detailed knowledge of areas as identified in the statement of work. Requires Bachelor's degree in Business, Engineering, Management Sciences, Computer Science, Information Systems, Social Science, Education, Human Resources Development, and Psychology or other related disciplines, fifteen plus years of experience; or Master's degree, twelve plus years of related experience; or PhD, ten plus years of related experience and project management experience.
Cyber Systems Administrator, Associate	Maintains data files and control procedures for a system of networked computers or for a single group of microcomputers linked to a host workstation, or mainframe. Responsible for system security and data integrity. Assigns passwords and monitors use of resources, backs up files as required and responds to management requests for information. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and zero to two years of related experience.
Cyber Systems Administrator, Staff	Maintains data files and control procedures for a complex system of networked computers or for a single group of microcomputers linked to a host workstation, or mainframe. Monitors system security and data integrity. Assigns passwords and monitors use of resources, backs up files as required and responds to management requests for information. Performs other duties as assigned which may require specific physical abilities. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and two to four years of related experience.
Cyber Systems Administrator, Senior	Maintains data files and control procedures for a complex system of networked computers or for a single group of microcomputers linked to a host workstation, or mainframe. Responsible for system security and data integrity. Assigns passwords and monitors use of resources, backs up files as required and responds to management requests for information. Provides technical guidance to lesser-experienced systems administrators. Performs other duties as assigned which may require specific physical abilities. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and five to seven years of related experience.

Labor Category	Description
Cyber Systems Administrator, Principal	Maintain data files and control procedures for a complex system of networked computers or for a single group of microcomputers linked to a host workstation, or mainframe. Responsible for system security and data integrity. Assigns passwords and monitors use of resources, backs up files as required and works with management to define requests for information. Provides technical guidance to lesser-experienced systems administrators. Performs other duties as assigned which may require specific physical abilities. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and seven to nine years of related experience.
Cyber Systems Administrator, Senior Principal	Serves as a company expert in establishing procedures for the maintenance of data files and control procedures for a complex system of networked computers or for a single group of microcomputers linked to a host workstation, or mainframe. Responsible for system security and data integrity. Monitors and defines the use of resources, and works with management to define requests for information. Provides technical guidance to lesser-experienced systems administrators. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and ten to twelve years of related experience.
Cyber Systems Administration Manager	Oversees and manages the daily operations of the Systems Administration department and staff and apply systems knowledge to ensure that the operating systems and security measures are in place and are running efficiently. Responsible for hiring, motivating, counseling and scheduling staff. Requires Bachelor's degree (in a technical discipline) or equivalent, and ten to twelve years of related experience.
Cyber Systems Analyst, Associate	Establish operational databases, software configuration control and system interfaces for computer system(s) assigned. Maintain file servers, network access, document and analyze system anomalies to ensure optimum equipment performance. Prepares system for operational use and support operational tests. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and zero to two years of related experience.
Cyber Systems Analyst, Staff	Establishes operational databases, software configuration control and system interfaces for computer system(s) assigned. Maintains file servers, network access, document and analyze system anomalies to ensure optimum equipment performance. Prepares system for operational use and support operational tests. Requires Bachelor's degree (in Computer Science, Management Information Systems or related field) or equivalent, and two to four years of related experience.

Labor Category	Description
Cyber Systems Analyst, Senior	Establish complex operational databases, software configuration control and system interfaces for computer system(s) assigned. Maintain file servers, network access, document, analyze, and troubleshoot system anomalies to ensure optimum equipment performance. Prepare system for operational use and support operational tests. Requires Bachelor's degree (in Computer Science, Management Information Systems or related field) or equivalent, and five to seven years of related experience.
Cyber Systems Analyst, Principal	Establishes complex operational databases, software configuration control and system interfaces for computer system(s) assigned. Maintains file servers, network access, document, analyze, and troubleshoot system anomalies to ensure optimum equipment performance. May supervise less experienced systems personnel. Prepare system for operational use and oversee operational tests. Requires Bachelor's degree (in Computer Science, Management Information Systems or related field) or equivalent, and seven to nine years of related experience.
Cyber Systems Analyst, Senior Principal	Serves as a company expert in establishing complex operational databases, software configuration control and system interfaces for computer system(s) assigned. Develops procedures to maintain file servers, network access, document, analyze, and troubleshoot system anomalies to ensure optimum equipment performance. May supervise less experienced systems personnel. Prepares system for operational use and oversee operational tests. Requires Bachelor's degree (in Computer Science, Management Information Systems or related field) or equivalent, and ten to twelve years of related experience.
Cyber Systems Engineer, Associate	Assists in the coding and maintenance of utility programs, job control language and input/output handling programs, as well as other software of minimal complexity. Provides functional and empirical analysis related to the design, development, and implementation of hardware and software operating systems for the organization's products. May assist in the maintenance of program libraries and technical manuals. Attends on-going training sessions to achieve a higher level of technical skill. Requires Bachelor's degree (in Computer Science, Math, Electrical Engineering or related field) or equivalent, and zero to two years of related work experience.

Labor Category	Description
Cyber Systems Engineer, Staff	Assists in the definition and programming of moderately complex software. Works effectively on several phases of systems/software programming/analysis with little direction, but may require some instruction and guidance for other aspects. Provides functional and empirical analysis related to the design, development, and implementation of hardware and software operating systems for the organization's products. May assist in the coding of benchmark testing, job accounting and other control modules developed internally by the company. May assist with moderately complex software applications, such as system generations, compilers, link editors, and assemblers. Requires Bachelor's degree (in Computer Science, Math, Electrical Engineering or related field) or equivalent, and two to four years of related experience.
Cyber Systems Engineer, Senior	Works from specifications to develop or modify complex software programs to enhance an operating system. May give some direction and guidance to less experienced software systems engineers. Investigates and resolves operational problems in conjunction with other engineering and technical personnel. Develops logic, codes, tests and debugs software packages. Modifies, tests, and debugs retail utilities. Packages and engineers releases to integrate with the company's operating systems. Develops and modifies complex software, such as routines supporting multiprogramming, telecommunications and file management. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and five to seven years of related work experience.
Cyber Systems Engineer, Principal	Provides expertise and direction in the development or modification of complex software programs to enhance an operating system. Provides functional and empirical analysis related to the design, development, and implementation of hardware and software operating systems for the organization's products. Responsible for the instruction, assigning, and overseeing the performance of less experienced software systems engineers. Coordinates the activities of the software engineering department with other sections of the corporation's information systems operation. May train and supervise subordinate systems engineers. Requires Bachelor's degree (in Computer Science, Math, Electrical Engineering or related field) and seven to nine years of related experience.
Cyber Systems Engineer, Sr Principal	Performs as the highest-level technical expert, providing both internal and external consulting services. Works independently on advanced systems/software analysis projects. Develops and may conduct training programs. Remains current in operating systems/software analysis and technological developments/applications. Recommends future direction or projects to management. Provides expertise and direction in the development or modification of complex software programs to enhance an operating system. Requires Bachelor's degree (in Computer Science, Math, Electrical Engineering or related field) or equivalent, and ten to twelve years of related experience.

Labor Category	Description
<p>Cyber Assistant Technical Director</p>	<p>Assists in the management of a directorate or is at an entry level in management of a directorate under the close supervision of the Technical or Executive Director. Manages one or more programs. May supervise professional and technical personnel performing in their regular disciplines. May participate in the development and execution of budgets, sales and marketing plans and other strategic tools. Participates in directorate efforts toward achieving established objectives. May serve as the primary or assistant technical and management interface for the company, customer, and senior staff. Provides management services including general administrative oversight, time accounting, financial tracking, cost projection, inventory management, personnel evaluation and support. Responsible for the preparation of and accountability for all contract deliverables. Provides administrative support to tech Quality Assurance Unit and Health and Safety organizations to insure all related contract objectives are achieved. Responsible for assisting in the technical leadership and direction to a multidisciplinary staff. Develops and operates a variety of technical systems related to the specific job function. Specifies systems requirements and insures that completed systems meet requirements. Supports data acquisition process control. Prepares and approves Standard Operating Procedures, Protocols and other technical documentation. Requires Bachelor's degree or equivalent, and ten to twelve years of related (technical environment) experience, financial management including budgeting and cost projections experience, and management experience.</p>
<p>Cyber Technical Director 1</p>	<p>Directs and guides the technical activities within a division with supervisory and developmental responsibilities within a functional area. Manages one or more projects or programs, may manage an operating office and supervises professional and technical personnel performing in their customary disciplines. Develops and maintains a sales and marketing plan to achieve previously agreed-upon objectives endorsed by division and group management. Maintains aggressive efforts to achieve objectives. Manages one or more technical programs. Acts as a technical liaison with vendors. Trains and supervises personnel. Assists in proposal process and coordinates with Pricing Department when required. Responsible for all phases of the program budget. Performs analysis for contract reviews with various software. Develops marketing plans. Develops Quality Assurance Programs for all products and services. Prepare Staffing Plans, including skill and labor mix, to support contract operations. May be responsible for recruiting, interviewing, and hiring staff Assign Staff and provide technical direction as necessary to complete task. Monitors contract, subcontract, and funding; prepare forecasts of program financial performance. Develops and deliver required contract , departmental, project and/or financial reports. Interacts readily with the technical staff and</p>

	<p>vendors both within and outside the company.. Ability to conduct independent research. Requires Bachelor's degree or equivalent, and twelve to fifteen years of related (technical environment) experience and management experience including developing operating budgets and reporting/assessing financial information.</p>
<p>Cyber Technical Director 2</p>	<p>Directs one or more technical projects/programs within a functional area. May manage an operating office and supervises professional and technical personnel performing in their customary disciplines. Develops and maintains a sales and marketing plan to achieve previously agreed-upon objectives endorsed by division and group management. Maintains aggressive efforts to achieve objectives. Acts as a technical liaison with vendors within and outside the company. Assists in proposal process and coordinates with Pricing Department when required. Responsible for all phases of the program budget. Performs analysis for contract reviews with various software. Develops marketing plans and Quality Assurance Programs for all products and services. Prepare Staffing Plans, including skill and labor mix, to support contract operations. Conducts independent research. Responsible for recruiting, interviewing, hiring and training staff. Assigns staff and provide technical direction to complete task. Monitors contract, subcontract, and funding; prepare forecasts of program financial performance. Develops and deliver required contract, departmental, project and/or financial reports. Requires Bachelor's degree or equivalent in a relevant discipline and sixteen plus years work experience including developing operating budgets and reporting/ assessing financial information.</p>
<p>Cyber Director, Information Technology</p>	<p>Directs all aspects of the information systems function. Determines operating philosophy of department and ensures the philosophy is translated into action. Provides top management with technical information and recommendations on information technology. Maintains company and competitive posture in information technology usage. Ensures adequate budget for capital equipment and technical manpower acquisition. Requires Bachelor's degree or equivalent, in computer science or related field and 16 plus years of experience or Master's degree, or equivalent, and twelve plus years of information technology management experience.</p>

Labor Category	Description
Cyber Systems Architect	<p>Under minimal supervision designs, implements, and maintains the organization's application systems and/or IT infrastructure for moderately complex systems. Understands user and process requirements and ensures those requirements can be achieved through high quality deliverables. Works closely with developers and engineers to develop road maps for applications, align development plans, and to ensure effective integration among information systems and the IT infrastructure. Ensures that solutions are continuously improved, supported, and aligned with industry and company standards as well as emerging business requirements. Understands the interactions between systems, applications, and services within the environment, and evaluate the impact of changes or additions for moderately complex systems.</p> <p>Analyzes systems and perform usability testing to ensure performance and reliability, enhance scalability, and meet security requirements. Requires a Bachelor's Degree and four to five years experience or equivalent education.</p>
Cyber Systems Architect, Senior	<p>Designs, implements, and maintains the organization's application systems and/or IT infrastructure for complex systems. Provides an architectural framework for information system development, maintenance, and enhancement efforts. Understands user and process requirements and ensures those requirements can be achieved through high quality deliverables. Works closely with developers and engineers to develop road maps for applications, align development plans, and to ensure effective integration among information systems and the IT infrastructure. Ensures that solutions are continuously improved, supported, and aligned with industry and company standards as well as emerging business requirements. Understands the interactions between systems, applications, and services within the environment, and evaluate the impact of changes or additions for complex systems. Analyzes systems and perform usability testing to ensure performance and reliability, enhance scalability, and meet security requirements. May assist less experienced peers. Requires a Bachelor's Degree and six to nine years experience or equivalent education.</p>

Labor Category	Description
<p>Cyber Systems Architect, Principal</p>	<p>Performs as the technical expert in designing, implementing, and maintainng the organization's application systems and/or IT infrastructure for highly complex systems. Provides an architectural framework for information system development, maintenance, and enhancement efforts. Understands user and process requirements and ensure those requirements can be</p>

Labor Category	Description
	<p>achieved through high quality deliverables. Works closely with management, developers, and engineers to develop road maps for applications, align development plans, and to ensure effective integration among information systems and the IT infrastructure. Monitors technological advancements to ensure that solutions are continuously improved, supported, and aligned with industry and company standards as well as emerging business requirements. Understand the interactions between systems, applications, and services within the environment, and evaluate the impact of changes or additions for highly complex systems.</p> <p>Analyze systems and perform usability testing to ensure performance and reliability, enhance scalability, and meet security requirements. Assists less experienced peers. Requires a Bachelor's Degree and 10 to 14 years experience or equivalent education.</p>
<p>Cyber Technical Writer, Associate</p>	<p>Researches, writes, edits, and proofreads technical data for use in documents or sections of documents such as manuals, procedures and specifications. Ensures technical documentation is accurate, complete, meets editorial and government specifications and adheres to standards for quality, graphics, coverage, format, and style. Assists in establishing style guidelines and standards for texts and illustrations. Requires Bachelor's degree or equivalent in related technical field and zero to two years of related (technical writing/copy editing) experience.</p>
<p>Cyber Technical Writer, Staff</p>	<p>Researches, writes, edits, and proofreads technical data for use in documents or sections of documents such as manuals, procedures and specifications. Ensures technical documentation is accurate, complete, meets editorial and government specifications and adheres to standards for quality, graphics, coverage, format, and style. Assists in establishing style guidelines and standards for texts and illustrations or equivalent. Requires Bachelor's degree or equivalent (in related technical field) and two to four years of related (technical writing and copy editing) experience.</p>
<p>Cyber Technical Writer, Senior</p>	<p>Researches, organizes, writes, edits, and produces technical data for major publication projects. Organizes material and writes descriptive copy according to standards regarding order, clarity, conciseness, style, and terminology. Ensures technical documentation is accurate, complete, meets editorial and government specifications and adheres to standards for quality, graphics, coverage, format, and style. May participate in the establishment of style guidelines and standards for texts and illustrations. May provide work leadership for lower level employees. Requires Bachelor's degree or equivalent in related technical field and five to seven years of related (technical writing/editing) experience.</p>

Labor Category	Description
Cyber Technical Writer, Principal	Oversees the writing of technical reports, brochures, and manuals for internal documentation, client reference, or publications. Researches, organizes, writes, edits, and produces data for use in a wide variety of complex technical publications requiring in-depth knowledge and understanding of the subject matter. Recommends overall organization and layout, editorial standards and publication methods. Coordinates publication with outside sources and vendors as needed. Develops department editing standards and styles. May provide work Leadership for lower level employees. Requires Bachelor's degree or equivalent in related technical field and seven to nine years of related (technical writing/editing) experience.
Cyber Help Desk Specialist, Staff	Responsible for providing support to end-user community on hardware, software and network related problems, questions, and use. Provides resolutions to out of the ordinary issues for users. If unable to diagnose problem, will work with Help Desk Management to diagnose and resolve problem. Responds to tier two and higher trouble tickets. Ensures problem ownership and promotes end-user satisfaction. Closes activities of tickets assigned. Requires Bachelor's Degree (in Computer Science or related field) or equivalent, and two to four years of related experience in computer hardware, software, networking systems, and in the set-up, configuration, use, and trouble shooting of computer systems.
Cyber Help Desk Specialist, Senior	Responsible for providing support to end-user community on difficult hardware, software and network related problems, questions, and use. May provide training and guidance to more junior help desk personnel. Provides resolutions to out of the ordinary issues for users. If unable to diagnose problem, will work with Help Desk Management to diagnose and resolve problem. Responds to tier two and higher trouble tickets. Ensures problem ownership and promotes end-user satisfaction. Closes activities of tickets assigned. Responsible for providing in-depth and high level, support to end-user community on hardware, software and network related problems, questions, and use. Provides problem resolution to users. Confers with user to determine problem. Ensures problem ownership and promotes end-user satisfaction. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and five to seven years of related experience in computer hardware, software, networking systems, and in the set-up, configuration, use, and trouble shooting of computer systems.

Labor Category	Description
Cyber Help Desk Specialist, Principal	Serving as company or contract expert, responsible for providing telephone support to end-user community on complex hardware, software and network related problems, questions, and use. May provide training and guidance to more junior help desk personnel. Provides first level problem resolution on the telephone with users, walks the user through a series of steps to determine problem and classify level, priority and nature of problem. If unable to diagnose problem and/or problem requires physical interaction with end user dispatches field engineers from appropriate team. Opens, tracks and closes trouble tickets; ensures problem ownership and promotes end-user satisfaction. Tracks activities of field engineers to who tickets were assigned. Trained and certified in automated help desk management systems. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and seven to nine years of related experience in computer hardware, software, networking systems, and in the set-up, configuration, use, and trouble shooting of computer systems.
Cyber Senior Office Administrator	Provides on-site administrative support and coordination to a complex contract, project or task(s). Maintains and tracks costs and performances on contract. Oversees the administrative and clerical functions of assigned contracts, projects, or tasks. Maintains office records and files. May collect time sheets and other personnel records or paperwork for corporate processing. Requires Bachelor's degree or equivalent and two to four years of related experience.

**Labor Category Descriptions applicable to SIN 54151S**

<b>Labor Category Equivalency Language</b>
<p>ManTech is proposing the following labor categories and associated qualifications for services under this contract. All categories may be subject to the requirement of a government security investigation and may need to meet eligibility requirements for access to classified information. Where the job description requires a certain level of educational qualification or “equivalent experience”, one year of education equates to 1.5 years of experience. The following guidelines are provided:</p>
<p>High School Diploma 2 years directly related experience                      Associate Degree 3 – 5 years directly related experience                      Bachelor’s Degree 6 – 8 years directly related experience                      Master’s Degree 9 years directly related experience</p>
<p>Subcontractors are to be included on task orders under the contract labor categories and rates, when possible. Upon the approval of the ordering agency, subcontractors may be included as off-schedule costs if their services are not suitable under the contract labor categories as listed herein.</p>

<b>Labor Category</b>	<b>Description</b>
<p>Task Supervisor, Associate</p>	<p>Responsible for the coordination and supervision of a specific technical task or function. Ensures all activities are carried out in accordance with project commitments or specific objectives. Typically supervises between 2 and 10 employees. Responsible for day-to-day coordination and administration of tasks by ensuring quality and productivity standards are maintained while meeting client schedules. Coordinates with other contract and subcontract personnel to ensure work moves smoothly from one functional area to another. Works with project manager and/or client to prepare work schedules and man-hour estimates. Ensures proper training of subordinates. Maintains record of changes in instructions and ensures all team members are informed of changes. Assigns and reviews subordinates’ performance. Prepares performance evaluations. Ensures completion of administrative reporting, e.g., timecards, daily statistics, logs, and task narratives. Responds to client requests and questions. Assists with writing manuals and other documentation. Responsible for status and task management reports for area of responsibility. Requires Bachelor’s degree in related field or equivalent, and zero to two years of related experience.</p>

Labor Category	Description
Task Supervisor, Staff	<p>Responsible for the coordination and supervision of a specific technical task or function. Ensures all activities are carried out in accordance with project commitments or specific objectives. Typically supervises between 10 and 30 employees. Responsible for day-to-day coordination and administration of tasks by ensuring quality and productivity standards are maintained while meeting client schedules. Coordinates with other contract and subcontract personnel to ensure work moves smoothly from one functional area to another. Works with project manager and/or client to prepare work schedules and man-hour estimates. Ensures proper training of subordinates. Maintains record of changes in instructions and ensures all team members are informed of changes. Assigns and reviews subordinates' performance. Prepares performance evaluations. Ensures completion of administrative reporting, e.g., timecards, daily statistics, logs, and task narratives. Responds to client requests and questions. Assists with writing manuals and other documentation. Responsible for status and task management reports for area of responsibility. Sets up and manages project facilities as dictated by workload requirements. Requires Bachelor's degree in related field or equivalent, and two to four years of related experience.</p>
Task Supervisor, Senior	<p>Responsible for the coordination and supervision of a specific technical task or function. Ensures all activities are carried out in accordance with project commitments or specific objectives. Typically supervises more than 30 employees. Responsible for day-to-day coordination and administration of tasks by ensuring quality and productivity standards are maintained while meeting client schedules. Coordinates with other contract and subcontract personnel to ensure work moves smoothly from one functional area to another. Works with project manager and/or client to prepare work schedules and man-hour estimates. Ensures proper training of subordinates. Ensures completion of administrative reporting (timecards, daily statistics, logs, and task narratives.) Responds to client requests and questions. Assists with writing manuals and other documentation. Responsible for status and task management reports for area of responsibility. Sets up and manages project facilities as dictated by workload requirements. Requires Bachelor's degree in related field or equivalent, and five to seven years of related experience.</p>

Labor Category	Description
Project Manager, Deputy	Assists higher level program/project manager in directing the project life cycle by assisting in development of comprehensive project plans to include both long and short-range goals and milestones. Identifies, acquires, and utilizes company resources to achieve project technical objectives. Directs a project team usually within a matrix organization, monitoring and encouraging functional organizations to complete milestones within specific budgets and schedules. May occasion interface with external customers and top management to communicate status of project throughout life cycle. Requires Bachelor's degree or equivalent, and seven to nine years of related experience.
Project Manager	Responsible for the performance of relatively small technical projects or a definable portion of a larger technical program in accordance with contract requirements and company policies, procedures and guidelines. Directs and supervises all support resources for the performance of project assignments and activities. Manages the technical direction of a project through the design, implementation, and testing in accordance with project objectives. Responsible for acquiring follow-on business associated with assigned projects and for supporting new business development by leading relatively small proposals or assisting with major proposals. Requires Bachelor's degree or equivalent, and ten to twelve years of related (technical environment) experience.
Program Manager	Responsible for the performance of a relatively significant program or multiple smaller programs in accordance with contract requirements and company policies, procedures and guidelines. Oversees the technology development and/or application, marketing, and resource allocation within program client base. Program area typically represents more than three functional areas such as engineering, systems analysis, quality control and administration. Responsible for acquiring follow-on business associated with assigned programs and for supporting new business development by leading proposals. Requires Bachelor's degree or equivalent, and twelve to fifteen years of related (technical environment) experience including management experience.
Program Director	Responsible for the successful technical, schedule, and cost performance of a major program, or multiple programs, through subordinate program/project managers, in accordance with contract requirements and company policies, procedures and guidelines. Responsible for acquiring follow-on business associated with assigned programs and for supporting new business development by leading proposals or through program/project managers. Requires Bachelor's degree or equivalent, and sixteen plus years experience in a related technical environment, including five years related management experience.

Labor Category	Description
Database Analyst, Associate	Assists in administering database organizations, standards, controls, procedures, and documentation. Provides entry level technical consulting in the definition, design, and creation of a database environment. Develops applications to help formulate database solutions to business problems, data architectures, database management system facilities and capabilities, and the operation and tuning of databases. Maintains databases with respect to access methods, access time, batch processes, device allocation, validation checks, organization, protection and security, documentation, and statistical methods. Includes maintenance of database dictionaries, and integration of systems through database design. Maintains database dictionaries. Maintains and documents JCL, shell scripts and batch processes. Ensures that documentation is complete and up-to-date. Applies procedures for periodic database backup. Requires Bachelor's degree or equivalent, and zero to two years of related experience.
Database Analyst, Staff	Administers database organizations, standards, controls, procedures, and documentation. Provides technical consulting in the definition, design, and creation of a database environment. Assists applications development staff and users on database solutions to business problems, data architectures, database management system facilities and capabilities, and the operation and tuning of databases. Implements and maintains databases with respect to access methods, access time, batch processes, device allocation, validation checks, organization, protection and security, documentation, and statistical methods. Includes maintenance of database dictionaries, and integration of systems through database design and implementation. Maintains database dictionaries and documents JCL, shell scripts and batch processes. Ensures that documentation is complete and up-to-date. Develops and applies procedures for periodic database backup. Requires Bachelor's degree (in Computer Science, Management Information Systems or related field) or equivalent, and two to four years of related experience.
Database Analyst, Senior	Defines and administers database organizations, standards, controls, procedures, and documentation. Provides experienced technical consulting in the definition, design, and creation of a database environment. Advises applications development staff and users on database solutions to business problems, data architectures, database management system facilities and capabilities, and the operation and tuning of databases. Ensures economic and efficient availability of data within adequate safeguards. Designs, implements, and maintains databases with respect to access methods, access time, batch processes, device allocation, validation checks, organization, protection and security, documentation, and statistical methods. Includes maintenance of database dictionaries, and integration of systems through database design. Develops and maintains expertise in use of automated tools for database design and implementation. Requires Bachelor's degree (in Computer

Labor Category	Description
	Science, Management Information Systems) or equivalent, and five to seven years of related (data center environment) experience.
Database Analyst, Principal	Defines and oversees database organizations, standards, controls, procedures, and documentation. Provides experienced technical consulting in the definition, design, and creation of a database environment. Advises applications development staff and users on database solutions to business problems, data architectures, database management system facilities and capabilities, and the operation and tuning of databases. Ensures economic and efficient availability of data within adequate safeguards. Designs and implements databases with respect to access methods, access time, batch processes, device allocation, validation checks, organization, protection and security, documentation, and statistical methods. Develops and maintains expertise in use of automated tools for database design and implementation. Develops, maintains and documents JCL, shell scripts and batch processes. Participates as a leader and as a team member, and works to maintain a positive environment. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and seven to nine years of related experience.
Database Analyst, Senior Principal	Defines database organizations, standards, controls, procedures, and documentation. Provides experienced technical consulting in the definition, design, and creation of a database environment. Advises applications development staff and users on database solutions to business problems, data architectures, database management system facilities and capabilities, and the operation and tuning of databases. Ensures economic and efficient availability of data within adequate safeguards. Develops expertise in use of automated tools for database design and implementation. Develops procedures to address needs of JCL, shell scripts and batch processes. Ensures that documentation is complete and up-to-date. Develops procedures relating to database and application security including procedures by which access is authorized, enabled, changed and withdrawn. Develops procedures for periodic database backup. Participates as a leader and as the senior team member. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and ten to twelve years of related experience.
Database Manager	Responsible for all activities related to the design, implementation and administration of computerized databases. Assigns personnel to various projects and directs their activities; reviews and evaluates their work and prepares performance reports. Confers with and advises subordinates on administrative policies and procedures, technical problems, priorities and methods. Consults with and advises users of the various databases. Projects long-range requirements for database administration and design in conjunction with other managers in the information systems function. Prepares activity and progress reports regarding the database design process.

Labor Category	Description
	A Bachelor degree or equivalent in a related field and ten to twelve years of relevant work experience are required.
Database Engineer, Assoc	Operates at the system level and has learned skills that will apply across the full system life cycle from requirements through database design and implementation. Is trained in system design and development skill as well as database-related skills. The Database Engineer's focus is database-centric, based on the understanding that the heart of every information system is the database, but with a solid view of how the database integrates and operates with other system components. Requirements and design activities will include one of the following: security, backup and recovery, and availability considerations. Will set up and test different design scenarios (or to direct these activities) early in the system development life cycle as part of the process of validating the suitability of proposed design alternatives. Test scenarios must generate sufficient performance data to support database design decisions. Requires Bachelor's degree or equivalent, and zero to two years of related experience.

Ability to obtain a security clearance.</p>

Labor Category	Description
Analyst/Computer Forensic Intrusion, Lead	Provides computer forensic and intrusion analyst support to high technology investigations in the form of computer evidence seizure, computer forensic analysis, data recovery, and network assessments. Conduct vulnerability assessments/penetration tests of information systems. Researches and maintains proficiency in tools, techniques, countermeasures, and trends in computer network vulnerabilities, data hiding and network security and encryption. Assists in deterring, identifying, monitoring, investigating and analyzing computer network intrusions. Requires Bachelor's degree and seven to nine years of related experience with a minimum of four years experience in one or more of the following: computer network penetration testing and techniques; computer evidence seizure, computer forensic analysis, and data recovery; computer intrusion analysis and incident response, intrusion detection; computer network surveillance/monitoring; network protocols, network devices, multiple operating systems, and secure architectures. Ability to obtain a security clearance.
Analyst/Computer Forensic Intrusion, Principal	Provides knowledge in Computer and network vulnerability testing/penetration techniques; Tool development for computer and network forensics and vulnerability testing. Provides computer forensic support to high technology investigations in the form of evidence seizure, computer forensic analysis, and data recovery. Conducts vulnerability assessments/penetration tests of information systems. Researches and maintains proficiency in tools, techniques, countermeasures, and trends in computer and network vulnerabilities, data hiding and encryption. Develop tools, techniques, training and countermeasures for computer and network vulnerabilities, data hiding and encryption. Deter, identify, monitor and investigate computer and network intrusions. Provides expert knowledge in computer and network forensics. Conducts vulnerability assessments. Researches and maintains proficiency in tools, techniques, countermeasures, and trends in computer and network vulnerabilities. Identify, deter, monitor and investigate computer and network intrusions. Requires Bachelor's degree or equivalent and ten to twelve years of related experience with a minimum of four years experience in one or more of the following: computer network penetration testing and techniques; computer evidence seizure, computer forensic analysis, and data recovery; computer intrusion analysis and incident response, intrusion detection; computer network surveillance and monitoring; network protocols, network devices, multiple operating systems, and secure architectures or Master's degree and seven to nine years of related experience. Ability to obtain a security clearance.

Labor Category	Description
Applications Engineer, Associate	Assists in the selling process to identify, develops, and supports product/service applications. Requires blend of sales, marketing, and technical skills. Interacts with management at customer sites to assess business processes and address product/service needs. Basic involvement in the overall sales process, pre-sales through post-sales support. May participate in sales presentation activities for key prospects and develops and delivers presentations to customer. Requires Bachelor's degree (in technology, engineering or business discipline) or equivalent, and zero to two years related (engineering and/or sales) experience.
Applications Engineer, Staff	Identifies, develops, and supports product/service applications in the selling process. Requires blend of sales, marketing, and technical skills. Interacts with management at customer site to assess business processes and address product/service needs. Strong involvement in the overall sales process, pre-sales through post-sales support. Assists with sales presentation activities for key prospects and develops and delivers presentations to customer. Requires Bachelor's degree (in technology, engineering or business discipline) or equivalent, and two to four years of related (engineering and/or sales) experience.
Applications Engineer, Senior	Identifies, assesses, and evaluates moderately complex product/service solutions requiring a blend of strong sales, marketing, and technical skills. Coordinates resolution of product/service issues, upgrades, and problems. Interacts with management at customer site to assess major business processes and address product/service needs. Strong involvement in the overall sales process, pre-sales through post-sales support. Participates in sales presentation activities and develops and delivers presentations to customer's management. Requires Bachelor's degree (in technology or business discipline) or equivalent, and five to seven years of related (engineering and/or sales) experience.
Applications Engineer, Principal	Strong involvement in the selling process to identify, develop, and support complex product/service solutions requiring a blend of sales and technical expertise. Coordinates resolution of product/service issues, upgrades, and problems. Interacts with top-level management at customer sites to assess major business processes and address product/service needs. Heavily involved in the overall sales process, pre-sales, the closing of sales, and post-sales support. Participates in sales presentation activities for key prospects and develops and delivers presentations to customer's top management. Requires Bachelor's degree (in technology, engineering or business discipline) or equivalent, and seven to nine years of related (engineering and/or sales) experience.

Labor Category	Description
Applications Systems Analyst/Programmer, Associate	Assists in the research to develop or enhance information systems. Assists in the preparation of specifications from which programs will be written. Designs codes, tests, debugs, documents, and maintain programs. Diagrams information flow, showing source and distribution of all segments, processing elements, channels, and methods of entering corrections, and data retention requirements. Attends on-going training sessions to achieve a higher level of technical skill. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and zero to two years of related work experience.
Applications Systems Analyst/Programmer, Staff	Formulates and defines system scope and objectives to develop or modify moderately complex problems to develop or enhance information systems. Prepares detailed specifications from which programs will be written. Designs, codes, tests, debugs, documents, and maintains programs. Diagrams information flow, shows source and distribution of all segments, processes elements, channels, and methods of entering corrections, and data retention requirements. Requires Bachelor's degree or equivalent, and two to four years of related work experience.
Applications Systems Analyst/Programmer, Senior	Formulates and defines system scope and objectives. Establish procedures to solve complex problems regarding system equipment capacity and limitations, operating time and output. Prepare detailed specifications from which programs will be written and design, code, test, debug, and document newly written programs. Diagrams information flow, showing source and distribution of all segments, processing elements, channels, and methods of entering corrections, and data retention requirements. Perform at an advanced technical level on all phases of applications systems analysis and programming activities. May be responsible for the completion of a phase of a project. Provide guidance to less experienced analyst/programmers. Requires Bachelor's degree or equivalent, and five to seven years of related experience.
Applications Systems Analyst/Programmer, Principal	Formulates and defines system scope and objectives for assigned projects. Establishes procedures to solve complex problems regarding system equipment capacity and limitations, operating time and output. Prepares detailed specifications from which programs will be written and designs, codes, tests, debugs, and documents newly written programs. Diagrams information flow, showing source and distribution of all segments, processing elements, channels, and methods of entering corrections, and data retention requirements. Performs at an advanced technical level and has complete understanding of all phases of applications systems analysis and programming activities. Directs, provides guidance, and monitors the performance of less experienced analyst/programmers. Responsible for quality assurance review of assigned project. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and seven to nine years of related experience.

Labor Category	Description
Applications Systems Analyst/Programmer, Sr Principal	Formulates and defines system scope and objectives for assigned projects. Establishes procedures to solve complex problems regarding system equipment capacity and limitations, operating time and output. Prepares detailed specifications from which programs will be written. Designs, codes, tests, debugs, and documents newly written programs. Performs at an advanced technical level and has complete understanding of all phases of applications systems analysis and programming activities. Directs, provides guidance, and monitors the performance of less experienced analyst/programmers. Responsible for quality assurance review of assigned project. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and ten to twelve years of related experience.
Business Systems Analyst, Associate	Assists in developing and defining systems scope and objectives through research combined with a basic understanding of business systems and industry requirements. Interviews personnel from functional user area under study to learn general purpose of systems and information requirements of positions involved in the data flow. Analyzes business and user needs, document requirements, and revises existing system logic difficulties as necessary under direction of more experienced Business System Analyst personnel. Attend on-going training sessions to achieve a higher level of technical skill. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and zero to two years of related experience.
Business Systems Analyst, Staff	Formulates and defines systems scope and objectives through research combined with a basic understanding of business systems and industry requirements. Develops or modifies procedures to solve moderately complex problems within information systems. Analyzes business and user needs, document requirements, and revise existing system logic difficulties as necessary. Provides guidance to less experienced Business System Analysts. Requires Bachelor's degree or equivalent, and two to four years of related experience.
Business Systems Analyst, Senior	Formulates and defines systems scope and objectives through user needs and an understanding of business systems and industry requirements. Develops or modifies procedures to solve complex problems within information systems. Analyzes business and user needs, document requirements, and translate into proper system requirement specifications. Provide guidance to less experienced Business System Analysts. Requires Bachelor's degree (in Computer Science or a related field) or equivalent, and five to seven years of related experience.

Labor Category	Description
<p>Business Systems Analyst, Principal</p>	<p>Provides expertise in the formulation of systems scope and objectives relative to the organization's business plan and industry requirements. Works independently or as a member of a project team responsible for providing technical guidance related to the business implications of the application of various systems. Provides technical consulting on complex projects. Devises and or modifies procedures to solve the most complex technical problems related to computer equipment capacity and limitations, operating time and form of desired results. Creates detailed specifications from which programs will be written. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and seven to nine years of related experience.</p>
<p>Business Systems Analyst, Senior Principal</p>	<p>Provides expertise in the formulation of systems scope and objectives relative to the organization's business plan and industry requirements. Works independently or as a member of a project team responsible for providing technical guidance related to the business implications of the application of various systems. Provides technical consulting on complex projects. Devises and/or modifies procedures to solve the most complex technical problems related to computer equipment capacity and limitations, operating time and form of desired results. Create detailed specifications from which programs will be written. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and ten to twelve years of related experience.</p>
<p>Configuration Management Specialist, Associate</p>	<p>Responsible for routine configuration control during the product development phase. May reviews design release documents for completeness, proper approvals and system updates, to ensure correct configuration modifications. Reviews contracts and drafts configuration plans to encompass all specification requirements. Assists in the maintenance of the database. Requires Bachelor's degree or equivalent, and zero to two years of related experience.</p>
<p>Configuration Management Specialist, Staff</p>	<p>Responsible for advanced configuration control during product development phase. Reviews design release documents for completeness, proper approvals and system updates, to ensure correct configuration modifications. Reviews contracts and drafts configuration plans to encompass all specification requirements. Assists in the maintenance of the database. May also be responsible for contract data submittal and status on smaller projects. Requires Bachelor's degree or equivalent, and two to four years of related experience.</p>

Labor Category	Description
Configuration Management Specialist, Senior	<p>Designs and establishes management documentation. Authorizes the release of drawings, and software configuration changes specified by management and other functional groups. Provides advice and guidance on methods, procedures, and requirements to individuals responsible for the creation of documentation. Plans and implements methods to improve response. Participates in special studies. May provide work leadership for lower level employees. Under the guidance of a senior level analyst, performs data management tasks as required by contract. Requires Bachelor's degree or equivalent, and five to seven years of related experience.</p>
Configuration Management Specialist, Principal	<p>Designs and establishes management documentation. Authorizes the release of drawings, and software configuration changes specified by management and other functional groups. Provides advice and guidance on methods, procedures, and requirements to individuals responsible for the creation of documentation. Plans and implements methods to improve response. Participates in special studies. Provides work leadership for lower level employees. Performs data management tasks as required by contract. Requires Bachelor's degree or equivalent, and seven to nine years of related experience.</p>
Configurations/Data Management Analyst Mgr	<p>Establishes and maintains configuration and data management policies and procedures to be utilized by departmental personnel and other participating functions to ensure a standard and cost effective approach to the application of configuration and data management requirements. Organizes and implements the process of evaluating performance against established policies and procedures to ensure hardware and documentation integrity is being maintained at the least cost to the company and programs. Develops departmental operating budgets, productivity goals, and staffing levels. Provides the resources necessary to maintain the integrity of the Bills of Material Subsystem of the Manufacturing database. Requires Bachelor degree or equivalent experience, and ten to twelve years of experience in the application of MIL and DoD requirements and management experience.</p>
Document Specialist, Associate	<p>Oversees the Document Control (DC) policy system, working closely with technical writing, DC implementation and configuration management staff. Researches and makes recommendations for appropriate hardware and software required for the DC system. Develops and present DC training sessions. Requires Bachelor's degree (Engineering or Technical discipline) or equivalent; zero to two years of related experience.</p>
Document Specialist, Staff	<p>Oversees the Document Control (DC) policy system, working closely with technical writing, DC implementation and configuration management staff. Research and make recommendations for appropriate hardware and software required for the DC system. Develop and present DC training sessions. Requires Bachelor's degree (in Engineering or related field) and two to four years of related experience.</p>

Labor Category	Description
Document Specialist, Senior	Oversees the Document Control (DC) policy system, working closely with technical writing, DC implementation and configuration management staff. Researches and makes recommendations for appropriate hardware and software required for the DC system. Develops and presents DC training sessions. Requires Bachelor's degree (in Engineering or Technical field) or equivalent, and five to seven years of related experience.
Document Specialist, Principal	Oversees the Document Control (DC) policy system, working closely with technical writing, DC implementation and configuration management staff. Researches and makes recommendations for appropriate hardware and software required for the DC system. Develops and presents DC training sessions. Requires Bachelor's degree (in engineering or technical field) or equivalent, and seven to nine years of related experience.
Functional Analyst, Associate	Analyzes factors and components of systems to recommend and institute changes to increase efficiency. Plan studies of work problems and procedures, such as organizational changes, communication, information flow, integrated production methods, or cost analysis. Performs systematic review of selected functions to determine application and design of systems or models. Prepares models of problem areas in the form of one of several equations. Utilizes mathematical models and management plans. Specifies manipulative and computational methods of formulation and uses data processing for solving equations, programming and processing. Prepares charts and diagrams to assist in problem analysis and submits recommendations for solutions. Writes specification manuals and user documentation for client or user personnel. Assists more senior level Functional Analysts in program design and analysis. Requires Bachelor's Degree in related field or equivalent experience and zero to two years of related experience.
Functional Analyst, Staff	Analyzes factors and components of systems to recommend and institute changes to increase efficiency. Plan studies of work problems and procedures, such as organizational changes, communication, information flow, integrated production methods, or cost analysis. Translates user requirements into system specifications, configuration management plans, life cycle management, documentation, and integrated logistics support plans and related operational summaries. Recommends improvements of modifications in sequence of operations, equipment utilization and related matters. Examines and analyzes current and contemplated operations for developing, defining, and coordinating user requirements which will satisfy the total program need. Gathers information from users, defines work problems, and designs a system and procedures to resolve problems. Interfaces with the user and participates in and conducts structured walk through. Writes specifications manuals and user documentation for client or user personnel. Assist more senior level Functional Analysts in the design, development, and analysis of logical and physical database

Labor Category	Description
	design and maintenance. Requires Bachelor's Degree in related field or equivalent experience and two to four years of related experience.
Functional Analyst, Senior	Analyzes factors and components of systems to recommend and institute changes to increase efficiency. Plan studies of work problems and procedures, such as organizational changes, communication, information flow, integrated production methods, or cost analysis. Recommends improvements of modifications in sequence of operations, equipment utilization and related matters. Examines and analyzes current and contemplated operations for developing, defining, and coordinating user requirements which will satisfy the total program need. Translates user requirements into system specifications, configuration management plans, life cycle management documentation, and integrated logistics support plans and related operational summaries. Writes specifications manuals and user documentation for client or user personnel. Gathers information from users, defines work problems, and designs a system and procedures to resolve problems. May supervise and provide technical direction to lower level staff. Requires Bachelor's Degree in related field or equivalent and five to seven years of related experience.
Functional Analyst, Principal	Oversees the analysis of problems in terms of management information and conceptualizes proposals that afford maximum probability of profit or effectiveness in relation to cost or risk. Performs advanced and complex systematic reviews of selected functions to determine application and design of systems or models. Participates in various testing functions (i.e. string and acceptance tests) to verify that results are correct. Develops and updates functional or operating manuals outlining established methods of performing work in accordance with organizational policy. Trains clients or user personnel in the operation and capabilities of proposed models. Provides functional guidance on more complex projects. Requires Bachelor's Degree in related field or equivalent experience and seven to nine years of related experience.
Functional Analyst, Senior Principal	Serves as a company expert and oversees the analysis of the most complex problems in terms of management information and conceptualizes proposals that afford maximum probability of profit or effectiveness in relation to cost or risk. Performs very advanced and complex systematic reviews of selected functions to determine application and design of systems or models. Participates in various testing functions (i.e. string and acceptance tests) to verify that results are correct. Develops and updates functional or operating manuals outlining established methods of performing work in accordance with organizational policy. Trains clients or user personnel in the operation and capabilities of proposed models. Provides functional guidance on more complex projects. Requires Bachelor's Degree in related field or equivalent experience and ten

Labor Category	Description
	to twelve years of related experience or Master's degree and seven to nine years of related experience.
Hardware Engineer, Associate	Evaluates reliability of materials, properties and techniques used in production; plans, designs and develops electronic parts, components, integrated circuitry, mechanical systems, equipment and packaging, optical systems and/or DSP systems. Under direct supervision, designs and develops simple equipment, processes and systems that involve data networks, communications, and display. Analyzes equipment specifications and process requirements to conceive a practical design. Based on limited technical knowledge of assigned product line, few technical decisions are made. May prepare related installation guides and instructions. Requires Bachelor's degree in engineering or applied science, or equivalent and zero to two years of experience.
Hardware Engineer, Staff	Evaluates reliability of materials, properties and techniques used in production; plans, designs and develops electronic parts, components, integrated circuitry, mechanical systems, equipment and packaging, optical systems and/or DSP systems. Under general supervision, designs and develops equipment, processes and systems that involve data networks, communications, and display. Analyzes equipment specifications and process requirements to conceive a practical design. Meets with research engineers or scientists and customer representatives to resolve design problems. Based on extensive technical knowledge of assigned product line, develops solutions for design problems. Prepares related installation guides and instructions. Requires Bachelor's degree in engineering or applied science, or equivalent and two to four years of experience.
Hardware Engineer, Senior	Evaluates reliability of materials, properties and techniques used in production; plans, designs and develops electronic parts, components, integrated circuitry, mechanical systems, equipment and packaging, optical systems and/or DSP systems. Under general direction, designs and develops equipment, processes and systems that involve data networks, communications, and display. Analyzes equipment specifications and process requirements to conceive a practical design. Determines feasibility from technical and economic perspectives. Coordinates and consults with research engineers or scientists and customer representatives to resolve design problems. Develops and maintains technical procedures, documentation and manuals. Compiles and analyzes operational data and directs tests to establish standard for new designs or modifications to existing equipment, systems, or processes. May supervise the work of technicians and technologists who provide technical support. Requires Bachelor's degree in engineering or applied science, or equivalent and five to seven years of experience.

Labor Category	Description
Hardware Engineer, Principal	Evaluates reliability of materials, properties and techniques used in production; plans, designs and develops electronic parts, components, integrated circuitry, mechanical systems, equipment and packaging, optical systems and/or DSP systems. Under general direction, designs and develops equipment, processes and systems that involve data networks, communications, and display. Analyzes equipment specifications and process requirements to conceive a practical design. Determines feasibility from technical and economic perspectives. Coordinates and consults with research engineers or scientists and customer representatives to resolve design problems. Develops and maintains technical procedures, documentation and manuals. Compiles and analyzes operational data and directs tests to establish standard for new designs or modifications to existing equipment, systems, or processes. May supervise technical support staff. Requires Bachelor's degree in engineering or applied science, or equivalent and seven to nine years of related experience.
Hardware Engineer, Senior Principal	Evaluates reliability of materials, properties and techniques used in production; plans, designs and develops electronic parts, components, integrated circuitry, mechanical systems, equipment and packaging, optical systems and/or DSP systems. Serves as lead engineer, designs and develops equipment, processes and systems that involve data networks, communications, and display. Analyzes equipment specifications and process requirements to conceive a practical design. Determines feasibility from technical and economic perspectives. Coordinates and consults with research engineers or scientists and customer representatives to resolve design problems. Develops and maintains technical procedures, documentation and manuals. Compiles and analyzes operational data and directs tests to establish standard for new designs or modifications to existing equipment, systems, or processes. May supervise the work of technicians and technologists who provide technical support. Requires Bachelor's degree in engineering or applied science, or equivalent and ten to twelve years of experience.
Hardware Engineering Manager	Manages a work group composed of eight to ten design engineers engaged in a variety of hardware engineering activities. Has responsibility for all phases of project planning and control including schedules, budgets, resource allocation, and results. Decisions are not usually subject to review. Performance is evaluated based on adherence to time schedules, budgets, soundness of approach, and general effectiveness. Requires Bachelor's degree (in a related field) or equivalent, and ten to twelve years of related (engineering and management) experience or Master's degree (in Technology or Math) and seven to nine years of related experience.

Labor Category	Description
Information Security Engineer, Associate	<p>Defines, plans, designs, and evaluates information security systems. Assesses architecture and current hardware limitations, defines and designs system specifications, input/output processes and working parameters for hardware/software compatibility. Experience with information networks design, operation, and equipment. Interest/aptitude for information security work. Works under of direction of more experienced information security engineer. Requires Bachelor's degree in related discipline (engineering, computer science or related discipline) and zero to two of related experience.</p>
Information Security Engineer, Staff	<p>Defines, plans, designs, and evaluates information security systems. Assesses architecture and current hardware limitations, defines and designs system specifications, input/output processes and working parameters for hardware/software compatibility. Basic familiarity with information network elements – routers, firewalls, etc. Ability to apply technical knowledge to information security designs. Designs and conducts tests of designs and architectures. Requires Bachelor's degree in (field mathematics, telecommunications, electrical engineering, computer engineering, computer science) or related discipline, and two to four years' related experience.</p>
Information Security Engineer, Senior	<p>Defines, plans, designs, and evaluates information security system. Assesses architecture and current hardware limitations, defines and designs system specifications, input/output processes and working parameters for hardware/software compatibility. Designs and conducts tests of designs and architectures. Leads and guides less experienced engineers. Capable of independent management of projects. Requires Bachelor's degree (in field mathematics, telecommunications, electrical engineering, computer engineering, computer science) or equivalent and five to seven years experience with information networks and the security aspects.</p>
Information Security Engineer, Principal	<p>Defines, plans, designs, and evaluates information security systems. Assesses architecture and current hardware limitations, defines and designs system specifications, input/output processes and working parameters for hardware/software compatibility. Performs a variety of complex tasks associated with information security ranging from the design of security components to complex architectures. Supervises the work of other engineers performing a variety of information security tasks. Capable of independent program supervision. Requires Bachelor's degree (in field mathematics, telecommunications, electrical engineering, computer engineering, computer science) or equivalent and seven to nine years related experience.</p>

Labor Category	Description
Information Security Engineer, Sr Principal	<p>Defines, plans, designs, and evaluates information security systems. Assesses architecture and current hardware limitations, defines and designs system specifications, input/output processes and working parameters for hardware/software compatibility. Provides expert level consultation and technical services on all aspects of Information Security. Manages large-scale programs of national or international scope. Maintains senior affiliations with national and international organizations associated with information security. Requires Bachelor's degree or equivalent and ten to twelve years related experience or Master's degree with seven to nine years of experience field mathematics, telecommunications, electrical engineering, computer engineering, computer science.</p>
Information Security Specialist, Associate	<p>Knowledge of information system administration and information network software/hardware including firewalls and intrusion detection systems. Basic familiarity with information security procedures. Safeguards network against unauthorized infiltration, modification, destruction or disclosure. May research, evaluate, test, recommends communicate and implement new security software or devices. Implements, enforces, communicates and develops security policies or plans for data, software applications, hardware, and telecommunications. Provides information to management regarding the negative impact caused by theft, destruction, alteration or denial of access to information. Requires Bachelor's degree in related discipline (engineering, computer science or related discipline) and zero to two of related experience.</p>
Information Security Specialist, Staff	<p>Knowledge and experience with information network security equipment. Understanding of information network threats such as computer viruses. Tests and operates firewalls, intrusion detection systems, enterprise anti-virus systems and software deployment tools. Safeguards the network against unauthorized infiltration, modification, destruction or disclosure. May research, evaluate, test, recommends communicate and implement new security software or devices. Implements, enforces, communicates and develops security policies or plans for data, software applications, hardware, and telecommunications. Provides information to management regarding the negative impact caused by theft, destruction, alteration or denial of access to information. Provides recommendations on information assurance engineering standards, implementation dependencies, and changing information assurance related technologies. Requires Bachelor's degree in (field mathematics, telecommunications, electrical engineering, computer engineering, computer science) or related discipline, and two to four years' related experience or Certification in systems administrator, network certification, etc. six to eight years of experience.</p>

Labor Category	Description
<p>Information Security Specialist, Senior</p>	<p>Manages the company's firewalls and intrusion detection systems. Develops, tests, and operates firewalls, intrusion detection systems, enterprise anti-virus systems and software deployment tools. Safeguards the network against unauthorized infiltration, modification, destruction or disclosure. May research, evaluate, test, recommends communicate and implement new security software or devices. Implements, enforces, communicates and develops security policies or plans for data, software applications, hardware, and telecommunications. Provides information to management regarding the negative impact caused by theft, destruction, alteration or denial of access to information. Provides recommendations on information assurance engineering standards, implementation dependencies, and changing information assurance related technologies. Manages the company's firewalls and intrusion detection systems. Develops, tests, and operates firewalls, intrusion detection systems, enterprise anti-virus systems and software deployment tools. Safeguards the network against unauthorized infiltration, modification, destruction or disclosure. Researches, evaluates, tests, recommends communicate and implement new security software or devices. Implements, enforces, communicates and develops security policies or plans for data, software applications, hardware, and telecommunications. Provides information to management on the negative impact caused by theft, destruction, alteration or denial of access to information. Provides recommendations on information assurance engineering standards, implementation dependencies, and changing information assurance related technologies. May supervise lower level staff. Requires Bachelor's degree or equivalent and five to seven years related experience.</p>
<p>Information Security Specialist, Principal</p>	<p>Manages extensive evaluations of major information security networks, prepares evaluation reports, presents recommendations. Conducts trade off analyses of products for clients to determine optimal informant security solutions. Provides consulting services on a wide variety of information assurance topics. Prepares remedial options and supervise correction of information security shortfalls. Works independently in expert role at customer site. Requires Bachelor's degree or equivalent and seven to nine years of directly related experience.</p>
<p>Information Security Specialist, Sr Principal</p>	<p>Functions as expert consultant in all aspects of information security. Prepares in-depth studies and analyses. Manages major information security efforts. Maintains affiliation with national/international organizations. Functions on broad scope programs of national/international basis. Capable of fully independent work in support of a customer either on site or of-site. Requires Bachelor's degree or equivalent and ten to twelve years related experience or Master's degree with seven to nine years of experience field mathematics, telecommunications, electrical engineering, computer engineering, computer science.</p>

Labor Category	Description
<p>Information Technology Manager</p>	<p>Analyzes complex local and wide area network systems, including planning, designing, evaluating, selecting operating systems and protocol suites and configuring communication media with concentrators, bridges, and other devices. Resolves difficult inter-operability problems to obtain operation across all platforms, including e-mail, files transfer, multimedia, teleconferencing and the like. Configures systems to user environments. Supports acquisition of hardware and software as well as subcontractor services. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and ten to twelve years of related (progressively responsible network systems engineering) experience and management experience. Master's degree in Computer Science preferred.</p>
<p>Information Technology Scientist</p>	<p>Analyzes complex local and wide area network systems, including planning, designing, evaluating, selecting operating systems and protocol suites and configuring communication media with concentrators, bridges, and other devices. Resolves difficult inter-operability problems to obtain operation across all platforms, including e-mail, files transfer, multimedia, teleconferencing and the like. Configures systems to user environments. Supports acquisition of hardware and software as well as subcontractor services. Serves as manager or industry-recognized expert. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and twelve to fifteen years of related (progressively responsible network systems engineering) experience and management experience or Master's degree in Computer Science with nine to eleven years of related experience.</p>
<p>Information Technology Senior Scientist</p>	<p>Directs all aspects of the local and wide area network systems, including planning, designing, evaluating, selecting operating systems and protocol suites and configuring communication media with concentrators, bridges, and other devices. Resolves difficult and complex inter-operability problems to obtain operation across all platforms, including e-mail, files transfer, multimedia, teleconferencing and the like. Analyzes and configures systems to user environments. Supports acquisition of hardware and software as well as subcontractor services. Serves as in-house and industry recognized expert. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and sixteen plus years of related network systems engineering experience. Master's degree in Computer Science preferred.</p>
<p>Information Technology Supervisor</p>	<p>Responsible for the supervision and direction of a group of Information Systems professionals. Coordinates the activities of the group to meet objectives, deadlines, budgets, and coordinate/resolve customer requests. Serves as the technical specialist for the area of assigned responsibility, provides training and guidance of assigned staff. Requires Bachelor's degree (in a technical discipline) or equivalent, and seven to nine years of related experience.</p>

Labor Category	Description
LAN/WAN Engineer, Associate	Performs as entry level engineer in some of the following area: local and wide area networking, communications, and related software/hardware within a multi-platform operating environment. Works in integration of a total network including the planning, design, installation, maintenance, management, and coordination of the corporate LAN/WAN. Learns in areas of technological developments and applications. Recommend network security and policies. May work with Voice and/or Data Communications Analyst. Requires Bachelor degree or equivalent in Computer Science or a related field, and zero to two years of relevant experience.
LAN/WAN Engineer, Staff	Perform as mid-level contributor with knowledge and experience in local and wide area networking, communications, and related software/hardware within a multi-platform operating environment. Responsible for the integration of a network including assisting in the planning, design, installation, maintenance, management, and coordination of the corporate LAN/WAN. Current on most technological developments and applications, and helps to evaluate vendor products to make recommendations for purchase. May work with Voice and/or Data. Requires Bachelor degree or equivalent (Computer Science or a related field), and two to four years of relevant experience.
LAN/WAN Engineer, Senior	Perform as a senior technical participant with knowledge and experience in local and wide area networking, communications, and related software/hardware within a multi-platform operating environment. Responsible for the integration of a total network including the planning, design, installation, maintenance, management, and coordination of the corporate LAN/WAN. Current on technological developments and applications, and evaluate vendor products to make recommendations for purchase. Recommend network security and policies. May work with Voice and/or Data Communications Analyst. Requires Bachelor's degree or equivalent in Computer Science or a related field, and five to seven years of relevant experience are required.
LAN/WAN Engineer, Principal	Perform as a technical expert with advanced knowledge and experience in local and wide area networking, communications, and related software/hardware within a multi-platform operating environment. Responsible for the overall integration of a total network including the planning, design, installation, maintenance, management, and coordination of the corporate LAN/WAN. Current on technological developments and applications, and evaluate vendor products to make recommendations for purchase. Recommend network security and policies. May work with Voice and/or Data Communications Analyst. Requires Bachelor's degree or equivalent in Computer Science or a related field, and seven to nine years of relevant experience are required.

Labor Category	Description
LAN/WAN Engineer, Senior Principal	Perform as the most senior technical expert with advanced knowledge and experience in local and wide area networking, communications, and related software/hardware within a multi-platform operating environment. Responsible for the overall integration of a total network including the planning, design, installation, maintenance, management, and coordination of the corporate LAN/WAN. Current on technological developments and applications, and evaluate vendor products to make recommendations for purchase. Recommend network security and policies. May work with Voice and/or Data Communications Analyst. Requires Bachelor's degree or equivalent in Computer Science or a related field, and ten to twelve years of related experience.
Network Administrator, Associate	Designs, installs, maintain and coordinate the use of the network system. Evaluates hardware, software and peripheral equipment. Manages network performance to maintain high quality transmission service on the network. Maintains, create/deletes user accounts, maintains and updates system security plans on all platforms. Implements and coordinates network policies, procedures and standards. Enforces security procedures. Supervises and schedules the network technician staff and trains users. Performs other duties as assigned which may require specific physical abilities. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and zero to two years of related experience.
Network Administrator, Staff	Designs, installs, maintain and coordinate the use of the network system. Evaluates hardware and software and peripheral equipment for simple networks. Manages network performance. Troubleshoots and resolves problems to ensure quality transmission service on the network. Maintains, creates/deletes user accounts, maintains and updates system security plans on most platforms. Administers network policies, procedures and standards. Enforces security procedures. Performs other duties as assigned which may require specific physical abilities. Requires Bachelor's degree (in Computer Science or Management Information Systems) or equivalent, and two to four years of related (data center environment) experience.
Network Administrator, Senior	Designs, installs, maintains and coordinates the use of the network system. Evaluates hardware and software and peripheral equipment for large, complex networks. Manages network performance. Troubleshoots and resolves complex problems to ensure quality transmission service on the network. Maintains user accounts, maintains and updates system security plans on all platforms. Implements and coordinates network policies, procedures and standards. Enforces security procedures. May supervise and schedule the Network Technician staff and trains users. Performs other duties as assigned which may require specific physical abilities. Requires Bachelor's degree (in Computer Science or

Labor Category	Description
	Management Information Systems) or equivalent, and five to seven years of related (data center environment) experience.
Network Administrator, Principal	Serves as in-house expert to design, install, maintain and coordinate the use of the network system. Evaluates complex hardware and software and peripheral equipment for large, complex networks. Manages network performance. Troubleshoots and resolves complex problems to ensure quality transmission service on the network. Manages and maintains, create/deletes user accounts, maintains and updates system security plans on all platforms. Implements and manages network policies, procedures and standards. Enforces security procedures. Supervises and schedules the Network Technician staff and trains users. Performs other duties as assigned which may require specific physical abilities. Requires Bachelor's degree (in Computer Science or Management Information Systems) or equivalent, and seven to nine years of related (data center environment) experience.
Network Administrator, Senior Principal	As a recognized industry expert manages the company's designs, installation, and maintains and coordinates the use of the network system. Evaluates complex hardware and software and peripheral equipment for large, complex networks. Manages network performance. Troubleshoots and resolves complex problems to ensure quality transmission service on the network. Manages and maintains, create/deletes user accounts, maintains and updates system security plans on all platforms. Implements and manages network policies, procedures and standards. Enforces security procedures. Manages and schedules the Network Technician staff and develops the training for users. Requires Bachelor's degree (in Computer Science or Management Information Systems) or equivalent, and ten to twelve years of related (data center environment) experience.
Network Engineer, Associate	Evaluates, designs, documents, installs, implements, tests, and performs problem isolation and resolution. Monitors, tunes, sets standards and maintain a range of computer network components and systems. Performs these functions across a limited range of network facilities including some, but not all, physical media, protocol stacks, hubs, routers, bridges, gateways, digital servers, line drivers, telecommunications transport facilities, mainframe VTAM, NCP and related software and hardware, and network management components. Utilizes monitoring, performance analysis, network management, software and hardware equipment to troubleshoot and isolate problems, gauge network performance, and trace data and protocol activity. Requires Bachelor's degree (in Computer Science, Math or Engineering) or equivalent, and zero to two years of related experience.

Labor Category	Description
Network Engineer, Staff	<p>Evaluates, designs, documents, installs, implements, tests, performs problem isolation and resolution. Monitors, tunes, sets standards and maintain a range of computer network components and systems. Performs these functions across most of the network facilities including physical media, protocol stacks, hubs, routers, bridges, gateways, digital servers, line drivers, telecommunications transport facilities, mainframe VTAM, NCP and related software and hardware, and network management components. Provides client consulting and training on the interfacing and use of the network facilities. Begins to plan research, evaluate, and recommend new computer network equipment and technologies. Utilizes monitoring, performance analysis, network management, software and hardware equipment to troubleshoot and isolate problems, gauge network performance, and trace data and protocol activity. Devises solutions to moderately complex operational problems within the capacity and operational limitations of installed equipment. Requires Bachelor's degree (in Computer Science, Math or Engineering) or equivalent, and two to four years of related experience.</p>
Network Engineer, Senior	<p>Evaluates, designs, documents, installs, implements, tests, performs problem isolation and resolution, monitors, tunes, and sets standards. Maintains a complex range of computer network components and systems. Performs these functions across a wide range of network facilities including physical media, protocol stacks, hubs, routers, bridges, gateways, digital servers, line drivers, telecommunications transport facilities, mainframe VTAM, NCP and related software and hardware, and network management components. Provides client consulting and training on the interfacing and use of the network facilities. Plans and coordinates computer network initiatives. Researches, evaluates, and recommends new computer network equipment and technologies. Utilizes monitoring, performance analysis, network management, software and hardware equipment to trouble shoot and isolate problems, gauge network performance, and trace data and protocol activity. Devises solutions to operational problems within the capacity and operational limitations of installed equipment. Develops and executes contingency plans for network software and hardware failures including isolated and major outages. Provides internal consulting, technical guidance, information and support to application developers, computer operations, workstation support, company management and departmental clients. Requires Bachelor's degree in (Computer Science, Math or Engineering) or equivalent, and five to seven years of related experience.</p>

Labor Category	Description
	Science, Engineering, Economics or Math) or equivalent, and ten to twelve years of related telecommunication analysis experience.
Network Engineering Senior Manager	Oversees the Network Engineering activities. Reviews and prioritizes network needs and analyzes project costs and feasibility. Develops network analysis standards and methodology consistent with technical requirements. Schedules staff to obtain proper response in a timely manner. Reviews recommendations for network improvement. Requires Bachelor's degree or equivalent and twelve to fifteen years of experience or Master's degree in related field and nine to eleven years of experience, including seven to nine years of management experience.
Program Control Analyst, Associate	Assists in providing on-site project management/administrative support and coordination to a complex contract, project task(s) or business unit. Duties may include contract accounting and reporting, project schedule focus to management, tracking annual fiscal plans and monthly updates, payroll/personnel processing, maintenance and reporting, contract administration, purchasing, facility leasing and service administration. Maintains contract budgets, prepares contract billing, estimates materials, equipment, production costs and delivery schedules. Oversees personnel records, facility administration and purchases equipment and supplies. Requires Bachelor's degree (in Business Administration) or equivalent, and zero to two years of related (project support or management) experience.
Program Control Analyst, Staff	Provides on-site project management/administrative support and coordination to a complex contract, project, task(s) or business unit. Duties may include contract accounting and reporting, project schedule focus to management, tracking annual fiscal plans and monthly updates, payroll/personnel processing, maintenance and reporting, contract administration, purchasing, facility leasing and service administration. Maintains contract budgets, prepares contract-billing, estimates materials, equipment, production costs and delivery schedules. Oversees personnel records, facility administration and purchases equipment and supplies. Requires Bachelor's degree (in Business Administration) or equivalent, and two to four years of related (project support or management) experience.
Program Control Analyst, Senior	Provides senior level on-site project management/administrative support and coordination to a complex contract, project, task(s) or business unit. Duties may include contract accounting and reporting, project schedule focus to management, tracking annual fiscal plans and monthly updates, payroll/personnel processing, maintenance and reporting, contract administration, purchasing, facility leasing and service administration. Maintains contract budgets, prepares contract-billing, estimates materials, equipment, production costs and delivery schedules. Oversees personnel records, facility administration and purchases equipment and supplies. Requires Bachelor's degree (in Business Administration)

Labor Category	Description
	or equivalent, and five to seven years of related (project support or management) experience.
Program Control Analyst, Lead	Provides senior level on-site project management/administrative support and coordination to a complex contract, project, task(s) or business unit. Duties may include contract accounting and reporting, payroll/personnel processing, project schedule focus to management, tracking annual fiscal plans and monthly updates, maintenance and reporting, contract administration, purchasing, facility leasing and service administration. Maintains contract budgets, prepares contract-billing, estimates materials, equipment, production costs and delivery schedules. Oversees personnel records, facility administration and purchases equipment and supplies. Requires Bachelor's degree (in Business Administration) or equivalent, and seven to nine years of related (project management) experience.
Program Control Manager	Manages assigned group of Program Control Analysts who provide on-site administrative support and coordination to various contract(s), project(s), task(s) or business unit (s). Duties may include the management of contract accounting and reporting, payroll/personnel processing, maintenance and reporting, contract administration, purchasing, facility leasing and service administration. Maintains contract budgets, prepares contract billing, estimates materials, equipment, production costs and delivery schedules. Oversees personnel records, facility administration and purchases equipment and supplies. Participates in introducing the Company operating standards, Plans objectives and goals for staff and selects and trains new employees. Requires Bachelor's degree (in Business Administration) or equivalent, and ten to twelve years of related (project support and supervisory/management) experience.
Security Engineer, Associate	Monitors, evaluates, and maintains systems and procedures to protect the data systems and databases from unauthorized users. Identifies potential threats and responds to reported security violations. Determines causes of security breaches. Researches, recommends, and implements changes to procedures to protect data from future violations. Assist in educating users on security procedures. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and zero to two years of related experience.
Security Engineer, Staff	Monitors, evaluates, and maintains systems and procedures to protect the data systems and databases from unauthorized users. Identifies potential threats and responds to reported security violations. Determines causes of security breaches. Researches, recommends, and implements changes to procedures to protect data from future violations. Assists in educating users on security procedures. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and two to four years of related experience.

Labor Category	Description
Security Engineer, Senior	Monitors, evaluates, and maintains systems and procedures to protect the data systems and databases from unauthorized users. Identifies potential threats and responds to reported security violations. Determines causes of security breaches. Researches, recommends, and implements changes to procedures to protect data from future violations. Assists in educating users on security procedures. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and five to seven years of related work experience.
Security Engineer, Principal	Monitors, evaluates, and maintains systems and procedures to protect the data systems and databases from unauthorized users. Identifies potential threats and respond to reported security violations. Determines causes of security breaches. Researches, recommends, and implements changes to procedures to protect data from future violations. May train and develop subordinates through varied project assignments. Assists in educating users on security procedures. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and seven to nine years of related experience.
Security Engineer, Sr Principal	Serves as a company expert in monitoring, evaluating, and maintaining systems and procedures to protect the data systems and databases from unauthorized users. Identifies potential threats and responds to reported security violations. Determines causes of security breaches. Researches, recommends, and implements changes to procedures to protect data from future violations. Educates users on security procedures. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and ten to twelve years of related experience.
Software Developer, Associate	Performs maintenance on existing software products. Assists in coding, testing, and debugging new software or making enhancements to existing software. Writes programs according to specifications from higher-level personnel. Suggests solutions for problems or software enhancements. May assist in the development of user manuals and work with technical staff to learn and understand problems with software. Attends on-going training sessions to achieve a higher level of technical skill. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and zero to two years of related work experience.
Software Developer, Staff	Develops, codes, tests, and debugs new software or enhancements to existing software. Possesses a good understanding of business applications. Works with technical staff to understand and resolve software problems, resolves customer complaints with software and responds to suggestions for software modifications or enhancements. May be involved in the development of software user manuals and demonstrate software. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and two to four years of related experience.

Labor Category	Description
Software Developer, Senior	Performs as a technical expert in the design development, coding, testing, and debugging new software or complex enhancements to existing software. Works with technical staff to understand and to develop resolution of software problems. Resolves customer complaints with software and respond to suggestions for software modifications or enhancements. Participates in the development of software user manuals. Assists in the training of less experienced software development staff and may act as a team leader on less complex projects. Requires Bachelor's degree (in Computer Science or related field) or equivalent and five to seven years of related experience.
Software Developer, Principal	Performs as the technical expert with thorough understanding of the business application of an assigned project. Performs as a project lead with the responsibility for the instruction, assigning, direction, and monitoring of the performance of assigned software developers working on a specific project. Assists in the scheduling and coordinating of projects and may be involved in the design phase of a project. Works with customers and technical staff in the resolution of software problems and respond to suggestions for software modifications or enhancements. Participates in the development of software user manuals. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and seven to nine years of related experience.
Software Developer, Senior Principal	As a senior staff member, performs as the technical expert with thorough understanding of the business application of an assigned project. Perform as a project lead with the responsibility for the instruction, assigning, direction, and monitoring of the performance of assigned software developers working on a specific project. Assist in the scheduling and coordinating of projects and may be involved in the design phase of a project. Work with customers and technical staff in the resolution of software problems and respond to suggestions for software modifications or enhancements. Participate in the development of software user manuals. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and ten to twelve years of related experience.
Software Engineer, Associate	Assists in designing, developing, troubleshooting, and analyzing software programs for computer-based systems. Assists in evaluating/determining user needs with the maintenance of single-product models and subsystems. Performs routine systems modeling, simulation, and analysis. Designs and develops compilers, assemblers, utility programs, and operating systems. As required, provides inputs for documentation of new or existing programs. Primarily interfaces with intra-organizational staff with infrequent contact with inter-organizational staff and outside customers and vendors on routine matters. Requires Bachelor's degree (in Engineering, Computer Science or related field) or equivalent, and zero to two years of related experience.

Labor Category	Description
Software Engineer, Staff	<p>Designs, develops, troubleshoots, and analyzes software programs for computer based systems. Performs systems modeling, simulation, and analysis. Designs and develops compilers, assemblers, utility programs, and operating systems. As required, provides inputs for documentation of new or existing programs. Primarily interfaces with intra-organizational staff with infrequent contact with inter-organizational staff and outside customers and vendors on routine matters. Requires Bachelor's degree (in Engineering, Computer Science or related field) or equivalent, and two to four years of related experience.</p>
Software Engineer, Senior	<p>Performs subsystem definition, preliminary and detailed design, design implementation, subsystem and system integration, and tests for a subsystem. Participates in software requirements review, preliminary and critical design reviews, integration readiness review, and software acceptance reviews. Researches problems discovered by quality assurance or product support and develops solutions to the problems. Supports proposal efforts. Frequent inter-organizational and outside customer contacts. Represents the organization in providing solutions to difficult technical problems associated with specific projects. Requires Bachelor's degree (in Engineering, Computer Science or related field) or equivalent, and five to seven years of related work experience.</p>
Software Engineer, Principal	<p>Performs system and subsystem definition, preliminary and detailed design, design implementation, and subsystem and system integration and tests for a system. Participates in software requirement review, preliminary and critical design, integration readiness review, and software acceptance review. Acts as technical lead for pre-proposal, proposal, and existing program efforts. Involvement in business development includes briefing customers on company capabilities. Supports program management office in technical role. Represents the organization as the prime customer contact on contracts or projects. May research the marketing requirements for a product, including target environment, performance criteria, and competitive issues. Interacts with senior customer personnel on significant technical matters, often requiring coordinated activity across organizational lines. May provide technical guidance to lower level software engineers. Requires Bachelor's degree (in Engineering, Computer Science or related field) or equivalent, and seven to nine years of related experience.</p>

Labor Category	Description
Software Engineer, Sr Principal	<p>Serves as a company expert in performing system and subsystem definition, preliminary and detailed design, design implementation, and subsystem and system integration and tests for a system. Participates in software requirement review, preliminary and critical design, integration readiness review, and software acceptance review. Acts as technical lead for pre-proposal, proposal, and existing program efforts. Involvement in business development includes briefing customers on company capabilities. Supports program management office in technical role. Represents the organization as the prime customer contact on contracts or projects. Interacts with senior customer personnel on significant technical matters, often requiring coordinated activity across organizational lines. Requires Bachelor's degree (in Engineering, Computer Science or related field) or equivalent, and ten to twelve years of related experience.</p>
Software QA Specialist, Associate	<p>Executes test scripts to ensure that quality software is provided for release to production. May also write, create, and modify test scripts to certify system changes, under close supervision. Reviews requirements, specifications and documentation to gain a thorough understanding of the programs and processes to be certified. Provides or validates estimates for assigned tasks. Develops test control databases. Maintains test databases and ensures their integrity and currency. Distributes test data from control database to development staff to satisfy adequate unit testing. Assists with configuration management tasks on a project (test scripts, source code control, coordination of requirement changes) as required. May write trace-ability matrices and test reports. May perform minor program changes or develop software programs as required. Requires Bachelor's degree or equivalent, and zero to two years of related experience.</p>
Software QA Specialist, Staff	<p>Executes test scripts to ensure that quality software is provided for release to production. May write test scripts. Reviews requirements, specifications and documentation to gain a thorough understanding of the programs and processes to be certified. Provides or validates estimates for assigned tasks. Under moderate supervision, creates and modifies test scripts to certify system changes. Develops test control databases. Maintains test databases and ensures their integrity and currency. Distributes test data from control database to development staff to satisfy adequate unit testing. Assists with configuration management tasks on a project (test scripts, source code control, coordination of requirement changes) as required. Releases completed projects into production. May write trace-ability matrices and test reports. May perform minor program changes or develop software programs as required. Requires Bachelor's degree or equivalent, and two to four years of related experience.</p>

Labor Category	Description
Software QA Specialist, Senior	<p>Ensures that quality software is provided for release to production by independently executing test scripts. Writes test scripts. Reviews requirements, specifications and documentation to gain a thorough understanding of the programs and processes to be certified. Provides or validates estimates for assigned tasks. Creates and modifies test scripts to certify system changes. Develops test control databases. Maintains test databases and ensures their integrity and currency. Distributes test data from control database to development staff to satisfy adequate unit testing. Assists with configuration management tasks on a project (test scripts, source code control, coordination of requirement changes) as required. Releases completed projects into production. May write trace-ability matrices and test reports. May perform program changes or develop software programs as required. Requires Bachelor's degree or equivalent, and five to seven years of related experience.</p>
Software QA Specialist, Principal	<p>Executes test scripts to ensure that quality software is provided for release to production. Develops test scripts. Reviews requirements, specifications and documentation to gain a thorough understanding of the programs and processes to be certified. Provides or validates estimates for assigned tasks. Creates and modifies test scripts to certify system changes. Develops test control databases. Maintains test databases and ensures their integrity and currency. Distributes test data from control database to development staff to satisfy adequate unit testing. Assists in developing the configuration management tasks on a project (test scripts, source code control, coordination of requirement changes) as required. Releases completed projects into production. Writes trace-ability matrices and test reports. Performs major program changes or develops software programs. Requires Bachelor's degree or equivalent, and seven to nine years of related experience.</p>
Software QA Specialist, Sr Principal	<p>Ensures that quality software is provided for release to production by independently executing test scripts. May supervise more junior staff in writing test scripts. Develops and reviews requirements, specifications and documentation to provide staff and users with a thorough understanding of the programs and processes to be certified. Provides estimates for assigned tasks. As lead QA specialist, creates and modifies test scripts to certify system changes. Develops test control databases. Maintains test databases and ensures their integrity and currency. Distributes test data from control database to development staff to satisfy adequate unit testing. Defines configuration management tasks on a project (test scripts, source code control, coordination of requirement changes) as required. Releases completed projects into production. Helps develop trace-ability matrices and test reports. Performs all major program changes or oversees the development software programs as required. Requires Bachelor's degree or equivalent, and ten to twelve years of related experience.</p>

Labor Category	Description
Subject Matter Expert	Serves as experienced consultant with experience in supporting large projects related to the individual subject matter expertise. Beginning expertise in functional domains such as finance, personnel, acquisition, etc. Performs research, collection, collation and compilation of data, and preparation of inputs into larger reports. Evaluates and interprets findings. Prepares finished products for review by team leader or higher level analysts. Interfaces with external entities to collect data. Uses and/or develops computer tools to facilitate analysis tasks. Prepares monthly status reports. May be assigned to customer site. May prepare and present briefings. Requires Bachelor's degree in Business, Engineering, Management Sciences, Computer Science, Information Systems, Social Science, Education, Human Resources Development, and Psychology or other related disciplines and eight to ten years of experience or Master's degree and six to eight years of related experience or PhD and four to six years of related experience.
Subject Matter Expert, Senior	Serves as experienced consultant with experience in supporting large projects related to the individual subject matter expertise. Prepares and delivers presentations to colleagues, subordinates, and government representatives. Assures the proper use of current or requested programming, testing and documentation techniques. Produces, reviews and documents reflecting knowledge of areas as identified in the statement of work. Requires Bachelor's degree in Business, Engineering, Management Sciences, Computer Science, Information Systems, Social Science, Education, Human Resources Development, and Psychology or other related disciplines and ten to twelve years of experience or Master's degree and eight to ten years of related experience or PhD and five to seven years of related experience.
Subject Matter Expert, Principal	Relevant experience includes supporting large projects related to the individuals subject matter expertise. Advanced expertise in functional domains such as finance, personnel, acquisition, etc. Experience as a Project Manager. Prepares and delivers presentations to colleagues, subordinates, and government representatives. Assures the proper use of current or requested programming, testing and documentation techniques. Produces and/or reviews substantive and/or complex documentation reflecting detailed knowledge of areas as identified in the statement of work. Requires Bachelor's degree in Business, Engineering, Management Sciences, Computer Science, Information Systems, Social Science, Education, Human Resources Development, and Psychology or other related disciplines and twelve to fifteen years of experience or Master's degree and ten to twelve years of related experience or PhD and eight to nine years of related experience. Requires Bachelor's degree in Business, Engineering, Management Sciences, Computer Science, Information Systems, Social Science, Education, Human Resources development, and Psychology or

	other related disciplines and twelve to fifteen years of experience or Master's degree and ten to twelve years of related experience or PhD and eight to nine years of related experience.
Subject Matter Expert, Senior Principal	Renowned expertise in functional domains such as finance, personnel, acquisition, etc. or technical disciplines such as computer security, network engineering, etc. Extensive experience as technical leaders and senior Project Managers. Prepares and delivers presentations to colleagues, subordinates, and government representatives. Assures the proper use of current or requested testing and documentation techniques. Produces, reviews substantive and complex documentation reflecting detailed knowledge of areas as identified in the statement of work. Requires Bachelor's degree in Business, Engineering, Management Sciences, Computer Science, Information Systems, Social Science, Education, Human Resources Development, and Psychology or other related disciplines, fifteen plus years of experience; or Master's degree, twelve plus years of related experience; or PhD, ten plus years of related experience and project management experience.
Systems Administrator, Associate	Maintains data files and control procedures for a system of networked computers or for a single group of microcomputers linked to a host workstation, or mainframe. Responsible for system security and data integrity. Assigns passwords and monitors use of resources, backs up files as required and responds to management requests for information. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and zero to two years of related experience.
Systems Administrator, Staff	Maintains data files and control procedures for a complex system of networked computers or for a single group of microcomputers linked to a host workstation, or mainframe. Monitors system security and data integrity. Assigns passwords and monitors use of resources, backs up files as required and responds to management requests for information. Performs other duties as assigned which may require specific physical abilities. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and two to four years of related experience.
Systems Administrator, Senior	Maintains data files and control procedures for a complex system of networked computers or for a single group of microcomputers linked to a host workstation, or mainframe. Responsible for system security and data integrity. Assigns passwords and monitors use of resources, backs up files as required and responds to management requests for information. Provides technical guidance to lesser-experienced systems administrators. Performs other duties as assigned which may require specific physical abilities. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and five to seven years of related experience.

Labor Category	Description
Systems Administrator, Principal	Maintain data files and control procedures for a complex system of networked computers or for a single group of microcomputers linked to a host workstation, or mainframe. Responsible for system security and data integrity. Assigns passwords and monitors use of resources, backs up files as required and works with management to define requests for information. Provides technical guidance to lesser-experienced systems administrators. Performs other duties as assigned which may require specific physical abilities. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and seven to nine years of related experience.
Systems Administrator, Senior Principal	Serves as a company expert in establishing procedures for the maintenance of data files and control procedures for a complex system of networked computers or for a single group of microcomputers linked to a host workstation, or mainframe. Responsible for system security and data integrity. Monitors and defines the use of resources, and works with management to define requests for information. Provides technical guidance to lesser-experienced systems administrators. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and ten to twelve years of related experience.
Systems Administration Manager	Oversees and manages the daily operations of the Systems Administration department and staff and apply systems knowledge to ensure that the operating systems and security measures are in place and are running efficiently. Responsible for hiring, motivating, counseling and scheduling staff. Requires Bachelor's degree (in a technical discipline) or equivalent, and ten to twelve years of related experience.
Systems Analyst, Associate	Establish operational databases, software configuration control and system interfaces for computer system(s) assigned. Maintain file servers, network access, document and analyze system anomalies to ensure optimum equipment performance. Prepares system for operational use and support operational tests. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and zero to two years of related experience.
Systems Analyst, Staff	Establishes operational databases, software configuration control and system interfaces for computer system(s) assigned. Maintains file servers, network access, document and analyze system anomalies to ensure optimum equipment performance. Prepares system for operational use and support operational tests. Requires Bachelor's degree (in Computer Science, Management Information Systems or related field) or equivalent, and two to four years of related experience.

Labor Category	Description
Systems Analyst, Senior	Establish complex operational databases, software configuration control and system interfaces for computer system(s) assigned. Maintain file servers, network access, document, analyze, and troubleshoot system anomalies to ensure optimum equipment performance. Prepare system for operational use and support operational tests. Requires Bachelor's degree (in Computer Science, Management Information Systems or related field) or equivalent, and five to seven years of related experience.
Systems Analyst, Principal	Establishes complex operational databases, software configuration control and system interfaces for computer system(s) assigned. Maintains file servers, network access, document, analyze, and troubleshoot system anomalies to ensure optimum equipment performance. May supervise less experienced systems personnel. Prepare system for operational use and oversee operational tests. Requires Bachelor's degree (in Computer Science, Management Information Systems or related field) or equivalent, and seven to nine years of related experience.
Systems Analyst, Senior Principal	Serves as a company expert in establishing complex operational databases, software configuration control and system interfaces for computer system(s) assigned. Develops procedures to maintain file servers, network access, document, analyze, and troubleshoot system anomalies to ensure optimum equipment performance. May supervise less experienced systems personnel. Prepares system for operational use and oversee operational tests. Requires Bachelor's degree (in Computer Science, Management Information Systems or related field) or equivalent, and ten to twelve years of related experience.
Systems Engineer, Associate	Assists in the coding and maintenance of utility programs, job control language and input/output handling programs, as well as other software of minimal complexity. Provides functional and empirical analysis related to the design, development, and implementation of hardware and software operating systems for the organization's products. May assist in the maintenance of program libraries and technical manuals. Attends on-going training sessions to achieve a higher level of technical skill. Requires Bachelor's degree (in Computer Science, Math, Electrical Engineering or related field) or equivalent, and zero to two years of related work experience.

Labor Category	Description
Systems Engineer, Staff	Assists in the definition and programming of moderately complex software. Works effectively on several phases of systems/software programming/analysis with little direction, but may require some instruction and guidance for other aspects. Provides functional and empirical analysis related to the design, development, and implementation of hardware and software operating systems for the organization's products. May assist in the coding of benchmark testing, job accounting and other control modules developed internally by the company. May assist with moderately complex software applications, such as system generations, compilers, link editors, and assemblers. Requires Bachelor's degree (in Computer Science, Math, Electrical Engineering or related field) or equivalent, and two to four years of related experience.
Systems Engineer, Senior	Works from specifications to develop or modify complex software programs to enhance an operating system. May give some direction and guidance to less experienced software systems engineers. Investigates and resolves operational problems in conjunction with other engineering and technical personnel. Develops logic, codes, tests and debugs software packages. Modifies, tests, and debugs retail utilities. Packages and engineers releases to integrate with the company's operating systems. Develops and modifies complex software, such as routines supporting multiprogramming, telecommunications and file management. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and five to seven years of related work experience.
Systems Engineer, Principal	Provides expertise and direction in the development or modification of complex software programs to enhance an operating system. Provides functional and empirical analysis related to the design, development, and implementation of hardware and software operating systems for the organization's products. Responsible for the instruction, assigning, and overseeing the performance of less experienced software systems engineers. Coordinates the activities of the software engineering department with other sections of the corporation's information systems operation. May train and supervise subordinate systems engineers. Requires Bachelor's degree (in Computer Science, Math, Electrical Engineering or related field) and seven to nine years of related experience.
Systems Engineer, Sr Principal	Performs as the highest-level technical expert, providing both internal and external consulting services. Works independently on advanced systems/software analysis projects. Develops and may conduct training programs. Remains current in operating systems/software analysis and technological developments/applications. Recommends future direction or projects to management. Provides expertise and direction in the development or modification of complex software programs to enhance an operating system. Requires Bachelor's degree (in Computer Science, Math, Electrical Engineering or related field) or equivalent, and ten to twelve years of related experience.

Labor Category	Description
Assistant Technical Director	<p>Assists in the management of a directorate or is at an entry level in management of a directorate under the close supervision of the Technical or Executive Director. Manages one or more programs. May supervise professional and technical personnel performing in their regular disciplines. May participate in the development and execution of budgets, sales and marketing plans and other strategic tools. Participates in directorate efforts toward achieving established objectives. May serve as the primary or assistant technical and management interface for the company, customer, and senior staff. Provides management services including general administrative oversight, time accounting, financial tracking, cost projection, inventory management, personnel evaluation and support. Responsible for the preparation of and accountability for all contract deliverables. Provides administrative support to tech Quality Assurance Unit and Health and Safety organizations to insure all related contract objectives are achieved. Responsible for assisting in the technical leadership and direction to a multidisciplinary staff. Develops and operates a variety of technical systems related to the specific job function. Specifies systems requirements and insures that completed systems meet requirements. Supports data acquisition process control. Prepares and approves Standard Operating Procedures, Protocols and other technical documentation. Requires Bachelor's degree or equivalent, and ten to twelve years of related (technical environment) experience, financial management including budgeting and cost projections experience, and management experience.</p>

Labor Category	Description
Technical Director 1	<p>Directs and guides the technical activities within a division with supervisory and developmental responsibilities within a functional area. Manages one or more projects or programs, may manage an operating office and supervises professional and technical personnel performing in their customary disciplines. Develops and maintains a sales and marketing plan to achieve previously agreed-upon objectives endorsed by division and group management. Maintains aggressive efforts to achieve objectives. Manages one or more technical programs. Acts as a technical liaison with vendors. Trains and supervises personnel. Assists in proposal process and coordinates with Pricing Department when required. Responsible for all phases of the program budget. Performs analysis for contract reviews with various software. Develops marketing plans. Develops Quality Assurance Programs for all products and services. Prepare Staffing Plans, including skill and labor mix, to support contract operations. May be responsible for recruiting, interviewing, and hiring staff Assign Staff and provide technical direction as necessary to complete task. Monitors contract, subcontract, and funding; prepare forecasts of program financial performance. Develops and deliver required contract , departmental, project and/or financial reports. Interacts readily with the technical staff and vendors both within and outside the company.. Ability to conduct independent research. Requires Bachelor’s degree or equivalent, and twelve to fifteen years of related (technical environment) experience and management experience including developing operating budgets and reporting/assessing financial information.</p>
Technical Director 2	<p>Directs one or more technical projects/programs within a functional area. May manage an operating office and supervises professional and technical personnel performing in their customary disciplines. Develops and maintains a sales and marketing plan to achieve previously agreed-upon objectives endorsed by division and group management. Maintains aggressive efforts to achieve objectives. Acts as a technical liaison with vendors within and outside the company. Assists in proposal process and coordinates with Pricing Department when required. Responsible for all phases of the program budget. Performs analysis for contract reviews with various software. Develops marketing plans and Quality Assurance Programs for all products and services. Prepare Staffing Plans, including skill and labor mix, to support contract operations. Conducts independent research. Responsible for recruiting, interviewing, hiring and training staff. Assigns staff and provide technical direction to complete task. Monitors contract, subcontract, and funding; prepare forecasts of program financial performance. Develops and deliver required contract, departmental, project and/or financial reports. Requires Bachelor’s degree or equivalent in a relevant discipline and sixteen plus years work experience including developing operating budgets and reporting/ assessing financial information.</p>

Labor Category	Description
Director, Information Technology	Directs all aspects of the information systems function. Determines operating philosophy of department and ensures the philosophy is translated into action. Provides top management with technical information and recommendations on information technology. Maintains company and competitive posture in information technology usage. Ensures adequate budget for capital equipment and technical manpower acquisition. Requires Bachelor's degree or equivalent, in computer science or related field and 16 plus years of experience or Master's degree, or equivalent, and twelve plus years of information technology management experience.
Systems Architect	Under minimal supervision designs, implements, and maintains the organization's application systems and/or IT infrastructure for moderately complex systems. Understands user and process requirements and ensures those requirements can be achieved through high quality deliverables. Works closely with developers and engineers to develop road maps for applications, align development plans, and to ensure effective integration among information systems and the IT infrastructure. Ensures that solutions are continuously improved, supported, and aligned with industry and company standards as well as emerging business requirements. Understands the interactions between systems, applications, and services within the environment, and evaluate the impact of changes or additions for moderately complex systems. Analyzes systems and perform usability testing to ensure performance and reliability, enhance scalability, and meet security requirements. Requires a Bachelor's Degree and four to five years experience or equivalent education.
Systems Architect, Senior	Designs, implements, and maintains the organization's application systems and/or IT infrastructure for complex systems. Provides an architectural framework for information system development, maintenance, and enhancement efforts. Understands user and process requirements and ensures those requirements can be achieved through high quality deliverables. Works closely with developers and engineers to develop road maps for applications, align development plans, and to ensure effective integration among information systems and the IT infrastructure. Ensures that solutions are continuously improved, supported, and aligned with industry and company standards as well as emerging business requirements. Understands the interactions between systems, applications, and services within the environment, and evaluate the impact of changes or additions for complex systems. Analyzes systems and perform usability testing to ensure performance and reliability, enhance scalability, and meet security requirements. May assist less experienced peers. Requires a Bachelor's Degree and six to nine years experience or equivalent education.

Labor Category	Description

Provides an architectural framework for information system development, maintenance, and enhancement efforts. Understands user and process requirements and ensure those requirements can be achieved through high quality deliverables. Works closely with management, developers, and engineers to develop road maps for applications, align development plans, and to ensure effective</p>

Labor Category	Description
	<p>integration among information systems and the IT infrastructure. Monitors technological advancements to ensure that solutions are continuously improved, supported, and aligned with industry and company standards as well as emerging business requirements. Understand the interactions between systems, applications, and services within the environment, and evaluate the impact of changes or additions for highly complex systems. Analyze systems and perform usability testing to ensure performance and reliability, enhance scalability, and meet security requirements. Assists less experienced peers. Requires a Bachelor's Degree and 10 to 14 years experience or equivalent education.</p>
<p>Technical Writer, Associate</p>	<p>Researches, writes, edits, and proofreads technical data for use in documents or sections of documents such as manuals, procedures and specifications. Ensures technical documentation is accurate, complete, meets editorial and government specifications and adheres to standards for quality, graphics, coverage, format, and style. Assists in establishing style guidelines and standards for texts and illustrations. Requires Bachelor's degree or equivalent in related technical field and zero to two years of related (technical writing/copy editing) experience.</p>
<p>Technical Writer, Staff</p>	<p>Researches, writes, edits, and proofreads technical data for use in documents or sections of documents such as manuals, procedures and specifications. Ensures technical documentation is accurate, complete, meets editorial and government specifications and adheres to standards for quality, graphics, coverage, format, and style. Assists in establishing style guidelines and standards for texts and illustrations or equivalent. Requires Bachelor's degree or equivalent (in related technical field) and two to four years of related (technical writing and copy editing) experience.</p>
<p>Technical Writer, Senior</p>	<p>Researches, organizes, writes, edits, and produces technical data for major publication projects. Organizes material and writes descriptive copy according to standards regarding order, clarity, conciseness, style, and terminology. Ensures technical documentation is accurate, complete, meets editorial and government specifications and adheres to standards for quality, graphics, coverage, format, and style. May participate in the establishment of style guidelines and standards for texts and illustrations. May provide work leadership for lower level employees. Requires Bachelor's degree or equivalent in related technical field and five to seven years of related (technical writing/editing) experience.</p>

Labor Category	Description
Technical Writer, Principal	Oversees the writing of technical reports, brochures, and manuals for internal documentation, client reference, or publications. Researches, organizes, writes, edits, and produces data for use in a wide variety of complex technical publications requiring in-depth knowledge and understanding of the subject matter. Recommends overall organization and layout, editorial standards and publication methods. Coordinates publication with outside sources and vendors as needed. Develops department editing standards and styles. May provide work Leadership for lower level employees. Requires Bachelor's degree or equivalent in related technical field and seven to nine years of related (technical writing/editing) experience.
Help Desk Specialist, Staff	Responsible for providing support to end-user community on hardware, software and network related problems, questions, and use. Provides resolutions to out of the ordinary issues for users. If unable to diagnose problem, will work with Help Desk Management to diagnose and resolve problem. Responds to tier two and higher trouble tickets. Ensures problem ownership and promotes end-user satisfaction. Closes activities of tickets assigned. Requires Bachelor's Degree (in Computer Science or related field) or equivalent, and two to four years of related experience in computer hardware, software, networking systems, and in the set-up, configuration, use, and troubleshooting of computer systems.
Help Desk Specialist, Senior	Responsible for providing support to end-user community on difficult hardware, software and network related problems, questions, and use. May provide training and guidance to more junior help desk personnel. Provides resolutions to out of the ordinary issues for users. If unable to diagnose problem, will work with Help Desk Management to diagnose and resolve problem. Responds to tier two and higher trouble tickets. Ensures problem ownership and promotes end-user satisfaction. Closes activities of tickets assigned. Responsible for providing in-depth and high level, support to end-user community on hardware, software and network related problems, questions, and use. Provides problem resolution to users. Confers with user to determine problem. Ensures problem ownership and promotes end-user satisfaction. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and five to seven years of related experience in computer hardware, software, networking systems, and in the set-up, configuration, use, and troubleshooting of computer systems.

Labor Category	Description
Help Desk Specialist, Principal	Serving as company or contract expert, responsible for providing telephone support to end-user community on complex hardware, software and network related problems, questions, and use. May provide training and guidance to more junior help desk personnel. Provides first level problem resolution on the telephone with users, walks the user through a series of steps to determine problem and classify level, priority and nature of problem. If unable to diagnose problem and/or problem requires physical interaction with end user dispatches field engineers from appropriate team. Opens, tracks and closes trouble tickets; ensures problem ownership and promotes end-user satisfaction. Tracks activities of field engineers to who tickets were assigned. Trained and certified in automated help desk management systems. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and seven to nine years of related experience in computer hardware, software, networking systems, and in the set-up, configuration, use, and troubleshooting of computer systems.
Senior Office Administrator	Provides on-site administrative support and coordination to a complex contract, project or task(s). Maintains and tracks costs and performances on contract. Oversees the administrative and clerical functions of assigned contracts, projects, or tasks. Maintains office records and files. May collect time sheets and other personnel records or paperwork for corporate processing. Requires Bachelor's degree or equivalent and two to four years of related experience.

**Labor Category Descriptions applicable to SIN 54151HEAL**

<b>Labor Category Equivalency Language</b>
<p>ManTech is proposing the following labor categories and associated qualifications for services under this contract. All categories may be subject to the requirement of a government security investigation and may need to meet eligibility requirements for access to classified information. Where the job description requires a certain level of educational qualification or “equivalent experience”, one year of education equates to 1.5 years of experience. The following guidelines are provided:</p>
<p>High School Diploma 2 years directly related experience                      Associate Degree 3 – 5 years directly related experience                      Bachelors Degree 6 – 8 years directly related experience                      Masters Degree 9 years directly related experience</p>
<p>Subcontractors are to be included on task orders under the contract labor categories and rates, when possible. Upon the approval of the ordering agency, subcontractors may be included as off-schedule costs if their services are not suitable under the contract labor categories as listed herein.</p>

<b>Labor Category</b>	<b>Description</b>
<p>Health Task Supervisor, Associate</p>	<p>Responsible for the coordination and supervision of a specific technical task or function. Ensures all activities are carried out in accordance with project commitments or specific objectives. Typically supervises between 2 and 10 employees. Responsible for day-to-day coordination and administration of tasks by ensuring quality and productivity standards are maintained while meeting client schedules. Coordinates with other contract and subcontract personnel to ensure work moves smoothly from one functional area to another. Works with project manager and/or client to prepare work schedules and man-hour estimates. Ensures proper training of subordinates. Maintains record of changes in instructions and ensures all team members are informed of changes. Assigns and reviews subordinates’ performance. Prepares performance evaluations. Ensures completion of administrative reporting, e.g., timecards, daily statistics, logs, and task narratives. Responds to client requests and questions. Assists with writing manuals and other documentation. Responsible for status and task management reports for area of responsibility. Requires Bachelor's degree in related field or equivalent, and zero to two years of related experience.</p>

Labor Category	Description
<p>Health Task Supervisor, Staff</p>	<p>Responsible for the coordination and supervision of a specific technical task or function. Ensures all activities are carried out in accordance with project commitments or specific objectives. Typically supervises between 10 and 30 employees. Responsible for day-to-day coordination and administration of tasks by ensuring quality and productivity standards are maintained while meeting client schedules. Coordinates with other contract and subcontract personnel to ensure work moves smoothly from one functional area to another. Works with project manager and/or client to prepare work schedules and man-hour estimates. Ensures proper training of subordinates. Maintains record of changes in instructions and ensures all team members are informed of changes. Assigns and reviews subordinates' performance. Prepares performance evaluations. Ensures completion of administrative reporting, e.g., timecards, daily statistics, logs, and task narratives. Responds to client requests and questions. Assists with writing manuals and other documentation. Responsible for status and task management reports for area of responsibility. Sets up and manages project facilities as dictated by workload requirements. Requires Bachelor's degree in related field or equivalent, and two to four years of related experience.</p>
<p>Health Task Supervisor, Senior</p>	<p>Responsible for the coordination and supervision of a specific technical task or function. Ensures all activities are carried out in accordance with project commitments or specific objectives. Typically supervises more than 30 employees. Responsible for day-to-day coordination and administration of tasks by ensuring quality and productivity standards are maintained while meeting client schedules. Coordinates with other contract and subcontract personnel to ensure work moves smoothly from one functional area to another. Works with project manager and/or client to prepare work schedules and man-hour estimates. Ensures proper training of subordinates. Maintains record of changes in instructions and ensures all team members are informed of changes. Assigns, reviews subordinates' performance and may prepares performance evaluations. Ensures completion of administrative reporting (timecards, daily statistics, logs, and task narratives.) Responds to client requests and questions. Assists with writing manuals and other documentation. Responsible for status and task management reports for area of responsibility. Sets up and manages project facilities as dictated by workload requirements. Requires Bachelor's degree in related field or equivalent, and five to seven years of related experience.</p>
<p>Health Project Manager, Deputy</p>	<p>Assists higher level program/project manager in directing the project life cycle by assisting in development of comprehensive project plans to include both long and short-range goals and milestones. Identifies, acquires, and utilizes company resources to achieve project technical objectives. Directs a project team usually within a matrix organization, monitoring and encouraging functional organizations to complete milestones within specific budgets and schedules. May occasion interface with external customers and top management to communicate status of project throughout life cycle. Requires Bachelor's degree or equivalent, and seven to nine years of related experience.</p>

Labor Category	Description
Health Project Manager	Responsible for the performance of relatively small technical projects or a definable portion of a larger technical program in accordance with contract requirements and company policies, procedures and guidelines. Directs and supervises all support resources for the performance of project assignments and activities. Manages the technical direction of a project through the design, implementation, and testing in accordance with project objectives. Responsible for acquiring follow-on business associated with assigned projects and for supporting new business development by leading relatively small proposals or assisting with major proposals. Requires Bachelor's degree or equivalent, and ten to twelve years of related (technical environment) experience.
Health Program Manager	Responsible for the performance of a relatively significant program or multiple smaller programs in accordance with contract requirements and company policies, procedures and guidelines. Oversees the technology development and/or application, marketing, and resource allocation within program client base. Program area typically represents more than three functional areas such as engineering, systems analysis, quality control and administration. Responsible for acquiring follow-on business associated with assigned programs and for supporting new business development by leading proposals. Requires Bachelor's degree or equivalent, and twelve to fifteen years of related (technical environment) experience including management experience.
Health Program Director	Responsible for the successful technical, schedule, and cost performance of a major program, or multiple programs, through subordinate program/project managers, in accordance with contract requirements and company policies, procedures and guidelines. Responsible for acquiring follow-on business associated with assigned programs and for supporting new business development by leading proposals or through program/project managers. Requires Bachelor's degree or equivalent, and sixteen plus years experience in a related technical environment, including five years related management experience.
Health Database Analyst, Associate	Assists in administering database organizations, standards, controls, procedures, and documentation. Provides entry level technical consulting in the definition, design, and creation of a database environment. Develops applications to help formulate database solutions to business problems, data architectures, database management system facilities and capabilities, and the operation and tuning of databases. Maintains databases with respect to access methods, access time, batch processes, device allocation, validation checks, organization, protection and security, documentation, and statistical methods. Includes maintenance of database dictionaries, and integration of systems through database design. Maintains database dictionaries. Maintains and documents JCL, shell scripts and batch processes. Ensures that documentation is complete and up-to-date. Applies procedures for periodic database backup. Requires Bachelor's degree or equivalent, and zero to two years of related experience.

Labor Category	Description
Health Database Analyst, Staff	Administers database organizations, standards, controls, procedures, and documentation. Provides technical consulting in the definition, design, and creation of a database environment. Assists applications development staff and users on database solutions to business problems, data architectures, database management system facilities and capabilities, and the operation and tuning of databases. Implements and maintains databases with respect to access methods, access time, batch processes, device allocation, validation checks, organization, protection and security, documentation, and statistical methods. Includes maintenance of database dictionaries, and integration of systems through database design and implementation. Maintains database dictionaries and documents JCL, shell scripts and batch processes. Ensures that documentation is complete and up-to-date. Develops and applies procedures for periodic database backup. Requires Bachelor's degree (in Computer Science, Management Information Systems or related field) or equivalent, and two to four years of related experience.
Health Database Analyst, Senior	Defines and administers database organizations, standards, controls, procedures, and documentation. Provides experienced technical consulting in the definition, design, and creation of a database environment. Advises applications development staff and users on database solutions to business problems, data architectures, database management system facilities and capabilities, and the operation and tuning of databases. Ensures economic and efficient availability of data within adequate safeguards. Designs, implements, and maintains databases with respect to access methods, access time, batch processes, device allocation, validation checks, organization, protection and security, documentation, and statistical methods. Includes maintenance of database dictionaries, and integration of systems through database design. Develops and maintains expertise in use of automated tools for database design and implementation. Requires Bachelor's degree (in Computer Science, Management Information Systems) or equivalent, and five to seven years of related (data center environment) experience.
Health Database Analyst, Principal	Defines and oversees database organizations, standards, controls, procedures, and documentation. Provides experienced technical consulting in the definition, design, and creation of a database environment. Advises applications development staff and users on database solutions to business problems, data architectures, database management system facilities and capabilities, and the operation and tuning of databases. Ensures economic and efficient availability of data within adequate safeguards. Designs and implements databases with respect to access methods, access time, batch processes, device allocation, validation checks, organization, protection and security, documentation, and statistical methods. Develops and maintains expertise in use of automated tools for database design and implementation. Develops, maintains and documents JCL, shell scripts and batch processes. Participates as a leader and as a team member, and works to maintain a positive environment. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and seven to nine years of related experience.

Labor Category	Description
Health Database Analyst, Senior Principal	<p>Defines database organizations, standards, controls, procedures, and documentation. Provides experienced technical consulting in the definition, design, and creation of a database environment. Advises applications development staff and users on database solutions to business problems, data architectures, database management system facilities and capabilities, and the operation and tuning of databases. Ensures economic and efficient availability of data within adequate safeguards. Develops expertise in use of automated tools for database design and implementation. Develops procedures to address needs of JCL, shell scripts and batch processes. Ensures that documentation is complete and up-to-date. Develops procedures relating to database and application security including procedures by which access is authorized, enabled, changed and withdrawn. Develops procedures for periodic database backup. Participates as a leader and as the senior team member. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and ten to twelve years of related experience.</p>
Health Database Manager	<p>Responsible for all activities related to the design, implementation and administration of computerized databases. Assigns personnel to various projects and directs their activities; reviews and evaluates their work and prepares performance reports. Confers with and advises subordinates on administrative policies and procedures, technical problems, priorities and methods. Consults with and advises users of the various databases. Projects long-range requirements for database administration and design in conjunction with other managers in the information systems function. Prepares activity and progress reports regarding the database design process. A Bachelor degree or equivalent in a related field and ten to twelve years of relevant work experience are required.</p>
Health Database Engineer, Assoc	<p>Operates at the system level and has learned skills that will apply across the full system life cycle from requirements through database design and implementation. Is trained in system design and development skill as well as database-related skills. The Database Engineer's focus is database-centric, based on the understanding that the heart of every information system is the database, but with a solid view of how the database integrates and operates with other system components. Requirements and design activities will include one of the following: security, backup and recovery, and availability considerations. Will set up and test different design scenarios (or to direct these activities) early in the system development life cycle as part of the process of validating the suitability of proposed design alternatives. Test scenarios must generate sufficient performance data to support database design decisions. Requires Bachelor's degree or equivalent, and zero to two years of related experience.</p>

Labor Category	Description
Health Database Engineer, Staff	Operates at the system level and has learned skills that will apply across the full system life cycle from requirements through database design and implementation. Health Analyst/Computer Forensic Intrusion, Associate	Assists in providing computer forensic and intrusion support to high technology investigations in the form of computer evidence seizure, computer forensic analysis, data recovery, and network assessments. Assists in conduct vulnerability assessments/penetration tests of information systems. Researches and maintains proficiency in tools, techniques, countermeasures, and trends in computer network vulnerabilities, data hiding and network security and encryption. Assists in deterring, identifying, monitoring, investigating and analyzing computer network intrusions. Requires Bachelor's degree or equivalent and zero to two years of related experience with a minimum of six months experience in one or more of the following: computer network penetration testing/techniques; computer evidence seizure, computer forensic analysis, data recovery; computer intrusion analysis/incident response, intrusion detection; computer network surveillance/monitoring; network protocols, network devices, multiple operating systems, and secure architectures. Ability to obtain a security clearance.
Health Analyst/Computer Forensic Intrusion, Staff	Assists in providing computer forensic and intrusion support to high technology investigations in the form of computer evidence seizure, computer forensic analysis, data recovery, and network assessments. Assists in conduct vulnerability assessments/penetration tests of information systems. Researches and maintains proficiency in tools, techniques, countermeasures, and trends in computer network vulnerabilities, data hiding and network security and encryption. Assists in deterring, identifying, monitoring, investigating and analyzing computer network intrusions. Ability to obtain a security clearance.</p>

Labor Category	Description
<p>Health Analyst/Computer Forensic Intrusion, Principal</p>	<p>Provides knowledge in Computer and network vulnerability testing/penetration techniques; Tool development for computer and network forensics and vulnerability testing. Provides computer forensic support to high technology investigations in the form of evidence seizure, computer forensic analysis, and data recovery. Conducts vulnerability assessments/penetration tests of information systems. Researches and maintains proficiency in tools, techniques, countermeasures, and trends in computer and network vulnerabilities, data hiding and encryption. Develop tools, techniques, training and countermeasures for computer and network vulnerabilities, data hiding and encryption. Deter, identify, monitor and investigate computer and network intrusions. Provides expert knowledge in computer and network forensics. Conducts vulnerability assessments. Researches and maintains proficiency in tools, techniques, countermeasures, and trends in computer and network vulnerabilities. Identify, deter, monitor and investigate computer and network intrusions. Requires Bachelor's degree or equivalent and ten to twelve years of related experience with a minimum of four years experience in one or more of the following: computer network penetration testing and techniques; computer evidence seizure, computer forensic analysis, and data recovery; computer intrusion analysis and incident response, intrusion detection; computer network surveillance and monitoring; network protocols, network devices, multiple operating systems, and secure architectures or Master's degree and seven to nine years of related experience. Ability to obtain a security clearance.</p>
<p>Health Applications Engineer, Associate</p>	<p>Assists in the selling process to identify, develops, and supports product/service applications. Requires blend of sales, marketing, and technical skills. Interacts with management at customer sites to assess business processes and address product/service needs. Basic involvement in the overall sales process, pre-sales through post-sales support. May participate in sales presentation activities for key prospects and develops and delivers presentations to customer. Requires Bachelor's degree (in technology, engineering or business discipline) or equivalent, and zero to two years related (engineering and/or sales) experience.</p>

Labor Category	Description
Health Applications Engineer, Staff	Identifies, develops, and supports product/service applications in the selling process. Requires blend of sales, marketing, and technical skills. Interacts with management at customer site to assess business processes and address product/service needs. Strong involvement in the overall sales process, pre-sales through post-sales support. Assists with sales presentation activities for key prospects and develops and delivers presentations to customer. Requires Bachelor's degree (in technology, engineering or business discipline) or equivalent, and two to four years of related (engineering and/or sales) experience.
Health Applications Engineer, Senior	Identifies, assesses, and evaluates moderately complex product/service solutions requiring a blend of strong sales, marketing, and technical skills. Coordinates resolution of product/service issues, upgrades, and problems. Interacts with management at customer site to assess major business processes and address product/service needs. Strong involvement in the overall sales process, pre-sales through post-sales support. Participates in sales presentation activities and develops and delivers presentations to customer's management. Requires Bachelor's degree (in technology or business discipline) or equivalent, and five to seven years of related (engineering and/or sales) experience.
Health Applications Engineer, Principal	Strong involvement in the selling process to identify, develop, and support complex product/service solutions requiring a blend of sales and technical expertise. Coordinates resolution of product/service issues, upgrades, and problems. Interacts with top-level management at customer sites to assess major business processes and address product/service needs. Heavily involved in the overall sales process, pre-sales, the closing of sales, and post-sales support. Participates in sales presentation activities for key prospects and develops and delivers presentations to customer's top management. Requires Bachelor's degree (in technology, engineering or business discipline) or equivalent, and seven to nine years of related (engineering and/or sales) experience.
Health Applications Systems Analyst/Programmer, Associate	Assists in the research to develop or enhance information systems. Assists in the preparation of specifications from which programs will be written. Designs codes, tests, debugs, documents, and maintain programs. Diagrams information flow, showing source and distribution of all segments, processing elements, channels, and methods of entering corrections, and data retention requirements. Attends on-going training sessions to achieve a higher level of technical skill. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and zero to two years of related work experience.
Health Applications Systems Analyst/Programmer, Staff	Formulates and defines system scope and objectives to develop or modify moderately complex problems to develop or enhance information systems. Prepares detailed specifications from which programs will be written. Designs, codes, tests, debugs, documents, and maintains programs. Diagrams information flow, shows source and distribution of all segments, processes elements, channels, and methods of entering corrections, and data retention requirements. Requires Bachelor's degree or equivalent, and two to four years of related work experience.

Labor Category	Description
Health Applications Systems Analyst/Programmer, Senior	Formulates and defines system scope and objectives. Establish procedures to solve complex problems regarding system equipment capacity and limitations, operating time and output. Prepare detailed specifications from which programs will be written and design, code, test, debug, and document newly written programs. Diagrams information flow, showing source and distribution of all segments, processing elements, channels, and methods of entering corrections, and data retention requirements. Perform at an advanced technical level on all phases of applications systems analysis and programming activities. May be responsible for the completion of a phase of a project. Provide guidance to less experienced analyst/programmers. Requires Bachelor's degree or equivalent, and five to seven years of related experience.
Health Applications Systems Analyst/Programmer, Principal	Formulates and defines system scope and objectives for assigned projects. Establishes procedures to solve complex problems regarding system equipment capacity and limitations, operating time and output. Prepares detailed specifications from which programs will be written and designs, codes, tests, debugs, and documents newly written programs. Diagrams information flow, showing source and distribution of all segments, processing elements, channels, and methods of entering corrections, and data retention requirements. Performs at an advanced technical level and has complete understanding of all phases of applications systems analysis and programming activities. Directs, provides guidance, and monitors the performance of less experienced analyst/programmers. Responsible for quality assurance review of assigned project. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and seven to nine years of related experience.
Health Applications Systems Analyst/Programmer, Sr Principal	Formulates and defines system scope and objectives for assigned projects. Establishes procedures to solve complex problems regarding system equipment capacity and limitations, operating time and output. Prepares detailed specifications from which programs will be written. Designs, codes, tests, debugs, and documents newly written programs. Performs at an advanced technical level and has complete understanding of all phases of applications systems analysis and programming activities. Directs, provides guidance, and monitors the performance of less experienced analyst/programmers. Responsible for quality assurance review of assigned project. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and ten to twelve years of related experience.
Health Business Systems Analyst, Associate	Assists in developing and defining systems scope and objectives through research combined with a basic understanding of business systems and industry requirements. Interviews personnel from functional user area under study to learn general purpose of systems and information requirements of positions involved in the data flow. Analyzes business and user needs, document requirements, and revises existing system logic difficulties as necessary under direction of more experienced Business System Analyst personnel. Attend on-going training sessions to achieve a higher level of technical skill. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and zero to two years of related experience.

Labor Category	Description
Health Business Systems Analyst, Staff	Formulates and defines systems scope and objectives through research combined with a basic understanding of business systems and industry requirements. Develops or modifies procedures to solve moderately complex problems within information systems. Analyzes business and user needs, document requirements, and revise existing system logic difficulties as necessary. Provides guidance to less experienced Business System Analysts. Requires Bachelor's degree or equivalent, and two to four years of related experience.
Health Business Systems Analyst, Senior	Formulates and defines systems scope and objectives through user needs and an understanding of business systems and industry requirements. Develops or modifies procedures to solve complex problems within information systems. Analyzes business and user needs, document requirements, and translate into proper system requirement specifications. Provide guidance to less experienced Business System Analysts. Requires Bachelor's degree (in Computer Science or a related field) or equivalent, and five to seven years of related experience.
Health Business Systems Analyst, Principal	Provides expertise in the formulation of systems scope and objectives relative to the organization's business plan and industry requirements. Works independently or as a member of a project team responsible for providing technical guidance related to the business implications of the application of various systems. Provides technical consulting on complex projects. Devises and or modifies procedures to solve the most complex technical problems related to computer equipment capacity and limitations, operating time and form of desired results. Creates detailed specifications from which programs will be written. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and seven to nine years of related experience.
Health Business Systems Analyst, Senior Principal	Provides expertise in the formulation of systems scope and objectives relative to the organization's business plan and industry requirements. Works independently or as a member of a project team responsible for providing technical guidance related to the business implications of the application of various systems. Provides technical consulting on complex projects. Devises and/or modifies procedures to solve the most complex technical problems related to computer equipment capacity and limitations, operating time and form of desired results. Create detailed specifications from which programs will be written. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and ten to twelve years of related experience.
Health Configuration Management Specialist, Associate	Responsible for routine configuration control during the product development phase. May reviews design release documents for completeness, proper approvals and system updates, to ensure correct configuration modifications. Reviews contracts and drafts configuration plans to encompass all specification requirements. Assists in the maintenance of the database. Requires Bachelor's degree or equivalent, and zero to two years of related experience.
Health Configuration Management Specialist, Staff	Responsible for advanced configuration control during product development phase. Reviews design release documents for completeness, proper approvals and system updates, to ensure correct configuration modifications. Reviews contracts and drafts configuration plans to encompass all specification requirements. Assists in the maintenance of the database. May also be responsible for contract data submittal and status on smaller projects. Requires Bachelor's degree or equivalent, and two to four years of related experience.

Labor Category	Description
Health Configuration Management Specialist, Senior	<p>Designs and establishes management documentation. Authorizes the release of drawings, and software configuration changes specified by management and other functional groups. Provides advice and guidance on methods, procedures, and requirements to individuals responsible for the creation of documentation. Plans and implements methods to improve response. Participates in special studies. May provide work leadership for lower level employees. Under the guidance of a senior level analyst, performs data management tasks as required by contract. Requires Bachelor's degree or equivalent, and five to seven years of related experience.</p>
Health Configuration Management Specialist, Principal	<p>Designs and establishes management documentation. Authorizes the release of drawings, and software configuration changes specified by management and other functional groups. Provides advice and guidance on methods, procedures, and requirements to individuals responsible for the creation of documentation. Plans and implements methods to improve response. Participates in special studies. Provides work leadership for lower level employees. Performs data management tasks as required by contract. Requires Bachelor's degree or equivalent, and seven to nine years of related experience.</p>
Health Configurations/Data Management Analyst Mgr	<p>Establishes and maintains configuration and data management policies and procedures to be utilized by departmental personnel and other participating functions to ensure a standard and cost effective approach to the application of configuration and data management requirements. Organizes and implements the process of evaluating performance against established policies and procedures to ensure hardware and documentation integrity is being maintained at the least cost to the company and programs. Develops departmental operating budgets, productivity goals, and staffing levels. Provides the resources necessary to maintain the integrity of the Bills of Material Subsystem of the Manufacturing database. Requires Bachelor degree or equivalent experience, and ten to twelve years of experience in the application of MIL and DoD requirements and management experience.</p>
Health Document Specialist, Associate	<p>Oversees the Document Control (DC) policy system, working closely with technical writing, DC implementation and configuration management staff. Researches and makes recommendations for appropriate hardware and software required for the DC system. Develops and present DC training sessions. Requires Bachelor's degree (Engineering or Technical discipline) or equivalent; zero to two years of related experience.</p>
Health Document Specialist, Staff	<p>Oversees the Document Control (DC) policy system, working closely with technical writing, DC implementation and configuration management staff. Research and make recommendations for appropriate hardware and software required for the DC system. Develop and present DC training sessions. Requires Bachelor's degree (in Engineering or related field) and two to four years of related experience.</p>
Health Document Specialist, Senior	<p>Oversees the Document Control (DC) policy system, working closely with technical writing, DC implementation and configuration management staff. Researches and makes recommendations for appropriate hardware and software required for the DC system. Develops and presents DC training sessions. Requires Bachelor's degree (in Engineering or Technical field) or equivalent, and five to seven years of related experience.</p>

Labor Category	Description
Health Document Specialist, Principal	Oversees the Document Control (DC) policy system, working closely with technical writing, DC implementation and configuration management staff. Researches and makes recommendations for appropriate hardware and software required for the DC system. Develops and presents DC training sessions. Requires Bachelor's degree (in engineering or technical field) or equivalent, and seven to nine years of related experience.
Health Functional Analyst, Associate	Analyzes factors and components of systems to recommend and institute changes to increase efficiency. Plan studies of work problems and procedures, such as organizational changes, communication, information flow, integrated production methods, or cost analysis. Performs systematic review of selected functions to determine application and design of systems or models. Prepares models of problem areas in the form of one of several equations. Utilizes mathematical models and management plans. Specifies manipulative and computational methods of formulation and uses data processing for solving equations, programming and processing. Prepares charts and diagrams to assist in problem analysis and submits recommendations for solutions. Writes specification manuals and user documentation for client or user personnel. Assists more senior level Functional Analysts in program design and analysis. Requires Bachelor's Degree in related field or equivalent experience and zero to two years of related experience.
Health Functional Analyst, Staff	Analyzes factors and components of systems to recommend and institute changes to increase efficiency. Plan studies of work problems and procedures, such as organizational changes, communication, information flow, integrated production methods, or cost analysis. Translates user requirements into system specifications, configuration management plans, life cycle management, documentation, and integrated logistics support plans and related operational summaries. Recommends improvements of modifications in sequence of operations, equipment utilization and related matters. Examines and analyzes current and contemplated operations for developing, defining, and coordinating user requirements which will satisfy the total program need. Gathers information from users, defines work problems, and designs a system and procedures to resolve problems. Interfaces with the user and participates in and conducts structured walk through. Writes specifications manuals and user documentation for client or user personnel. Assist more senior level Functional Analysts in the design, development, and analysis of logical and physical database design and maintenance. Requires Bachelor's Degree in related field or equivalent experience and two to four years of related experience.

Labor Category	Description
Health Functional Analyst, Senior	<p>Analyzes factors and components of systems to recommend and institute changes to increase efficiency. Plan studies of work problems and procedures, such as organizational changes, communication, information flow, integrated production methods, or cost analysis. Recommends improvements of modifications in sequence of operations, equipment utilization and related matters. Examines and analyzes current and contemplated operations for developing, defining, and coordinating user requirements which will satisfy the total program need. Translates user requirements into system specifications, configuration management plans, life cycle management documentation, and integrated logistics support plans and related operational summaries. Writes specifications manuals and user documentation for client or user personnel. Gathers information from users, defines work problems, and designs a system and procedures to resolve problems. May supervise and provide technical direction to lower level staff. Requires Bachelor's Degree in related field or equivalent and five to seven years of related experience.</p>
Health Functional Analyst, Principal	<p>Oversees the analysis of problems in terms of management information and conceptualizes proposals that afford maximum probability of profit or effectiveness in relation to cost or risk. Performs advanced and complex systematic reviews of selected functions to determine application and design of systems or models. Participates in various testing functions (i.e. string and acceptance tests) to verify that results are correct. Develops and updates functional or operating manuals outlining established methods of performing work in accordance with organizational policy. Trains clients or user personnel in the operation and capabilities of proposed models. Provides functional guidance on more complex projects. Requires Bachelor's Degree in related field or equivalent experience and seven to nine years of related experience.</p>
Health Functional Analyst, Senior Principal	<p>Serves as a company expert and oversees the analysis of the most complex problems in terms of management information and conceptualizes proposals that afford maximum probability of profit or effectiveness in relation to cost or risk. Performs very advanced and complex systematic reviews of selected functions to determine application and design of systems or models. Participates in various testing functions (i.e. string and acceptance tests) to verify that results are correct. Develops and updates functional or operating manuals outlining established methods of performing work in accordance with organizational policy. Trains clients or user personnel in the operation and capabilities of proposed models. Provides functional guidance on more complex projects. Requires Bachelor's Degree in related field or equivalent experience and ten to twelve years of related experience or Master's degree and seven to nine years of related experience.</p>
Health Hardware Engineer, Associate	<p>Evaluates reliability of materials, properties and techniques used in production; plans, designs and develops electronic parts, components, integrated circuitry, mechanical systems, equipment and packaging, optical systems and/or DSP systems. Under direct supervision, designs and develops simple equipment, processes and systems that involve data networks, communications, and display. Analyzes equipment specifications and process requirements to conceive a practical design. Based on limited technical knowledge of assigned product line, few technical decisions are made. May prepare related installation</p>

Labor Category	Description
	guides and instructions. Requires Bachelor's degree in engineering or applied science, or equivalent and zero to two years of experience.
Health Hardware Engineer, Staff	Evaluates reliability of materials, properties and techniques used in production; plans, designs and develops electronic parts, components, integrated circuitry, mechanical systems, equipment and packaging, optical systems and/or DSP systems. Under general supervision, designs and develops equipment, processes and systems that involve data networks, communications, and display. Analyzes equipment specifications and process requirements to conceive a practical design. Meets with research engineers or scientists and customer representatives to resolve design problems. Based on extensive technical knowledge of assigned product line, develops solutions for design problems. Prepares related installation guides and instructions. Requires Bachelor's degree in engineering or applied science, or equivalent and two to four years of experience.
Health Hardware Engineer, Senior	Evaluates reliability of materials, properties and techniques used in production; plans, designs and develops electronic parts, components, integrated circuitry, mechanical systems, equipment and packaging, optical systems and/or DSP systems. Under general direction, designs and develops equipment, processes and systems that involve data networks, communications, and display. Analyzes equipment specifications and process requirements to conceive a practical design. Determines feasibility from technical and economic perspectives. Coordinates and consults with research engineers or scientists and customer representatives to resolve design problems. Develops and maintains technical procedures, documentation and manuals. Compiles and analyzes operational data and directs tests to establish standard for new designs or modifications to existing equipment, systems, or processes. May supervise the work of technicians and technologists who provide technical support. Requires Bachelor's degree in engineering or applied science, or equivalent and five to seven years of experience.
Health Hardware Engineer, Principal	Evaluates reliability of materials, properties and techniques used in production; plans, designs and develops electronic parts, components, integrated circuitry, mechanical systems, equipment and packaging, optical systems and/or DSP systems. Under general direction, designs and develops equipment, processes and systems that involve data networks, communications, and display. Analyzes equipment specifications and process requirements to conceive a practical design. Determines feasibility from technical and economic perspectives. Coordinates and consults with research engineers or scientists and customer representatives to resolve design problems. Develops and maintains technical procedures, documentation and manuals. Compiles and analyzes operational data and directs tests to establish standard for new designs or modifications to existing equipment, systems, or processes. May supervise technical support staff. Requires Bachelor's degree in engineering or applied science, or equivalent and seven to nine years of related experience.

Labor Category	Description
<p>Health Hardware Engineer, Senior Principal</p>	<p>Evaluates reliability of materials, properties and techniques used in production; plans, designs and develops electronic parts, components, integrated circuitry, mechanical systems, equipment and packaging, optical systems and/or DSP systems. Serves as lead engineer, designs and develops equipment, processes and systems that involve data networks, communications, and display. Analyzes equipment specifications and process requirements to conceive a practical design. Determines feasibility from technical and economic perspectives. Coordinates and consults with research engineers or scientists and customer representatives to resolve design problems. Develops and maintains technical procedures, documentation and manuals. Compiles and analyzes operational data and directs tests to establish standard for new designs or modifications to existing equipment, systems, or processes. May supervise the work of technicians and technologists who provide technical support. Requires Bachelor's degree in engineering or applied science, or equivalent and ten to twelve years of experience.</p>
<p>Health Hardware Engineering Manager</p>	<p>Manages a work group composed of eight to ten design engineers engaged in a variety of hardware engineering activities. Has responsibility for all phases of project planning and control including schedules, budgets, resource allocation, and results. Decisions are not usually subject to review. Performance is evaluated based on adherence to time schedules, budgets, soundness of approach, and general effectiveness. Requires Bachelor's degree (in a related field) or equivalent, and ten to twelve years of related (engineering and management) experience or Master's degree (in Technology or Math) and seven to nine years of related experience.</p>
<p>Health Information Security Engineer, Associate</p>	<p>Defines, plans, designs, and evaluates information security systems. Assesses architecture and current hardware limitations, defines and designs system specifications, input/output processes and working parameters for hardware/software compatibility. Experience with information networks design, operation, equipment. Interest/aptitude for information security work. Works under of direction of more experienced information security engineer. Requires Bachelor's degree in related discipline (engineering, computer science or related discipline) and zero to two of related experience.</p>
<p>Health Information Security Engineer, Staff</p>	<p>Defines, plans, designs, and evaluates information security systems. Assesses architecture and current hardware limitations, defines and designs system specifications, input/output processes and working parameters for hardware/software compatibility. Basic familiarity with information network elements – routers, firewalls, etc. Ability to apply technical knowledge to information security designs. Designs and conducts tests of designs and architectures. Requires Bachelor's degree in (field mathematics, telecommunications, electrical engineering, computer engineering, computer science) or related discipline, and two to four years' related experience.</p>

Labor Category	Description
Health Information Security Engineer, Senior	Defines, plans, designs, and evaluates information security system. Assesses architecture and current hardware limitations, defines and designs system specifications, input/output processes and working parameters for hardware/software compatibility. Designs and conducts tests of designs and architectures. Leads and guides less experienced engineers. Capable of independent management of projects. Requires Bachelor's degree (in field mathematics, telecommunications, electrical engineering, computer engineering, computer science) or equivalent and five to seven years experience with information networks and the security aspects.
Health Information Security Engineer, Principal	Defines, plans, designs, and evaluates information security systems. Assesses architecture and current hardware limitations, defines and designs system specifications, input/output processes and working parameters for hardware/software compatibility. Performs a variety of complex tasks associated with information security ranging from the design of security components to complex architectures. Supervises the work of other engineers performing a variety of information security tasks. Capable of independent program supervision. Requires Bachelor's degree (in field mathematics, telecommunications, electrical engineering, computer engineering, computer science) or equivalent and seven to nine years related experience.
Health Information Security Engineer, Sr Principal	Defines, plans, designs, and evaluates information security systems. Assesses architecture and current hardware limitations, defines and designs system specifications, input/output processes and working parameters for hardware/software compatibility. Provides expert level consultation and technical services on all aspects of Information Security. Manages large-scale programs of national or international scope. Maintains senior affiliations with national and international organizations associated with information security. Requires Bachelor's degree or equivalent and ten to twelve years related experience or Master's degree with seven to nine years of experience field mathematics, telecommunications, electrical engineering, computer engineering, computer science.
Health Information Security Specialist, Associate	Knowledge of information system administration and information network software/hardware including firewalls and intrusion detection systems. Basic familiarity with information security procedures. Safeguards network against unauthorized infiltration, modification, destruction or disclosure. May research, evaluate, test, recommends communicate and implement new security software or devices. Implements, enforces, communicates and develops security policies or plans for data, software applications, hardware, and telecommunications. Provides information to management regarding the negative impact caused by theft, destruction, alteration or denial of access to information. Requires Bachelor's degree in related discipline (engineering, computer science or related discipline) and zero to two of related experience.

Labor Category	Description
Health Information Security Specialist, Staff	<p>Knowledge and experience with information network security equipment. Understanding of information network threats such as computer viruses. Tests and operates firewalls, intrusion detection systems, enterprise anti-virus systems and software deployment tools. Safeguards the network against unauthorized infiltration, modification, destruction or disclosure. May research, evaluate, test, recommends communicate and implement new security software or devices. Implements, enforces, communicates and develops security policies or plans for data, software applications, hardware, and telecommunications. Provides information to management regarding the negative impact caused by theft, destruction, alteration or denial of access to information. Provides recommendations on information assurance engineering standards, implementation dependencies, and changing information assurance related technologies. Requires Bachelor's degree in (field mathematics, telecommunications, electrical engineering, computer engineering, computer science) or related discipline, and two to four years' related experience or Certification in systems administrator, network certification, etc. six to eight years of experience.</p>
Health Information Security Specialist, Senior	<p>Manages the company's firewalls and intrusion detection systems. Develops, tests, and operates firewalls, intrusion detection systems, enterprise anti-virus systems and software deployment tools. Safeguards the network against unauthorized infiltration, modification, destruction or disclosure. May research, evaluate, test, recommends communicate and implement new security software or devices. Implements, enforces, communicates and develops security policies or plans for data, software applications, hardware, and telecommunications. Provides information to management regarding the negative impact caused by theft, destruction, alteration or denial of access to information. Provides recommendations on information assurance engineering standards, implementation dependencies, and changing information assurance related technologies. Manages the company's firewalls and intrusion detection systems. Develops, tests, and operates firewalls, intrusion detection systems, enterprise anti-virus systems and software deployment tools. Safeguards the network against unauthorized infiltration, modification, destruction or disclosure. Researches, evaluates, tests, recommends communicate and implement new security software or devices. Implements, enforces, communicates and develops security policies or plans for data, software applications, hardware, and telecommunications. Provides information to management on the negative impact caused by theft, destruction, alteration or denial of access to information. Provides recommendations on information assurance engineering standards, implementation dependencies, and changing information assurance related technologies. May supervise lower level staff. Requires Bachelor's degree or equivalent and five to seven years related experience.</p>
Health Information Security Specialist, Principal	<p>Manages extensive evaluations of major information security networks, prepares evaluation reports, presents recommendations. Conducts trade off analyses of products for clients to determine optimal informant security solutions. Provides consulting services on a wide variety of information assurance topics. Prepares remedial options and supervise correction of information security shortfalls. Works independently in expert role at customer</p>

Labor Category	Description
	site. Requires Bachelor's degree or equivalent and seven to nine years of directly related experience.
Health Information Security Specialist, Sr Principal	Functions as expert consultant in all aspects of information security. Prepares in-depth studies and analyses. Manages major information security efforts. Maintains affiliation with national/international organizations. Functions on broad scope programs of national/international basis. Capable of fully independent work in support of a customer either on site or of-site. Requires Bachelor's degree or equivalent and ten to twelve years related experience or Master's degree with seven to nine years of experience field mathematics, telecommunications, electrical engineering, computer engineering, computer science.
Health Information Technology Manager	Analyzes complex local and wide area network systems, including planning, designing, evaluating, selecting operating systems and protocol suites and configuring communication media with concentrators, bridges, and other devices. Resolves difficult inter-operability problems to obtain operation across all platforms, including e-mail, files transfer, multimedia, teleconferencing and the like. Configures systems to user environments. Supports acquisition of hardware and software as well as subcontractor services. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and ten to twelve years of related (progressively responsible network systems engineering) experience and management experience. Master's degree in Computer Science preferred.
Health Information Technology Scientist	Analyzes complex local and wide area network systems, including planning, designing, evaluating, selecting operating systems and protocol suites and configuring communication media with concentrators, bridges, and other devices. Resolves difficult inter-operability problems to obtain operation across all platforms, including e-mail, files transfer, multimedia, teleconferencing and the like. Configures systems to user environments. Supports acquisition of hardware and software as well as subcontractor services. Serves as manager or industry-recognized expert. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and twelve to fifteen years of related (progressively responsible network systems engineering) experience and management experience or Master's degree in Computer Science with nine to eleven years of related experience.
Health Information Technology Senior Scientist	Directs all aspects of the local and wide area network systems, including planning, designing, evaluating, selecting operating systems and protocol suites and configuring communication media with concentrators, bridges, and other devices. Resolves difficult and complex inter-operability problems to obtain operation across all platforms, including e-mail, files transfer, multimedia, teleconferencing and the like. Analyzes and configures systems to user environments. Supports acquisition of hardware and software as well as subcontractor services. Serves as in-house and industry recognized expert. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and sixteen plus years of related network systems engineering experience. Master's degree in Computer Science preferred.

Labor Category	Description
Health Information Technology Supervisor	Responsible for the supervision and direction of a group of Information Systems professionals. Coordinates the activities of the group to meet objectives, deadlines, budgets, and coordinate/resolve customer requests. Serves as the technical specialist for the area of assigned responsibility, provides training and guidance of assigned staff. Requires Bachelor's degree (in a technical discipline) or equivalent, and seven to nine years of related experience.
Health LAN/WAN Engineer, Associate	Performs as entry level engineer in some of the following area: local and wide area networking, communications, and related software/hardware within a multi-platform operating environment. Works in integration of a total network including the planning, design, installation, maintenance, management, and coordination of the corporate LAN/WAN. Learns in areas of technological developments and applications. Recommend network security and policies. May work with Voice and/or Data Communications Analyst. Requires Bachelor degree or equivalent in Computer Science or a related field, and zero to two years of relevant experience.
Health LAN/WAN Engineer, Staff	Perform as mid-level contributor with knowledge and experience in local and wide area networking, communications, and related software/hardware within a multi-platform operating environment. Responsible for the integration of a network including assisting in the planning, design, installation, maintenance, management, and coordination of the corporate LAN/WAN. Current on most technological developments and applications, and helps to evaluate vendor products to make recommendations for purchase. May work with Voice and/or Data. Requires Bachelor degree or equivalent (Computer Science or a related field), and two to four years of relevant experience.
Health LAN/WAN Engineer, Senior	Perform as a senior technical participant with knowledge and experience in local and wide area networking, communications, and related software/hardware within a multi-platform operating environment. Responsible for the integration of a total network including the planning, design, installation, maintenance, management, and coordination of the corporate LAN/WAN. Current on technological developments and applications, and evaluate vendor products to make recommendations for purchase. Recommend network security and policies. May work with Voice and/or Data Communications Analyst. Requires Bachelor's degree or equivalent in Computer Science or a related field, and five to seven years of relevant experience are required.
Health LAN/WAN Engineer, Principal	Perform as a technical expert with advanced knowledge and experience in local and wide area networking, communications, and related software/hardware within a multi-platform operating environment. Responsible for the overall integration of a total network including the planning, design, installation, maintenance, management, and coordination of the corporate LAN/WAN. Current on technological developments and applications, and evaluate vendor products to make recommendations for purchase. Recommend network security and policies. May work with Voice and/or Data Communications Analyst. Requires Bachelor's degree or equivalent in Computer Science or a related field, and seven to nine years of relevant experience are required.

Labor Category	Description
Health LAN/WAN Engineer, Senior Principal	Perform as the most senior technical expert with advanced knowledge and experience in local and wide area networking, communications, and related software/hardware within a multi-platform operating environment. Responsible for the overall integration of a total network including the planning, design, installation, maintenance, management, and coordination of the corporate LAN/WAN. Current on technological developments and applications, and evaluate vendor products to make recommendations for purchase. Recommend network security and policies. May work with Voice and/or Data Communications Analyst. Requires Bachelor's degree or equivalent in Computer Science or a related field, and ten to twelve years of related experience.
Health Network Administrator, Associate	Designs, installs, maintain and coordinate the use of the network system. Evaluates hardware, software and peripheral equipment. Manages network performance to maintain high quality transmission service on the network. Maintains, create/deletes user accounts, maintains and updates system security plans on all platforms. Implements and coordinates network policies, procedures and standards. Enforces security procedures. Supervises and schedules the network technician staff and trains users. Performs other duties as assigned which may require specific physical abilities. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and zero to two years of related experience.
Health Network Administrator, Staff	Designs, installs, maintain and coordinate the use of the network system. Evaluates hardware and software and peripheral equipment for simple networks. Manages network performance. Troubleshoots and resolves problems to ensure quality transmission service on the network. Maintains, creates/deletes user accounts, maintains and updates system security plans on most platforms. Administers network policies, procedures and standards. Enforces security procedures. Performs other duties as assigned which may require specific physical abilities. Requires Bachelor's degree (in Computer Science or Management Information Systems) or equivalent, and two to four years of related (data center environment) experience.
Health Network Administrator, Senior	Designs, installs, maintains and coordinates the use of the network system. Evaluates hardware and software and peripheral equipment for large, complex networks. Manages network performance. Troubleshoots and resolves complex problems to ensure quality transmission service on the network. Maintains user accounts, maintains and updates system security plans on all platforms. Implements and coordinates network policies, procedures and standards. Enforces security procedures. May supervise and schedule the Network Technician staff and trains users. Performs other duties as assigned which may require specific physical abilities. Requires Bachelor's degree (in Computer Science or Management Information Systems) or equivalent, and five to seven years of related (data center environment) experience.

Labor Category	Description
Health Network Administrator, Principal	Serves as in-house expert to design, install, maintain and coordinate the use of the network system. Evaluates complex hardware and software and peripheral equipment for large, complex networks. Manages network performance. Troubleshoots and resolves complex problems to ensure quality transmission service on the network. Manages and maintains, create/deletes user accounts, maintains and updates system security plans on all platforms. Implements and manages network policies, procedures and standards. Enforces security procedures. Supervises and schedules the Network Technician staff and trains users. Performs other duties as assigned which may require specific physical abilities. Requires Bachelor's degree (in Computer Science or Management Information Systems) or equivalent, and seven to nine years of related (data center environment) experience.
Health Network Administrator, Senior Principal	As a recognized industry expert manages the company's designs, installation, and maintains and coordinates the use of the network system. Evaluates complex hardware and software and peripheral equipment for large, complex networks. Manages network performance. Troubleshoots and resolves complex problems to ensure quality transmission service on the network. Manages and maintains, create/deletes user accounts, maintains and updates system security plans on all platforms. Implements and manages network policies, procedures and standards. Enforces security procedures. Manages and schedules the Network Technician staff and develops the training for users. Requires Bachelor's degree (in Computer Science or Management Information Systems) or equivalent, and ten to twelve years of related (data center environment) experience.
Health Network Engineer, Associate	Evaluates, designs, documents, installs, implements, tests, and performs problem isolation and resolution. Monitors, tunes, sets standards and maintain a range of computer network components and systems. Performs these functions across a limited range of network facilities including some, but not all, physical media, protocol stacks, hubs, routers, bridges, gateways, digital servers, line drivers, telecommunications transport facilities, mainframe VTAM, NCP and related software and hardware, and network management components. Utilizes monitoring, performance analysis, network management, software and hardware equipment to troubleshoot and isolate problems, gauge network performance, and trace data and protocol activity. Requires Bachelor's degree (in Computer Science, Math or Engineering) or equivalent, and zero to two years of related experience.

Labor Category	Description
<p>Health Network Engineer, Staff</p>	<p>Evaluates, designs, documents, installs, implements, tests, performs problem isolation and resolution. Monitors, tunes, sets standards and maintain a range of computer network components and systems. Performs these functions across most of the network facilities including physical media, protocol stacks, hubs, routers, bridges, gateways, digital servers, line drivers, telecommunications transport facilities, mainframe VTAM, NCP and related software and hardware, and network management components. Provides client consulting and training on the interfacing and use of the network facilities. Begins to plan research, evaluate, and recommend new computer network equipment and technologies. Utilizes monitoring, performance analysis, network management, software and hardware equipment to troubleshoot and isolate problems, gauge network performance, and trace data and protocol activity. Devises solutions to moderately complex operational problems within the capacity and operational limitations of installed equipment. Requires Bachelor's degree (in Computer Science, Math or Engineering) or equivalent, and two to four years of related experience.</p>
<p>Health Network Engineer, Senior</p>	<p>Evaluates, designs, documents, installs, implements, tests, performs problem isolation and resolution, monitors, tunes, and sets standards. Maintains a complex range of computer network components and systems. Performs these functions across a wide range of network facilities including physical media, protocol stacks, hubs, routers, bridges, gateways, digital servers, line drivers, telecommunications transport facilities, mainframe VTAM, NCP and related software and hardware, and network management components. Provides client consulting and training on the interfacing and use of the network facilities. Plans and coordinates computer network initiatives. Researches, evaluates, and recommends new computer network equipment and technologies. Utilizes monitoring, performance analysis, network management, software and hardware equipment to trouble shoot and isolate problems, gauge network performance, and trace data and protocol activity. Devises solutions to operational problems within the capacity and operational limitations of installed equipment. Develops and executes contingency plans for network software and hardware failures including isolated and major outages. Provides internal consulting, technical guidance, information and support to application developers, computer operations, workstation support, company management and departmental clients. Requires Bachelor's degree in (Computer Science, Math or Engineering) or equivalent, and five to seven years of related experience.</p>

Labor Category	Description
<p>Health Network Engineering Senior Manager</p>	<p>Oversees the Network Engineering activities. Reviews and prioritizes network needs and analyzes project costs and feasibility. Develops network analysis standards and methodology consistent with technical requirements. Schedules staff to obtain proper response in a timely manner. Reviews recommendations for network improvement. Requires Bachelor's degree or equivalent and twelve to fifteen years of experience or Master's degree in related field and nine to eleven years of experience, including seven to nine years of management experience.</p>
<p>Health Program Control Analyst, Associate</p>	<p>Assists in providing on-site project management/administrative support and coordination to a complex contract, project task(s) or business unit. Duties may include contract accounting and reporting, project schedule focus to management, tracking annual fiscal plans and monthly updates, payroll/personnel processing, maintenance and reporting, contract administration, purchasing, facility leasing and service administration. Maintains contract budgets, prepares contract billing, estimates materials, equipment, production costs and delivery schedules. Oversees personnel records, facility administration and purchases equipment and supplies. Requires Bachelor's degree (in Business Administration) or equivalent, and zero to two years of related (project support or management) experience.</p>
<p>Health Program Control Analyst, Staff</p>	<p>Provides on-site project management/administrative support and coordination to a complex contract, project, task(s) or business unit. Duties may include contract accounting and reporting, project schedule focus to management, tracking annual fiscal plans and monthly updates, payroll/personnel processing, maintenance and reporting, contract administration, purchasing, facility leasing and service administration. Maintains contract budgets, prepares contract-billing, estimates materials, equipment, production costs and delivery schedules. Oversees personnel records, facility administration and purchases equipment and supplies. Requires Bachelor's degree (in Business Administration) or equivalent, and two to four years of related (project support or management) experience.</p>
<p>Health Program Control Analyst, Senior</p>	<p>Provides senior level on-site project management/administrative support and coordination to a complex contract, project, task(s) or business unit. Duties may include contract accounting and reporting, project schedule focus to management, tracking annual fiscal plans and monthly updates, payroll/personnel processing, maintenance and reporting, contract administration, purchasing, facility leasing and service administration. Maintains contract budgets, prepares contract-billing, estimates materials, equipment, production costs and delivery schedules. Oversees personnel records, facility administration and purchases equipment and supplies. Requires Bachelor's degree (in Business Administration) or equivalent, and five to seven years of related (project support or management) experience.</p>

Labor Category	Description
Health Program Control Analyst, Lead	Provides senior level on-site project management/administrative support and coordination to a complex contract, project, task(s) or business unit. Duties may include contract accounting and reporting, payroll/personnel processing, project schedule focus to management, tracking annual fiscal plans and monthly updates, maintenance and reporting, contract administration, purchasing, facility leasing and service administration. Maintains contract budgets, prepares contract-billing, estimates materials, equipment, production costs and delivery schedules. Oversees personnel records, facility administration and purchases equipment and supplies. Requires Bachelor's degree (in Business Administration) or equivalent, and seven to nine years of related (project management) experience.
Health Program Control Manager	Manages assigned group of Program Control Analysts who provide on-site administrative support and coordination to various contract(s), project(s), task(s) or business unit (s). Duties may include the management of contract accounting and reporting, payroll/personnel processing, maintenance and reporting, contract administration, purchasing, facility leasing and service administration. Maintains contract budgets, prepares contract billing, estimates materials, equipment, production costs and delivery schedules. Oversees personnel records, facility administration and purchases equipment and supplies. Participates in introducing the Company operating standards, Plans objectives and goals for staff and selects and trains new employees. Requires Bachelor's degree (in Business Administration) or equivalent, and ten to twelve years of related (project support and supervisory/management) experience.
Health Security Engineer, Associate	Monitors, evaluates, and maintains systems and procedures to protect the data systems and databases from unauthorized users. Identifies potential threats and responds to reported security violations. Determines causes of security breaches. Researches, recommends, and implements changes to procedures to protect data from future violations. Assist in educating users on security procedures. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and zero to two years of related experience.
Health Security Engineer, Staff	Monitors, evaluates, and maintains systems and procedures to protect the data systems and databases from unauthorized users. Identifies potential threats and responds to reported security violations. Determines causes of security breaches. Researches, recommends, and implements changes to procedures to protect data from future violations. Assists in educating users on security procedures. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and two to four years of related experience.
Health Security Engineer, Senior	Monitors, evaluates, and maintains systems and procedures to protect the data systems and databases from unauthorized users. Identifies potential threats and responds to reported security violations. Determines causes of security breaches. Researches, recommends, and implements changes to procedures to protect data from future violations. Assists in educating users on security procedures. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and five to seven years of related work experience.

Labor Category	Description
Health Security Engineer, Principal	Monitors, evaluates, and maintains systems and procedures to protect the data systems and databases from unauthorized users. Identifies potential threats and respond to reported security violations. Determines causes of security breaches. Researches, recommends, and implements changes to procedures to protect data from future violations. May train and develop subordinates through varied project assignments. Assists in educating users on security procedures. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and seven to nine years of related experience.
Health Security Engineer, Sr Principal	Serves as a company expert in monitoring, evaluating, and maintaining systems and procedures to protect the data systems and databases from unauthorized users. Identifies potential threats and responds to reported security violations. Determines causes of security breaches. Researches, recommends, and implements changes to procedures to protect data from future violations. Educates users on security procedures. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and ten to twelve years of related experience.
Health Software Developer, Associate	Performs maintenance on existing software products. Assists in coding, testing, and debugging new software or making enhancements to existing software. Writes programs according to specifications from higher-level personnel. Suggests solutions for problems or software enhancements. May assist in the development of user manuals and work with technical staff to learn and understand problems with software. Attends on-going training sessions to achieve a higher level of technical skill. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and zero to two years of related work experience.
Health Software Developer, Staff	Develops, codes, tests, and debugs new software or enhancements to existing software. Possesses a good understanding of business applications. Works with technical staff to understand and resolve software problems, resolves customer complaints with software and responds to suggestions for software modifications or enhancements. May be involved in the development of software user manuals and demonstrate software. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and two to four years of related experience.
Health Software Developer, Senior	Performs as a technical expert in the design development, coding, testing, and debugging new software or complex enhancements to existing software. Works with technical staff to understand and to develop resolution of software problems. Resolves customer complaints with software and respond to suggestions for software modifications or enhancements. Participates in the development of software user manuals. Assists in the training of less experienced software development staff and may act as a team leader on less complex projects. Requires Bachelor's degree (in Computer Science or related field) or equivalent and five to seven years of related experience.

Labor Category	Description
Health Software Developer, Principal	Performs as the technical expert with thorough understanding of the business application of an assigned project. Performs as a project lead with the responsibility for the instruction, assigning, direction, and monitoring of the performance of assigned software developers working on a specific project. Assists in the scheduling and coordinating of projects and may be involved in the design phase of a project. Works with customers and technical staff in the resolution of software problems and respond to suggestions for software modifications or enhancements. Participates in the development of software user manuals. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and seven to nine years of related experience.
Health Software Developer, Senior Principal	As a senior staff member, performs as the technical expert with thorough understanding of the business application of an assigned project. Perform as a project lead with the responsibility for the instruction, assigning, direction, and monitoring of the performance of assigned software developers working on a specific project. Assist in the scheduling and coordinating of projects and may be involved in the design phase of a project. Work with customers and technical staff in the resolution of software problems and respond to suggestions for software modifications or enhancements. Participate in the development of software user manuals. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and ten to twelve years of related experience.
Health Software Engineer, Associate	Assists in designing, developing, troubleshooting, and analyzing software programs for computer-based systems. Assists in evaluating/determining user needs with the maintenance of single-product models and subsystems. Performs routine systems modeling, simulation, and analysis. Designs and develops compilers, assemblers, utility programs, and operating systems. As required, provides inputs for documentation of new or existing programs. Primarily interfaces with intra-organizational staff with infrequent contact with inter-organizational staff and outside customers and vendors on routine matters. Requires Bachelor's degree (in Engineering, Computer Science or related field) or equivalent, and zero to two years of related experience.
Health Software Engineer, Staff	Designs, develops, troubleshoots, and analyzes software programs for computer based systems. Performs systems modeling, simulation, and analysis. Designs and develops compilers, assemblers, utility programs, and operating systems. As required, provides inputs for documentation of new or existing programs. Primarily interfaces with intra-organizational staff with infrequent contact with inter-organizational staff and outside customers and vendors on routine matters. Requires Bachelor's degree (in Engineering, Computer Science or related field) or equivalent, and two to four years of related experience.
Health Software Engineer, Senior	Performs subsystem definition, preliminary and detailed design, design implementation, subsystem and system integration, and tests for a subsystem. Participates in software requirements review, preliminary and critical design reviews, integration readiness review, and software acceptance reviews. Researches problems discovered by quality assurance or product support and develops solutions to the problems. Supports proposal efforts. Frequent inter-organizational and outside customer contacts. Represents the organization in providing solutions to difficult technical problems associated with specific projects. Requires Bachelor's degree (in Engineering, Computer Science or related field) or equivalent, and five to seven years of related work experience.

Labor Category	Description
<p>Health Software Engineer, Principal</p>	<p>Performs system and subsystem definition, preliminary and detailed design, design implementation, and subsystem and system integration and tests for a system. Participates in software requirement review, preliminary and critical design, integration readiness review, and software acceptance review. Acts as technical lead for pre-proposal, proposal, and existing program efforts. Involvement in business development includes briefing customers on company capabilities. Supports program management office in technical role. Represents the organization as the prime customer contact on contracts or projects. May research the marketing requirements for a product, including target environment, performance criteria, and competitive issues. Interacts with senior customer personnel on significant technical matters, often requiring coordinated activity across organizational lines. May provide technical guidance to lower level software engineers. Requires Bachelor's degree (in Engineering, Computer Science or related field) or equivalent, and seven to nine years of related experience.</p>
<p>Health Software Engineer, Sr Principal</p>	<p>Serves as a company expert in performing system and subsystem definition, preliminary and detailed design, design implementation, and subsystem and system integration and tests for a system. Participates in software requirement review, preliminary and critical design, integration readiness review, and software acceptance review. Acts as technical lead for pre-proposal, proposal, and existing program efforts. Involvement in business development includes briefing customers on company capabilities. Supports program management office in technical role. Represents the organization as the prime customer contact on contracts or projects. Interacts with senior customer personnel on significant technical matters, often requiring coordinated activity across organizational lines. Requires Bachelor's degree (in Engineering, Computer Science or related field) or equivalent, and ten to twelve years of related experience.</p>
<p>Health Software QA Specialist, Associate</p>	<p>Executes test scripts to ensure that quality software is provided for release to production. May also write, create, and modify test scripts to certify system changes, under close supervision. Reviews requirements, specifications and documentation to gain a thorough understanding of the programs and processes to be certified. Provides or validates estimates for assigned tasks. Develops test control databases. Maintains test databases and ensures their integrity and currency. Distributes test data from control database to development staff to satisfy adequate unit testing. Assists with configuration management tasks on a project (test scripts, source code control, coordination of requirement changes) as required. May write trace-ability matrices and test reports. May perform minor program changes or develop software programs as required. Requires Bachelor's degree or equivalent, and zero to two years of related experience.</p>

Labor Category	Description
Health Software QA Specialist, Staff	Executes test scripts to ensure that quality software is provided for release to production. May write test scripts. Reviews requirements, specifications and documentation to gain a thorough understanding of the programs and processes to be certified. Provides or validates estimates for assigned tasks. Under moderate supervision, creates and modifies test scripts to certify system changes. Develops test control databases. Maintains test databases and ensures their integrity and currency. Distributes test data from control database to development staff to satisfy adequate unit testing. Assists with configuration management tasks on a project (test scripts, source code control, coordination of requirement changes) as required. Releases completed projects into production. May write trace-ability matrices and test reports. May perform minor program changes or develop software programs as required. Requires Bachelor's degree or equivalent, and two to four years of related experience.
Health Software QA Specialist, Senior	Ensures that quality software is provided for release to production by independently executing test scripts. Writes test scripts. Reviews requirements, specifications and documentation to gain a thorough understanding of the programs and processes to be certified. Provides or validates estimates for assigned tasks. Creates and modifies test scripts to certify system changes. Develops test control databases. Maintains test databases and ensures their integrity and currency. Distributes test data from control database to development staff to satisfy adequate unit testing. Assists with configuration management tasks on a project (test scripts, source code control, coordination of requirement changes) as required. Releases completed projects into production. May write trace-ability matrices and test reports. May perform program changes or develop software programs as required. Requires Bachelor's degree or equivalent, and five to seven years of related experience.
Health Software QA Specialist, Principal	Executes test scripts to ensure that quality software is provided for release to production. Develops test scripts. Reviews requirements, specifications and documentation to gain a thorough understanding of the programs and processes to be certified. Provides or validates estimates for assigned tasks. Creates and modifies test scripts to certify system changes. Develops test control databases. Maintains test databases and ensures their integrity and currency. Distributes test data from control database to development staff to satisfy adequate unit testing. Assists in developing the configuration management tasks on a project (test scripts, source code control, coordination of requirement changes) as required. Releases completed projects into production. Writes trace-ability matrices and test reports. Performs major program changes or develops software programs. Requires Bachelor's degree or equivalent, and seven to nine years of related experience.

Labor Category	Description
Health Software QA Specialist, Sr Principal	<p>Ensures that quality software is provided for release to production by independently executing test scripts. May supervise more junior staff in writing test scripts. Develops and reviews requirements, specifications and documentation to provide staff and users with a thorough understanding of the programs and processes to be certified. Provides estimates for assigned tasks.</p> <p>As lead QA specialist, creates and modifies test scripts to certify system changes. Develops test control databases. Maintains test databases and ensures their integrity and currency. Distributes test data from control database to development staff to satisfy adequate unit testing. Defines configuration management tasks on a project (test scripts, source code control, coordination of requirement changes) as required. Releases completed projects into production.</p> <p>Helps develop trace-ability matrices and test reports. Performs all major program changes or oversees the development software programs as required. Requires Bachelor's degree or equivalent, and ten to twelve years of related experience.</p>
Health Subject Matter Expert	<p>Serves as experienced consultant with experience in supporting large projects related to the individual subject matter expertise. Beginning expertise in functional domains such as finance, personnel, acquisition, etc. Performs research, collection, collation and compilation of data, and preparation of inputs into larger reports. Evaluates and interprets findings. Prepares finished products for review by team leader or higher level analysts. Interfaces with external entities to collect data. Uses and/or develops computer tools to facilitate analysis tasks. Prepares monthly status reports. May be assigned to customer site. May prepare and present briefings. Requires Bachelor's degree in Business, Engineering, Management Sciences, Computer Science, Information Systems, Social Science, Education, Human Resources Development, and Psychology or other related disciplines and eight to ten years of experience or Master's degree and six to eight years of related experience or PhD and four to six years of related experience.</p>
Health Subject Matter Expert, Senior	<p>Serves as experienced consultant with experience in supporting large projects related to the individual subject matter expertise. Prepares and delivers presentations to colleagues, subordinates, and government representatives. Assures the proper use of current or requested programming, testing and documentation techniques. Produces, reviews and documents reflecting knowledge of areas as identified in the statement of work. Requires Bachelor's degree in Business, Engineering, Management Sciences, Computer Science, Information Systems, Social Science, Education, Human Resources Development, and Psychology or other related disciplines and ten to twelve years of experience or Master's degree and eight to ten years of related experience or PhD and five to seven years of related experience.</p>

Labor Category	Description
Health Subject Matter Expert, Principal	<p>Relevant experience includes supporting large projects related to the individuals subject matter expertise. Advanced expertise in functional domains such as finance, personnel, acquisition, etc. Experience as a Project Manager. Prepares and delivers presentations to colleagues, subordinates, and government representatives. Assures the proper use of current or requested programming, testing and documentation techniques. Produces and/or reviews substantive and/or complex documentation reflecting detailed knowledge of areas as identified in the statement of work. Requires Bachelor's degree in Business, Engineering, Management Sciences, Computer Science, Information Systems, Social Science, Education, Human Resources Development, and Psychology or other related disciplines and twelve to fifteen years of experience or Master's degree and ten to twelve years of related experience or PhD and eight to nine years of related experience. Requires Bachelor's degree in Business, Engineering, Management Sciences, Computer Science, Information Systems, Social Science, Education, Human Resources development, and Psychology or other related disciplines and twelve to fifteen years of experience or Master's degree and ten to twelve years of related experience or PhD and eight to nine years of related experience.</p>
Health Subject Matter Expert, Senior Principal	<p>Renowned expertise in functional domains such as finance, personnel, acquisition, etc. or technical disciplines such as computer security, network engineering, etc. Extensive experience as technical leaders and senior Project Managers. Prepares and delivers presentations to colleagues, subordinates, and government representatives. Assures the proper use of current or requested testing and documentation techniques. Produces, reviews substantive and complex documentation reflecting detailed knowledge of areas as identified in the statement of work. Requires Bachelor's degree in Business, Engineering, Management Sciences, Computer Science, Information Systems, Social Science, Education, Human Resources Development, and Psychology or other related disciplines, fifteen plus years of experience; or Master's degree, twelve plus years of related experience; or PhD, ten plus years of related experience and project management experience.</p>
Health Systems Administrator, Associate	<p>Maintains data files and control procedures for a system of networked computers or for a single group of microcomputers linked to a host workstation, or mainframe. Responsible for system security and data integrity. Assigns passwords and monitors use of resources, backs up files as required and responds to management requests for information. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and zero to two years of related experience.</p>
Health Systems Administrator, Staff	<p>Maintains data files and control procedures for a complex system of networked computers or for a single group of microcomputers linked to a host workstation, or mainframe. Monitors system security and data integrity. Assigns passwords and monitors use of resources, backs up files as required and responds to management requests for information. Performs other duties as assigned which may require specific physical abilities. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and two to four years of related experience.</p>

Labor Category	Description
Health Systems Administrator, Senior	Maintains data files and control procedures for a complex system of networked computers or for a single group of microcomputers linked to a host workstation, or mainframe. Responsible for system security and data integrity. Assigns passwords and monitors use of resources, backs up files as required and responds to management requests for information. Provides technical guidance to lesser-experienced systems administrators. Performs other duties as assigned which may require specific physical abilities. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and five to seven years of related experience.
Health Systems Administrator, Principal	Maintain data files and control procedures for a complex system of networked computers or for a single group of microcomputers linked to a host workstation, or mainframe. Responsible for system security and data integrity. Assigns passwords and monitors use of resources, backs up files as required and works with management to define requests for information. Provides technical guidance to lesser-experienced systems administrators. Performs other duties as assigned which may require specific physical abilities. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and seven to nine years of related experience.
Health Systems Administrator, Senior Principal	Serves as a company expert in establishing procedures for the maintenance of data files and control procedures for a complex system of networked computers or for a single group of microcomputers linked to a host workstation, or mainframe. Responsible for system security and data integrity. Monitors and defines the use of resources, and works with management to define requests for information. Provides technical guidance to lesser-experienced systems administrators. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and ten to twelve years of related experience.
Health Systems Administration Manager	Oversees and manages the daily operations of the Systems Administration department and staff and apply systems knowledge to ensure that the operating systems and security measures are in place and are running efficiently. Responsible for hiring, motivating, counseling and scheduling staff. Requires Bachelor's degree (in a technical discipline) or equivalent, and ten to twelve years of related experience.
Health Systems Analyst, Associate	Establish operational databases, software configuration control and system interfaces for computer system(s) assigned. Maintain file servers, network access, document and analyze system anomalies to ensure optimum equipment performance. Prepares system for operational use and support operational tests. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and zero to two years of related experience.
Health Systems Analyst, Staff	Establishes operational databases, software configuration control and system interfaces for computer system(s) assigned. Maintains file servers, network access, document and analyze system anomalies to ensure optimum equipment performance. Prepares system for operational use and support operational tests. Requires Bachelor's degree (in Computer Science, Management Information Systems or related field) or equivalent, and two to four years of related experience.

Labor Category	Description
Health Systems Analyst, Senior	Establish complex operational databases, software configuration control and system interfaces for computer system(s) assigned. Maintain file servers, network access, document, analyze, and troubleshoot system anomalies to ensure optimum equipment performance. Prepare system for operational use and support operational tests. Requires Bachelor's degree (in Computer Science, Management Information Systems or related field) or equivalent, and five to seven years of related experience.
Health Systems Analyst, Principal	Establishes complex operational databases, software configuration control and system interfaces for computer system(s) assigned. Maintains file servers, network access, document, analyze, and troubleshoot system anomalies to ensure optimum equipment performance. May supervise less experienced systems personnel. Prepare system for operational use and oversee operational tests. Requires Bachelor's degree (in Computer Science, Management Information Systems or related field) or equivalent, and seven to nine years of related experience.
Health Systems Analyst, Senior Principal	Serves as a company expert in establishing complex operational databases, software configuration control and system interfaces for computer system(s) assigned. Develops procedures to maintain file servers, network access, document, analyze, and troubleshoot system anomalies to ensure optimum equipment performance. May supervise less experienced systems personnel. Prepares system for operational use and oversee operational tests. Requires Bachelor's degree (in Computer Science, Management Information Systems or related field) or equivalent, and ten to twelve years of related experience.
Health Systems Engineer, Associate	Assists in the coding and maintenance of utility programs, job control language and input/output handling programs, as well as other software of minimal complexity. Provides functional and empirical analysis related to the design, development, and implementation of hardware and software operating systems for the organization's products. May assist in the maintenance of program libraries and technical manuals. Attends on-going training sessions to achieve a higher level of technical skill. Requires Bachelor's degree (in Computer Science, Math, Electrical Engineering or related field) or equivalent, and zero to two years of related work experience.
Health Systems Engineer, Staff	Assists in the definition and programming of moderately complex software. Works effectively on several phases of systems/software programming/analysis with little direction, but may require some instruction and guidance for other aspects. Provides functional and empirical analysis related to the design, development, and implementation of hardware and software operating systems for the organization's products. May assist in the coding of benchmark testing, job accounting and other control modules developed internally by the company. May assist with moderately complex software applications, such as system generations, compilers, link editors, and assemblers. Requires Bachelor's degree (in Computer Science, Math, Electrical Engineering or related field) or equivalent, and two to four years of related experience.

<b>Labor Category</b>	<b>Description</b>
Health Systems Engineer, Senior	Works from specifications to develop or modify complex software programs to enhance an operating system. May give some direction and guidance to less experienced software systems engineers. Investigates and resolves operational problems in conjunction with other engineering and technical personnel. Develops logic, codes, tests and debugs software packages. Modifies, tests, and debugs retail utilities. Packages and engineers releases to integrate with the company's operating systems. Develops and modifies complex software, such as routines supporting multiprogramming, telecommunications and file management. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and five to seven years of related work experience.
Health Systems Engineer, Principal	Provides expertise and direction in the development or modification of complex software programs to enhance an operating system. Provides functional and empirical analysis related to the design, development, and implementation of hardware and software operating systems for the organization's products. Responsible for the instruction, assigning, and overseeing the performance of less experienced software systems engineers. Coordinates the activities of the software engineering department with other sections of the corporation's information systems operation. May train and supervise subordinate systems engineers. Requires Bachelor's degree (in Computer Science, Math, Electrical Engineering or related field) and seven to nine years of related experience.
Health Systems Engineer, Sr Principal	Performs as the highest-level technical expert, providing both internal and external consulting services. Works independently on advanced systems/software analysis projects. Develops and may conduct training programs. Remains current in operating systems/software analysis and technological developments/applications. Recommends future direction or projects to management. Provides expertise and direction in the development or modification of complex software programs to enhance an operating system. Requires Bachelor's degree (in Computer Science, Math, Electrical Engineering or related field) or equivalent, and ten to twelve years of related experience.

Labor Category	Description
<p>Health Assistant                      Technical Director</p>	<p>Assists in the management of a directorate or is at an entry level in management of a directorate under the close supervision of the Technical or Executive Director. Manages one or more programs. May supervise professional and technical personnel performing in their regular disciplines. May participate in the development and execution of budgets, sales and marketing plans and other strategic tools. Participates in directorate efforts toward achieving established objectives. May serve as the primary or assistant technical and management interface for the company, customer, and senior staff. Provides management services including general administrative oversight, time accounting, financial tracking, cost projection, inventory management, personnel evaluation and support. Responsible for the preparation of and accountability for all contract deliverables. Provides administrative support to tech Quality Assurance Unit and Health and Safety organizations to insure all related contract objectives are achieved. Responsible for assisting in the technical leadership and direction to a multidisciplinary staff. Develops and operates a variety of technical systems related to the specific job function. Specifies systems requirements and insures that completed systems meet requirements. Supports data acquisition process control. Prepares and approves Standard Operating Procedures, Protocols and other technical documentation. Requires Bachelor's degree or equivalent, and ten to twelve years of related (technical environment) experience, financial management including budgeting and cost projections experience, and management experience.</p>
<p>Health Technical                      Director 1</p>	<p>Directs and guides the technical activities within a division with supervisory and developmental responsibilities within a functional area. Manages one or more projects or programs, may manage an operating office and supervises professional and technical personnel performing in their customary disciplines. Develops and maintains a sales and marketing plan to achieve previously agreed-upon objectives endorsed by division and group management. Maintains aggressive efforts to achieve objectives. Manages one or more technical programs. Acts as a technical liaison with vendors. Trains and supervises personnel. Assists in proposal process and coordinates with Pricing Department when required. Responsible for all phases of the program budget. Performs analysis for contract reviews with various software. Develops marketing plans. Develops Quality Assurance Programs for all products and services. Prepare Staffing Plans, including skill and labor mix, to support contract operations. May be responsible for recruiting, interviewing, and hiring staff Assign Staff and provide technical direction as necessary to complete task. Monitors contract, subcontract, and funding; prepare forecasts of program financial performance. Develops and deliver required contract , departmental, project and/or financial reports. Interacts readily with the technical staff and vendors both within and outside the company.. Ability to conduct independent research. Requires Bachelor's degree or equivalent, and twelve to fifteen years of related (technical environment) experience and management experience including developing operating budgets and reporting/assessing financial information.</p>

Labor Category	Description
<p>Health Technical Director 2</p>	<p>Directs one or more technical projects/programs within a functional area. May manage an operating office and supervises professional and technical personnel performing in their customary disciplines. Develops and maintains a sales and marketing plan to achieve previously agreed-upon objectives endorsed by division and group management. Maintains aggressive efforts to achieve objectives. Acts as a technical liaison with vendors within and outside the company. Assists in proposal process and coordinates with Pricing Department when required. Responsible for all phases of the program budget. Performs analysis for contract reviews with various software. Develops marketing plans and Quality Assurance Programs for all products and services. Prepare Staffing Plans, including skill and labor mix, to support contract operations. Conducts independent research. Responsible for recruiting, interviewing, hiring and training staff. Assigns staff and provide technical direction to complete task. Monitors contract, subcontract, and funding; prepare forecasts of program financial performance. Develops and deliver required contract, departmental, project and/or financial reports. Requires Bachelor's degree or equivalent in a relevant discipline and sixteen plus years work experience including developing operating budgets and reporting/ assessing financial information.</p>
<p>Health Director, Information Technology</p>	<p>Directs all aspects of the information systems function. Determines operating philosophy of department and ensures the philosophy is translated into action. Provides top management with technical information and recommendations on information technology. Maintains company and competitive posture in information technology usage. Ensures adequate budget for capital equipment and technical manpower acquisition. Requires Bachelor's degree or equivalent, in computer science or related field and 16 plus years of experience or Master's degree, or equivalent, and twelve plus years of information technology management experience.</p>
<p>Health Systems Architect</p>	<p>Under minimal supervision designs, implements, and maintains the organization's application systems and/or IT infrastructure for moderately complex systems. Understands user and process requirements and ensures those requirements can be achieved through high quality deliverables. Works closely with developers and engineers to develop road maps for applications, align development plans, and to ensure effective integration among information systems and the IT infrastructure. Ensures that solutions are continuously improved, supported, and aligned with industry and company standards as well as emerging business requirements. Understands the interactions between systems, applications, and services within the environment, and evaluate the impact of changes or additions for moderately complex systems. Analyzes systems and perform usability testing to ensure performance and reliability, enhance scalability, and meet security requirements. Requires a Bachelor's Degree and four to five years experience or equivalent education.</p>

Labor Category	Description
<p>Health Systems Architect, Senior</p>	<p>Designs, implements, and maintains the organization's application systems and/or IT infrastructure for complex systems. Provides an architectural framework for information system development, maintenance, and enhancement efforts. Understands user and process requirements and ensures those requirements can be achieved through high quality deliverables. Works closely with developers and engineers to develop road maps for applications, align development plans, and to ensure effective integration among information systems and the IT infrastructure. Ensures that solutions are continuously improved, supported, and aligned with industry and company standards as well as emerging business requirements. Understands the interactions between systems, applications, and services within the environment, and evaluate the impact of changes or additions for complex systems. Analyzes systems and perform usability testing to ensure performance and reliability, enhance scalability, and meet security requirements. May assist less experienced peers. Requires a Bachelor's Degree and six to nine years experience or equivalent education.</p>
<p>Health Systems Architect, Principal</p>	<p>Performs as the technical expert in designing, implementing, and maintaining the organization's application systems and/or IT infrastructure for highly complex systems. Provides an architectural framework for information system development, maintenance, and enhancement efforts. Understands user and process requirements and ensure those requirements can be achieved through high quality deliverables. Works closely with management, developers, and engineers to develop road maps for applications, align development plans, and to ensure effective integration among information systems and the IT infrastructure. Monitors technological advancements to ensure that solutions are continuously improved, supported, and aligned with industry and company standards as well as emerging business requirements. Understand the interactions between systems, applications, and services within the environment, and evaluate the impact of changes or additions for highly complex systems.</p>

Labor Category	Description
	<p>Analyze systems and perform usability testing to ensure performance and reliability, enhance scalability, and meet security requirements. Assists less experienced peers. Requires a Bachelor's Degree and 10 to 14 years experience or equivalent education.</p> <p>Performs as the technical expert in designing, implementing, and maintaining the organization's application systems and/or IT infrastructure for highly complex systems. Provides an architectural framework for information system development, maintenance, and enhancement efforts. Understands user and process requirements and ensure those requirements can be achieved through high quality deliverables. Works closely with management, developers, and engineers to develop road maps for applications, align development plans, and to ensure effective integration among information systems and the IT infrastructure. Monitors technological advancements to ensure that solutions are continuously improved, supported, and aligned with industry and company standards as well as emerging business requirements. Understand the interactions between systems, applications, and services within the environment, and evaluate the impact of changes or additions for highly complex systems.</p> <p>Analyze systems and perform usability testing to ensure performance and reliability, enhance scalability, and meet security requirements. Assists less experienced peers. Requires a Bachelor's Degree and 10 to 14 years experience or equivalent education.</p>
Health Technical Writer, Associate	<p>Researches, writes, edits, and proofreads technical data for use in documents or sections of documents such as manuals, procedures and specifications. Ensures technical documentation is accurate, complete, meets editorial and government specifications and adheres to standards for quality, graphics, coverage, format, and style. Assists in establishing style guidelines and standards for texts and illustrations. Requires Bachelor's degree or equivalent in related technical field and zero to two years of related (technical writing/copy editing) experience.</p>
Health Technical Writer, Staff	<p>Researches, writes, edits, and proofreads technical data for use in documents or sections of documents such as manuals, procedures and specifications. Ensures technical documentation is accurate, complete, meets editorial and government specifications and adheres to standards for quality, graphics, coverage, format, and style. Assists in establishing style guidelines and standards for texts and illustrations or equivalent. Requires Bachelor's degree or equivalent (in related technical field) and two to four years of related (technical writing and copy editing) experience.</p>
Health Technical Writer, Senior	<p>Researches, organizes, writes, edits, and produces technical data for major publication projects. Organizes material and writes descriptive copy according to standards regarding order, clarity, conciseness, style, and terminology. Ensures technical documentation is accurate, complete, meets editorial and government specifications and adheres to standards for quality, graphics, coverage, format, and style. May participate in the establishment of style guidelines and standards for texts and illustrations. May provide work leadership for lower level employees. Requires Bachelor's degree or equivalent in related technical field and five to seven years of related (technical writing/editing) experience.</p>

Labor Category	Description
Health Technical Writer, Principal	Oversees the writing of technical reports, brochures, and manuals for internal documentation, client reference, or publications. Researches, organizes, writes, edits, and produces data for use in a wide variety of complex technical publications requiring in-depth knowledge and understanding of the subject matter. Recommends overall organization and layout, editorial standards and publication methods. Coordinates publication with outside sources and vendors as needed. Develops department editing standards and styles. May provide work Leadership for lower level employees. Requires Bachelor's degree or equivalent in related technical field and seven to nine years of related (technical writing/editing) experience.
Health Help Desk Specialist, Staff	Responsible for providing support to end-user community on hardware, software and network related problems, questions, and use. Provides resolutions to out of the ordinary issues for users. If unable to diagnose problem, will work with Help Desk Management to diagnose and resolve problem. Responds to tier two and higher trouble tickets. Ensures problem ownership and promotes end-user satisfaction. Closes activities of tickets assigned. Requires Bachelor's Degree (in Computer Science or related field) or equivalent, and two to four years of related experience in computer hardware, software, networking systems, and in the set-up, configuration, use, and trouble shooting of computer systems.
Health Help Desk Specialist, Senior	Responsible for providing support to end-user community on difficult hardware, software and network related problems, questions, and use. May provide training and guidance to more junior help desk personnel. Provides resolutions to out of the ordinary issues for users. If unable to diagnose problem, will work with Help Desk Management to diagnose and resolve problem. Responds to tier two and higher trouble tickets. Ensures problem ownership and promotes end-user satisfaction. Closes activities of tickets assigned. Responsible for providing in-depth and high level, support to end-user community on hardware, software and network related problems, questions, and use. Provides problem resolution to users. Confers with user to determine problem. Ensures problem ownership and promotes end-user satisfaction. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and five to seven years of related experience in computer hardware, software, networking systems, and in the set-up, configuration, use, and trouble shooting of computer systems.
Health Help Desk Specialist, Principal	Serving as company or contract expert, responsible for providing telephone support to end-user community on complex hardware, software and network related problems, questions, and use. May provide training and guidance to more junior help desk personnel. Provides first level problem resolution on the telephone with users, walks the user through a series of steps to determine problem and classify level, priority and nature of problem. If unable to diagnose problem and/or problem requires physical interaction with end user dispatches field engineers from appropriate team. Opens, tracks and closes trouble tickets; ensures problem ownership and promotes end-user satisfaction. Tracks activities of field engineers to who tickets were assigned. Trained and certified in automated help desk management systems. Requires Bachelor's degree (in Computer Science or related field) or equivalent, and seven to nine years of

Labor Category	Description
	related experience in computer hardware, software, networking systems, and in the set-up, configuration, use, and trouble shooting of computer systems.
Health Senior Office Administrator	Provides on-site administrative support and coordination to a complex contract, project or task(s). Maintains and tracks costs and performances on contract. Oversees the administrative and clerical functions of assigned contracts, projects, or tasks. Maintains office records and files. May collect time sheets and other personnel records or paperwork for corporate processing. Requires Bachelor's degree or equivalent and two to four years of related experience.
